Sexual Harassment of Women  
Nov 19 2021  
Over the last few decades, research, activity, and funding has been devoted to improving the recruitment, retention, and advancement of women in the fields of science, engineering, and medicine. In recent years the diversity of those participating in these fields, particularly the participation of women, has improved and there are significantly more women entering careers and studying science, engineering, and medicine than ever before. However, as women increasingly enter these fields they face biases and barriers and it is not surprising that sexual harassment is one of these barriers. Over thirty years the incidence of sexual harassment in different industries has held steady, yet now more women are in the workforce and in academia, and in the fields of science, engineering, and medicine (as students and faculty) and so more women are experiencing sexual harassment as they work and learn. Over the last several years, revelations of the sexual harassment experienced by women in the workplace and in academic settings have raised urgent questions about the specific impact of this discriminatory behavior on women and the

extent to which it is limiting their careers. Sexual Harassment of Women explores the influence of sexual harassment in academia on the career advancement of women in the scientific, technical, and medical workforce. This report reviews the research on the extent to which women in the fields of science, engineering, and medicine are victimized by sexual harassment and examines the existing information on the extent to which sexual harassment in academia negatively impacts the recruitment, retention, and advancement of women pursuing scientific, engineering, technical, and medical careers. It also identifies and analyzes the policies, strategies and practices that have been the most successful in preventing and addressing sexual harassment in these settings.

Education, Ethnicity and Equity in the Multilingual Asian Context Dec 29 2019 The book addresses issues related to the education of ethnic minority individuals in the multilingual Asian region. It features recent research and practices of scholars aiming to rethink educational policy and practice surrounding the education of ethnic minority students with a variety of language scenarios in Hong Kong and other Asian contexts. It documents how ethnicity and inequality are played out at policy, school, and individual levels, and how these affect the education of ethnic minorities in their host societies. Using a range of methods, from surveys to interviews and document analysis, this book describes the links between language, identity and educational inequality related to ethnic minorities in Asian contexts.

Managing Workplace Diversity and Inclusion Jan 28 2020 Managing Workplace Diversity and Inclusion bridges the gap between social science theory and research and the practical concerns of those working in diversity and inclusion by presenting an applied psychological perspective. Using foundational ideas in the field of diversity and inclusion as well as concepts in the social sciences, this book provides a set of cognitive tools for dealing with situations related to workplace diversity and applies both classic theories and new ideas to topics such as United States employment law, teamwork, gender, race and ethnicity, sexual orientation, and other areas. Each chapter includes engaging scenarios and real-world applications to stimulate learning and help students conceptualize and contextualize diversity in the workplace. Intended for upper-level undergraduates as well as graduate students, this textbook brings together foundational theories with practical, real-world applications to build a strong understanding of managing diversity and inclusion in the workplace.

Ethical Innovation in Business and the Economy Mar 24 2022 Innovation has become a buzzword that promises dramatic changes in almost every field of business. Absent from this attention is a serious discussion of the ethical sides of dramatic change. To address this, editors Georges Enderle and Patrick E. Murphy gather a team of experts to fully examine the ethics of innovation within business and the economy in this standout addition to the Studies in TransAtlantic Business Ethics series.

Structures of GraceDec 09 2020 This is a book about the business practices of a group of companies who are dedicated to changing the world. These companies participate in the Economy of Communion (EOC) project, which is an initiative of the international and ecumenical Focolare movement. For these companies, changing the world means "humanizing" the economy by consistently privileging relationships over profit-maximizing, and by putting profits in common and using them to address acute social needs and concerns. It also means "humanizing" companies and organizations through business practices that respect the inherent dignity of each person, and that are aimed at breaking down barriers between people in business. The book is the product of a rigorous, robust and multi-year research project involving more than a dozen U.S and Canadian based EOC companies, and should be considered a case study of the EOC

rather than a study of any of the individual companies. What, indeed, do we mean by “structures of grace”? First and foremost, the title reflects our conviction that EOC companies are indeed different. And that difference is centered on a conviction of the business as a set of relationships, or more accurately, a community, and the conviction that the purpose of economic activity — the production and distribution of goods and services — is to bring people together, to create community. For us, this is the defining characteristic of the EOC.

The Ebola Outbreak in West Africa Jan 10 2021 The Zaire Ebola virus appeared out of

nowhere and then disappeared into thin air after killing scores of humans in West Africa. In *The Ebola Outbreak in West Africa*, author Constantine N. Nana attempts to better understand the outbreak and answer the question: why? Through meticulous research, combing through misleading media reports and equivocal academic papers, Nana takes a close look at the chain of events. He raises a series of questions: Why were there Ebola experts in the region shortly before the outbreak? Why did the Sierra Leonean government order a research institution to stop Ebola testing during the outbreak? Why did the United States government decline to renew funding for one of the research programs during the crisis? Why did one of the key researchers state that the epidemic may have been caused by a contaminated needle? Did the initial outbreak really originate with a two-year-old child in an isolated area? In *The Ebola Outbreak in West Africa*, Nana challenges standard explanations of the virus origins and demonstrates that many questions remain unanswered.

[A Course on Integration Theory](#) May 02 2020 This textbook provides a detailed treatment of abstract integration theory, construction of the Lebesgue measure via the

Riesz-Markov Theorem and also via the Carathéodory Theorem. It also includes some elementary properties of Hausdorff measures as well as the basic properties of spaces of integrable functions and standard theorems on integrals depending on a parameter. Integration on a product space, change of variables formulas as well as the construction and study of classical Cantor sets are treated in detail. Classical convolution inequalities, such as Young's inequality and Hardy-Littlewood-Sobolev inequality are proven. The Radon-Nikodym theorem, notions of harmonic analysis, classical inequalities and interpolation theorems, including Marcinkiewicz's theorem, the definition of Lebesgue points and Lebesgue differentiation theorem are further topics included. A detailed appendix provides the reader with various elements of elementary mathematics, such as a discussion around the calculation of antiderivatives or the Gamma function. The appendix also provides more advanced material such as some basic properties of cardinals and ordinals which are useful in the study of measurability.?

Information Systems for Emergency Management Feb 29 2020 This book provides the most current and comprehensive overview available today of the critical role of

information systems in emergency response and preparedness. It includes contributions from leading scholars, practitioners, and industry researchers, and covers all phases of disaster management - mitigation, preparedness, response, and recovery. 'Foundational' chapters provide a design framework and review ethical issues. 'Context' chapters describe the characteristics of individuals and organizations in which EMIS are designed and studied. 'Case Study' chapters include systems for distributed microbiology laboratory diagnostics to detect possible epidemics or bioterrorism, humanitarian MIS, and response coordination systems. 'Systems Design and Technology' chapters cover simulation, geocollaborative systems, global disaster impact analysis, and environmental risk analysis. Throughout the book, the editors and contributors give special emphasis to the importance of assessing the practical usefulness of new information systems for supporting emergency preparedness and response, rather than drawing conclusions from a theoretical understanding of the potential benefits of new technologies.

The answers to the workbook questions are in the teacher's resource.

Corporate Social Responsibility and Governance Aug 24 2019 This book deals with the role of international standards for corporate governance in the context of corporate social responsibility. Based on the fundamentals of moral theory, the book examines governance and CSR in general, addressing questions such as: Is "good governance" not affected by moral concerns? How do the principles and practices of CSR standards adhere to or conflict with insights from business ethics and moral theory? To what extent do the standards and governance models provide normative guidance? Do the standards and governance guidelines provide an adequate means of benchmarking and auditing? Are these standards a help or a hindrance to stakeholder engagement and transparency? The book provides insightful and thought-provoking answers to these and many other important questions concerning CSR standards, and offers a valuable resource for practitioners, academics and students at business schools and other institutions.

Servant Leadership, Social Entrepreneurship and the Will to Serve Mar 12 2021 This book brings together a number of important essays on the intersection of servant leadership and social entrepreneurship, examining them through a shared focus on 'the will to serve'. This combination bears out the insight that inspiring social and economic leaders are able to transform a conflictual human settlement into a collaborative and caring human community. The book seeks to answer the question of whether we can induce from their 'way of doing things' a model of civic entrepreneurship and leadership that can inspire people in profit, non-profit and public organizations. It also examines the extent to which the will to serve is compatible with the will to maximize profit or the will to gain economic, political or religious power. Furthermore, it asks how

far different spiritual traditions create different models and examples of servant leadership and social entrepreneurship. This book will be of interest to researchers working in the fields of business ethics, business spirituality and corporate social responsibility.

Intrinsic CSR and Competition Sep 25 2019 This edited book is at the intersection of the discussion on family-owned business, the CSR agenda and company competition in Europe. The authors contribute to the debates on corporate social responsibility by arguing that formal management systems are not the one-size-fits-all solution they are typically presented to be. Exploring alternative interpretations of the profile environmental management activities have in SMEs, the book evaluates the way in which cultural and ethical values are embedded in European SMEs in order to drive and orientate CSR successfully without following the mainstream 'systems' approach. It addresses several values of thought within the CSR debate such as intrinsic CSR, the role of virtue ethics and moral theory in corporate culture, environmental sustainability and vision-driven CSR. Focusing on a European perspective, the book heuristically explores an alternative model for the integration of CSR, innovation dynamics and economic success driven by intrinsic values rather than extrinsic post-decision rationalisations.

Responsible Corporate Governance Jul 16 2021 This book discusses the tasks and functions of corporate governance in the light of current challenges and the dynamics that arise from a broader approach to company management and the integration of corporate governance with corporate social responsibility (CSR) and sustainability. Addressing the corporate governance shortcomings that are believed to have contributed to the recent financial crisis, it explores the interplay between corporate governance and CSR, and includes examples of company practice to show how such changes affect the practices of shareholders, boards of directors and regulators. In particular, the book examines shareholders' activities, their different investment strategies, specific reporting expectations and the submission of proposals to the annual meeting. Further, for boards of directors it explores the need to revise their tasks

with respect to the criteria for executive appointments, their corporate strategy, performance measures and diversity recommendations, while for directors it provides recommendations to reconsider the structure of executive pay and performance incentives. Lastly, for regulators the book investigates the need to introduce new laws addressing, for instance, the need for integrated reporting, limiting the voice of short term oriented shareholders and providing guidelines for executive compensation.

The School Law Answer Manual: 2014-15 Florida Edition Oct 31 2022 Many school system stakeholders know that education legal matters are often dominated by

employees, students, and special education. Mr. Griffin has spent vast amounts of time addressing each of these areas; working directly with administrators on a daily basis has afforded Mr. Griffin the opportunity to master all ranges of the spectrum. Most importantly, Mr. Griffin has dedicated his career to giving educators the highest quality legal and practical advice to help them navigate the complex modern framework of laws that govern what they do on a day-to-day basis. Whether the legal issue involves a student, parent, teacher, staff, administrator, or a combination of all of them, Mr. Griffin has almost certainly addressed it. In fact, that is why he wrote this book. He knows, first hand, that it is desperately needed.

Neck and Neck to the White House Nov 27 2019 Close presidential elections in the United States are measured, evaluated and remembered primarily by simple statistics. One can easily find out, for example, how many states in the electoral college were won by each presidential candidate, and by how much. But to stop there is to miss the most dramatic parts of the political contests. Why were the votes so close? What issues split the electorate? Was it the behavior or the reputation of the candidates? This book answers these questions and more, identifying and examining 12 of the closest elections, from the 1796 battle between John Adams and Thomas Jefferson to the contested 2000 election between George W. Bush and Al Gore.
