They Rest Not at Night May 10 2021 Every time Mark W. Merritt puts on the uniform of a US Naval Officer, he is reminded of how thankful he is to be an American. He began compiling his memories in 2008 while serving in Iraq, just after celebrating his fiftieth birthday in a combat zone. In his memoir, he offers a collection of lessons learned from his years in intelligence—through twenty-nine countries, frost bite, two hip replacements, cancer, three wars, five combat zones, eight marathons, multiple parachute jumps, three college degrees, and two black belts. He has been an author, high school hall-of-famer and collegiate NCAA athlete, mountain climber and kayaker, husband, son, brother, warrior, scholar, and gentleman. As a special operations intelligence officer, Merritt has always pushed to do more, but now he can step back and take in what he has accomplished. He has failed many times, but he has succeeded often, as well. Happiness no longer seems like an unobtainable goal. They Rest Not at Night offers both Merritt's personal life history with all its variety and an exploration of his intelligence experience, sharing his own commentary on the wisdom he has gained the hard way.

A Practitioner's Study May 22 2022 A Practitioner's Study: About Rope Rescue Rigging - Second Edition - This book is written as a study for practicing rope access and rescue technicians. This is not an entry level manual. For those of you who are thinking about entering the technical rescue field there are an endless number of high-quality instruction manuals on the market. Having said this, any book about rope rescue is merely a reference and should only be used by an apprentice in conjunction with a quality school of rescue and under the guidance of a seasoned lead instructor. The First Edition of this book was published in 2013. During these past seven years I have substantially modified and evolved my own rope access and rigging practices. To this point, I felt the need to publish this Second Edition to better reflect my current views on rescue rigging. Additionally, I have received numerous suggestions from those of you who purchased the First Edition. For this I am truly grateful, and I've tried to reflect these suggestions in this latest publication. The fact is that shared research and development is the most important aspect of our worldwide rescue community. Hopefully this book finds a place of positive influence within this time-honored trade of rope access and rescue. Thank you for your participation and support! Pat Rhodes

Learning to Sail Nov 04 2020 One of the best guides ever written for the novice sailor. Expert coverage of boat selection, mooring, knots, bending and hoisting sail, much more. 111 black-and-white figures.

Gender Threat Apr 28 2020 Against all evidence to the contrary, American men have come to believe that the world is tilted – economically, socially, politically – against them. A majority of men across the political spectrum feel that they face some amount of discrimination because of their sex. The authors of Gender Threat look at what reasoning lies behind their belief and how they respond to it. Many feel that there is a limited set of socially accepted ways for men to express their gender identity, and when circumstances make it difficult or impossible for them to do so, they search for another outlet to compensate. Sometimes these behaviors are socially positive, such as placing a greater emphasis on fatherhood, but other times they can be maladaptive, as in the case of increased sexual harassment at work. These trends have emerged, notably, since the Great Recession of 2008-09. Drawing on multiple data sources, the authors find that the specter of threats to their gender identity has important implications for men's behavior. Importantly, younger men are more

likely to turn to nontraditional compensatory behaviors, such as increased involvement in cooking, parenting, and community leadership, suggesting that the conception of masculinity is likely to change in the decades to come.

It Is Hoped That This Book Will Prove Itself Highly Useful To All Who Are Seriously Interested In Indian Writing In English.

Energy Research Abstracts Jun 18 2019

Studies in the Religious Life of Ancient and Medieval India Aug 21 2019 The Milinda Panha is, with good reason, a famous work of Buddhist literature, probably compiled in the first century B.C. It presents Buddhist doctrine in a very attractive and memorable form as a dialogue between a Bactrian Greek king, Milinda, who plays the `Devil`s Advocate` and a Buddhist sage, Nagasena. The topics covered include most of those questions commonly asked by Westerners such as If there is no soul, what is it that is reborn? and If there is no soul, who is talking to you now? This abridgement provides a concise presentation of this master-piece of Buddhist literature.

Studies in Science Education in the Asia-Pacific Region Feb 25 2020 Consistent with international trends, there is an active pursuit of more engaging science education in the Asia-Pacific region. The aim of this book is to bring together some examples of research being undertaken at a range of levels, from studies of curriculum and assessment tools, to classroom case studies, and investigations into models of teacher professional learning and development. While neither a comprehensive nor definitive representation of the work that is being carried out in the region, the contributions—from China, Hong Kong, Taiwan, Korea, Japan, Singapore, Australia, and New Zealand—give a taste of some of the issues being explored, and the hopes that researchers have of positively influencing the types of science education experienced by school students. The purpose of this book is therefore to share contextual information related to science education in the Asia-Pacific region, as well as offering insights for conducting studies in this region and outlining possible questions for further investigation. In addition, we anticipate that the specific resources and strategies introduced in this book will provide a useful reference for curriculum developers and science educators when they design school science curricula and science both pre-service and in-service teacher education programmes. The first section of the book examines features of science learners and learning, and includes studies investigating the processes associated with science conceptual learning, scientific inquiry, model construction, and students' attitudes towards science. The second section focuses on teachers and teaching. It discusses some more innovative teaching approaches adopted in the region, including the use of group work, inquiry-based instruction, developing scientific literacy, and the use of questions and analogies. The third section reports on initiatives related to assessments and curriculum reform, including initiatives associated with school-based assessment, formative assessment strategies, and teacher support accompanying curriculum reform. The Open Access version of this book, available at <http://www.taylorfrancis.com/books/e/9781315717678>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

Handbook of Sports Studies Jul 20 2019 Now available in paperback, this vital handbook marks the development of sports studies as a major new discipline within the social sciences. Edited by the leading sociologist of sport, Eric Dunning, and Jay Coakley, author of the best selling textbook on sport in the USA, it both reflects and richly endorses this new found status. Key aspects of the Handbook include: an inventory of the principal achievements in the field; a guide to the chief conflicts and difficulties in the theory and research process; a rallying point for researchers who are established or new to the field, which sets the agenda for future developments; a resource book for teachers who wish to establish new curricula and develop courses and programmes in the area of sports studies. With an international and inter-disciplinary team of contributors the Handbook of Sports Studies is comprehensive in scope, relevant in content and far-reaching in its discussion of future prospect.
