The first goal is to explore the difference between fairness and justice in language assessment. The authors distinguish internal and external dimensions of the equitable and just treatment of individuals taking language tests which are used as gatekeeping devices to determine access to education and employment, immigrant status, citizenship, and other rights. The second goal is to show how the extent of test fairness can be demonstrated and improved using the tools of psychometrics, in particular the models collectively known as Rasch measurement. Dictating to the Mob Sep 25 2019 The BBC's Advisory Committee on Spoken English was set up to provide an authoritative guide to pronunciation and the use of language for BBC announcers. The results of its deliberations were published for general consumption in a series of pamphlets called Broadcast English. Based on primary sources, the compelling story of the Advisory Board during its crucial first 13 years is told here for the first time. It reveals how board members, including George Bernard Shaw and A. Lloyd James, soon discovered that standardization and regulation of spoken language is extremely challenging and highly controversial. The first two chapters describe the linguistic aspects of its work, particularly after it had taken on the role of standardizing spoken English, a task well beyond its mandate and the BBC Charter. The third and fourth chapters look at the challenges the Committee encountered in assuming their prescriptive role, the structural crisis which ensued, and the changes to linguistic policies which then followed. Chapter 5 and 6 document the final years of the Committee, explore the reasons for its failure in its role as guardian of 'properly' spoken English, and consider the legacy of the Committee in today's broadcasting. The book will appeal to linguists and historians generally, especially those interested in the English language and language policy.
