Supporting Kids and Teens with Exam Stress in School Nov 08

2020 As young people are exposed to more and more pressure at school, exam stress comes hand in hand. This workbook, a fun and interactive resource aimed at children and teens aged 10 and over, offers teachers, other professionals and parents tried and tested techniques to support young people's wellbeing through revision and exams.

Applying a cognitive behavioural

framework, it will help pupils to consider academic stress in terms of thoughts, feeling, body sensations and behaviour. Strategies encompass managing a child's lifestyle, namely exercise and diet, tried and tested CBT techniques, relaxation, positive self-talk and thought challenging, and other psychological methods such as mindfulness. Chapters will look at the day of the exam itself, evaluate stress in children with special educational needs and provide

practical advice for parents as to how they can most successfully support their child. With photocopiable resources to use with the young person and suitable for either individual use or group work, Supporting Kids and Teens with Exam Stress in Schools will guide parents, teachers, tutors, therapists and other supporting adults to conquer students' fears, improve exam performance and, perhaps most important of all, maintain a work-fun balance in young people's lives.

In the Apocalypse, Jesus appears in glorious form reminiscent of angels in Jewish and Christian literature in the period between 200 BCE and 200 CE. Dr Carrell asks what significance this has for the christology of the Apocalypse. He concludes that by portraying Jesus in such a way that he has the form and function of an angel, and yet is also divine, the Apocalypse both

A Question of RESPECT Jun 03 2020 Life in America has become fractured—in public and private—across ever-widening fault lines of anger and incivility. The intensity of disagreement between Americans threatens the nation's well-being, presenting itself as disrespectful and distrustful in politics, culture, and conversations. Confusion, frustration, and hatred permeate politics, social media interactions, and cable news. The dysfunction and distrust also appear on the streets and at

dinner tables. There is an urgent need for Americans to come together. But how? Pollsters and political strategists Ed Goeas, Republican, and Celinda Lake, Democrat, have worked together on their groundbreaking joint Battleground Poll for more than thirty years and have a shared stethoscope to the pulse of the American public. In their highly respected and widely quoted Battleground Polls, they ask questions and elicit responses that tell us what people think and feel about the most pressing issues of the day. While they often use relevant poll results in this book

their arguments, A Question of Respect is not about polling—nor does it contain a magic antidote for America's woes. Instead, it's a political resource that depicts a compelling case for how the nation reached this moment and, more importantly, where it needs to go and what it might take. Though Ed is a Republican and Celinda is a Democrat, they have reached across the great divide to make the case that the only way for America to claw its way out of this mess is through mutual respect. They posit that respect is the foundation upon which we can again trust one another as

Autism as Context Blindness Jan 11 2021 Despite years of study and advanced technologies, we still do not fully understand how the "typical" brain works, much less how an autistic brain works. And while we have become increasingly familiar with the term autistic thinking, people with autism are still misunderstood, leading to frustration, depression and missed opportunities to reach one's potential. According to Peter Vermeulen, treatment of autism is still too focused on behavior and minimally focused on observation or determining the

way of thinking that leads to the behavior. In this groundbreaking book, Vermeulen explains in everyday terms how the autistic brain functions with a particular emphasis on the apparent lack of sensitivity to and awareness of the context in which things happen. Full of examples, the book examines "context" as it relates to observation, social interactions, communication and knowledge.

Born Anxious Jul 17 2021 Why are we the way we are? Why do some of us find it impossible to calm a quick temper or to shake anxiety? The debate has always been divided between nature and nurture, but as psychology professor Daniel P. Keating demonstrates in *Born Anxious*, new DNA science points to a third factor that allows us to inherit both the nature and the nurture of previous generations—with significant consequences. *Born Anxious* introduces a new word into our lexicon: “methylated.” It’s short for “epigenetic methylation,” and at

The Sensory Processing Diet

Jul 29 2022 As a mom of a newly diagnosed child with Sensory Processing Disorder (SPD), I relentlessly sought experts in SPD, as well as top nutritionists, biopsychologists,

and neurologists. I figured that if I understood the major functions of the brain, and how it's supposed to take in, process and respond to stimulation, I could discover how SPD interferes with these functions. Understanding the whole picture - the combination of body, brain and nutritional health - led me to embrace the "Sensory Diet." In this book, I share the keys of a well-balanced nutritional diet and the activities and exercises that truly work. Use the resources in this book to create a whole picture of your own child's conditions and customize a Sensory Diet for him.

2020 Acquire the tools and techniques that will help meet the world's growing natural gas demand. *Handbook of Natural Gas Transmission and Processing, 2nd Edition* gives engineers and managers complete coverage of natural gas transmission and processing in the most rapidly growing sector to the petroleum industry.

Emphasizing the practical aspects of natural gas production over the theoretical, the authors provide a unique discussion of new technologies that are energy efficient and environmentally appealing at the same time. This 2nd

edition examines ways to select the best processing route for optimal design of gas-processing plants and includes three new chapters on dynamics of process controls, process modeling and simulation and optimal design of gas processing plants. Both Chapter 7 (Acid Gas Treating) and Chapter 9 (Natural Gas Dehydration) are heavily revised. The objective of this work is to provide plant designers and owners/operators methods to decrease construction costs and total cost of ownership while addressing reliability and availability.
