2019 2008 Outstanding  
Academic Title, Choice  
Magazine From dirt bikes and  
jet skis to weed wackers and  
snowblowers, machines  
powered by small gas engines  
have become a  
permanent—and loud—fixture  
in American culture. But fifty  
years of high-speed fun and  
pristine lawns have not come  
without cost. In the first  
comprehensive history of the  
small-bore engine and the  
technology it powers, Paul R.  
Josephson explores the  
political, environmental, and  
public health issues  
surrounding one of America's  
most dangerous pastimes. Each  
chapter tells the story of an  
ecosystem within the United  
States and the devices that  
wreak havoc on it—personal  
watercraft (PWCs) on inland  
lakes and rivers; all-terrain  
vehicles (ATVs) in deserts and  
forests; lawn mowers and leaf  
blowers in suburbia. In  
addition to environmental  
impacts, Josephson discusses  
the development and

promotion of these  
technologies, the legal and  
regulatory efforts made to  
improve their safety and  
environmental soundness, and  
the role of owners' clubs in  
encouraging responsible  
operation. Synthesizing  
information from medical  
journals, recent environmental  
research, nongovernmental  
organizations, and  
manufacturers, Josephson's  
compelling history leads to one  
irrefutable conclusion: these  
machines cannot be operated  
without loss of life and loss of  
habitat.  
*Personal Watercraft* Aug 05
