Gender Inequalities in the Japanese Workplace and Employment Feb 29 2020
The in-depth analyses presented in this book have a dual focus: (1) Social mechanisms through which the gender wage gap, gender inequality in the attainment of managerial positions, and gender segregation of occupations are generated in Japan; and (2) Assessments of the effects of firms' gender-egalitarian personnel policies and work-life balance.

policies on the gender wage gap and the firms' productivity. In addition, this work reviews and discusses various economic and sociological theories of gender inequality and gender discrimination and considers their consistencies and inconsistencies with the results of the analysis of Japanese data. Furthermore, the book critically reviews and discusses the historical development of the Japanese employment system by juxtaposing rational and cultural explanations. This book is an English translation by the author of a book he first published in

Japanese in 2017. The original Japanese-language edition received two major book awards in Japan. One was The Nikkei Economic Book Culture Award, which is given every year by the Nikkei Newspaper Company and the Japan Economic Research Center to a few best books on economy and society. The other was The Showa University's Women's Culture Research Award, which is bestowed annually on a single book of research that promotes gender equality. Kazuo Yamaguchi is the Ralph Lewis Professor of Sociology at the University of Chicago.

Communications
May 14 2021

Global mobile satellite communications

(GMSC) are specific satellite communication

systems for maritime, land and aeronautical

applications. It enables connections between moving

objects such as ships, vehicles and aircrafts, and telecommunications

subscribers through the medium of communications

satellites, ground earth stations, PTT or other landline

telecommunications providers. Mobile satellite

communications and technology

have been in use for over two decades.

Its initial application is aimed at the maritime market for

commercial and distress

applications. In recent years, new

developments and initiatives have

resulted in land and aeronautical

applications and the introduction of new

satellite constellations in non-geostationary

orbits such as Little and Big LEO

configurations and hybrid satellite

constellations as Ellipso Borealis and

Concordia system. This book is

important for modern shipping, truck, train and

aeronautical societies because GMSC in the

present

provides more effective business and trade, with emphasis on safety and commercial communications. Global Mobile Satellite Communications is written to make bridges between potential readers and current GMSC trends, mobile system concepts and network architecture using a

simple mode of style with understandable technical information, characteristics, graphicons, illustrations and mathematics equations. Global Mobile Satellite Communications represents telecommunications technique and technology, which can be useful for all

technical staff on vessels at sea and rivers, on all types of land vehicles, on planes, on off shore constructions and for everyone possessing satellite communications handset phones.
