Gorilla Pathology and Health Sep 06 2020 Gorilla Pathology and Health: With a Catalogue of Preserved Materials consists of two cross-referenced parts. The first, the book itself, is a review of pathological changes and tissue responses in gorillas (*Gorilla gorilla* and *G. beringei*), with an emphasis on free-living animals, but also with reference to those in captivity. The comparative aspects are discussed, stressing the relevance of research to both gorillas and humans. What makes the publication truly unique, however, is the second part, a comprehensive descriptive catalogue of the location and nature of gorilla material in museums and scientific institutions throughout the world. This is of great consequence because free-living gorillas are strictly conserved with restricted access, so the location of a wealth of preserved tissues and other material that has been collected over the decades is a great benefit for research and study. This book can, and should, be used to gain cardinal knowledge regarding the biology and pathology of this genus. The combination of book and catalogue in this extensive compilation makes it an invaluable tool for all those concerned with the health, welfare, and conservation of gorillas, one of our nearest living relatives. Brings together studies, data, and clinical practice from difficult-to-access or obscure journals and NGO reports, in different languages, for all interested parties and practitioners Provides perspectives on existing research in gorilla pathology, both for those studying conservation practices and those seeking an understanding of comparable diseases in humans Includes illustrative figures on gross and microscopic pathological changes, museum specimens, photos of field necropsy and techniques, and examples of laboratory tests Features an extensive list of references and further reading, in different languages Incorporates a comprehensive, descriptive catalogue of gorilla material from around the world

Immigration Practice - 15th Edition Oct 20 2021 Immigration Practice guides readers through all aspects of immigration law in one volume, complete with over 3,000 footnote citations to the wide range of statutes, regulations, court and administrative cases, policy memos, operations instructions, agency interpretive letters, and internet sites that a lawyer needs for complete understanding of a particular problem. No other source merges the practical with commentary and analysis so helpfully. The book explains in understandable language and meaningful and dependable detail the substantive issues and the practical procedures a lawyer needs to handle a specific immigration matter, complete with checklists of forms, supporting evidence, and other strategies needed for application/petition packages. The book has unparalleled coherence, integration and consistency. * Liberally cross references to other sections in the book where related topics are discussed (because so many topics are interrelated). * Line-by-line instructions on how to complete the most commonly used forms to avoid embarrassing mistakes. * Lists the contents of packages to file with government agencies: forms and fees, detailed support letters, and other supporting evidence. * Explanations of potentially applicable visa options organized according to the attributes of the foreign national (and the employer), rather than classifications in alphabetical order, so that practitioners can make sense of options in light of the client in the office. * Comparisons and charts of attributes and procedures of

such topics as nonimmigrant visa classifications, procedures to permanent residence, and standards of "extreme" hardship. * Citations throughout the book, and collection in the extensive CD-ROM Appendix, to primary source materials and the most useful Internet site URLs with explanation of the increasingly helpful free databases and tools available through each one. • Internet Links: Constantly increased and updated links to government web sites containing current contact information, forms, primary law sources of all types, case status information, and processing and substantive guides--all referenced by pinpoint citations in the text. See Chapter 5 explaining sources of law, Appendix C and D-1 showing web links, and the CD-ROM in the back cover providing one-click access! Readers are strongly encouraged to review and use the CD-ROM and to consider saving Appendix C, D-1, and E-1 into their hard drives or saving the links to their internet browser "favorites" or "bookmarks" for ready reference all the time. • Upgraded removal-related treatment: significant improvements to Chapters 10, 11, and 16 by attorney who has worked for immigration courts several years. • Supreme Court decisions: effects of limited marijuana distribution offense as aggravated felony (§ 10-6(b)(1)(vi)); tax offenses as aggravated felonies (§ 10-6(b)(1)(vi)); rejection of "comparable grounds rule" for 212(c) eligibility (§ 10-6(b)(1)(vii)); modified categorical approach applies only to divisible statutes (§ 10-6(b)(2)(i)); non-retroactivity of Padilla decision (§ 10-6(b)(2)(vi)); rejection of the "statutory counterpart rule" for § 212(c) waivers (§ 11-5(f)); invalidation of the Defense of Marriage Act § 14-7(a)(2)(i)); non-imputation to child of firm resettlement of parents (§ 16-4(c)). • Lower federal court decisions: concerning such issues as: recognizing a beneficiary to have standing to challenge a USCIS petition denial (§ 2-2(a)(1)(I)); reviewability of good moral character determinations and other (§ 2-2(a)(1)(I)); court order of USCIS to speed up FOIA certain responses (§ 4-2); CBP FOIA process (§ 4-2); DOL case disclosure data (§ 4-5); need to exhaust remedies under DHS TRIP to challenge inclusion on watch list (§ 10-3); CIMT crime determinations (§ 10-6(b)(1)(iii)); effect of a single firearm sale (§ 10-6(b)(1)(vi)); 212(h) waiver eligibility in regard to post-entry adjustment but not as to stand alone request (§ 10-6(b)(3)); interference with police helicopter using laser light as CIMT (§ 10-6(c)); whether post-entry adjustment is an admission for § 212(h) waivers (§ 10-6(b)(3)); whether there is an involuntariness or duress exception to the terrorism support bar (§ 10-6(c)); enforcement of I-864 financial support obligations (§ 10-6(d)(2)); mandatory bond hearing after six months of detention (§ 11-3(f)); ICE detainers found to lack authority (§ 11-3(g)); representation in immigration court at government expense for aliens with serious mental disabilities (§ 11-4(g)); stop-time and petty offense exceptions relating to cancellation of removal (§ 11-5(f)); revelation of the BIA's erroneous reliance for decades on nonexistent provisions of Mexican Constitution affecting legitimation issues (§ 12-3(d)(3)); rejection of BIA's rule against nunc pro tunc adoption orders (§ 14-7(b)(3)); invalidation of FSBPT efforts to restrict applicants from certain countries to sit for physical therapy exams (§ 15-2(c)(2)); use of impeachment evidence only to terminate asylum (16-2(b)); asylum claims of German homeschoolers, and mixed motive cases (§ 16-4(a)(3)); social group asylum claims (§ 16-4(a)(3)); expansive implications of inconsistencies in testimony (§ 16-4(a)(4)); "particularly serious crimes" barring asylum claims (§ 16-4(c)); special asylum procedures for unaccompanied children (§ 16-4(c)); adjustment eligibility of alien who entered without inspection and then obtained TPS (§ 16-7(a)(6)); eligibility of after-acquired spouse under Cuban Adjustment Act (§ 16-7(e)); preempted state law provisions aimed at aliens, employers, and landlords (§ 19-4(l)(3)). • BIA decisions on such issues as: what constitutes a drug trafficking crime (§ 10-6(b)(1)(iv)); implications of child pornography conviction (§ 10-6(b)(1)(vi)); possession of ammunition by a convicted felon (§ 10-6(b)(1)(vi)); availability of "stand-alone" § 212(h) waiver without adjustment application (§ 10-6(b)(3)); service of NTA on a minor (§ 11-3(b)); service of NTA and other safeguards for aliens with serious mental conditions (§ 11-4(g)); approval of administrative closure of removal cases (§ 11-5(d)); termination of asylum, then removal and relief in proceedings (§ 16-2(b)); relocation issues in asylum claims (§ 16-4(a)(3)). • Regulations, government policy memorandums, other decisions, and government web site enhancements concerning such matters as: differing government renderings of single name for certain persons (§ 1-6(a)(3)); USCIS refusal to accept stamped signatures for attorneys on G-28

Modern Analytic Methods for Computing Scattering Amplitudes Jul 25 2019 This work presents

some essential techniques that constitute the modern strategy for computing scattering amplitudes. It begins with an introductory chapter to fill the gap between a standard QFT course and the latest developments in the field. The author then tackles the main bottleneck: the computation of the loop Feynman integrals. The most efficient technique for their computation is the method of the differential equations. This is discussed in detail, with a particular focus on the mathematical aspects involved in the derivation of the differential equations and their solution. Ample space is devoted to the special functions arising from the differential equations, to their analytic properties, and to the mathematical techniques which allow us to handle them systematically. The thesis also addresses the application of these techniques to a cutting-edge problem of importance for the physics programme of the Large Hadron Collider: five-particle amplitudes at two-loop order. It presents the first analytic results for complete two-loop five-particle amplitudes, in supersymmetric theories and QCD. The techniques discussed here open the door to precision phenomenology for processes of phenomenological interest, such as three-photon, three-jet, and di-photon + jet production.

Theory and Practice of Solid Mechanics Nov 20 2021 This book is intended for use by engineers and scientists who have a need for an introduction to advanced topics in solid mechanics. It deals with modern concepts of continuum mechanics as well as with details of the classical theories of elasticity, thermal elasticity, viscous elasticity, and plasticity of solids. The book assumes no prior knowledge of the mechanics of solids and develops the subject entirely from first principles. Rigorous derivations of governing equations are also followed by applications to a number of basic and practical problems. Cartesian tensors are used throughout the book to express mathematical concepts in a clear and concise fashion. Chapter I, accordingly, provides a discussion of this topic for those readers not already familiar with it. This material is then followed by detailed discussions in Chapters 2 and 3 of the kinematics of continuum motion and the fundamental principles of mass conservation and momentum balance. Unlike traditional treatments, this material is first developed for the general large-deformation case and only then restricted to small deformations for use in the usual engineering applications. In this way the reader thus gets a fuller picture of the basic governing relations of solid mechanics.
