The Pedagogy of Standardized Testing Aug 05 2020 Based on a large-scale international study of teachers in Los Angeles, Chicago, Ontario, and New York, this book illustrates the ways increased use of high-stakes standardized testing is fundamentally changing education in the US and Canada with a negative overall impact on the way teachers teach and students learn. Standardized testing makes understanding students' strengths and weaknesses more difficult, and class time spent on testing consumes scarce time and attention needed to support the success of all students—further disadvantaging ELLs, students with exceptionalities, low income, and racially minoritized students.

The Conceptualization of Counterfactual in L1 and L2 Jul 28 2022 Counterfactual thinking is a universal cognitive process in which reality is compared to an imagined view of what might have been. This type of reasoning is at the center of daily operations, as decision-making, risk preventability or blame assignment. More generally, non-factual scenarios have been defined as a crucial ingredient of desire and modern love. If the areas covered by this reasoning are so varied, the L2 learner will be led to express 'what might have been' at some point of her acquisitional itinerary. How is this reasoning expressed in French, Spanish and Italian? By the use of what lexical, syntactic and grammatical devices? Will the learner combine these devices as the native French speakers do? What are the L1 features likely to fossilize in the L2 grammar? What are the information principles governing a communicative task based on the production of counterfactual scenarios? These are some of the questions addressed by the present volume.
