Nigerian Languages, Literatures, Culture and Reforms Sep 25 2022 The papers in this volume were selected from the Silver Jubilee edition of the Annual Conference of the Linguistic Association of Nigerian (LAN) which was held at the Nigerian Educational Research and Development Council (NERDC), Abuja, Nigeria. The Silver Jubilee edition is dedicated to the father of Nigerian Linguistics, Professor Emeritus Ayo Bamgbose. Professor Emeritus Bamgbose was the first indigenous Professor of Linguistics in Nigeria, and the first black African to teach linguistics in any known university south of the Sahara. He was there from the very beginning, and together with co-operation of people such as the late Professor Kay Williamson, he nurtured Nigerian linguistics. He is not just a foremost Nigerian linguist, but also a most famous, respected, celebrated, distinguished, and cherished African linguist of all times. To be candid, Nigerian linguistics is synonymous with Professor Emeritus Bamgbose. In 58 well-written chapters by experts in their fields, the book covers aspects of Nigerian languages, linguistics, literatures and culture. The papers have not been categorized into sections; rather they flow, hence there is some overlapping in the arrangement. The book is an essential resource for all who are interested to learn about current trends in the study of languages, linguistics and related subject-matters in Nigeria.

[Convergence: English and Nigerian Languages](#) Aug 24 2022 The present volume, which is the 5th in the Nigerian Linguists Festschrift Series, is devoted to Professor Munzali A. Jibril, a celebrated icon in university administration, and an erudite Professor of English Linguistics. The title of this special

edition was specifically chosen to crown Professor Jibril's academic prowess in both English and indigenous Nigerian languages, and to mark and laud his official departure from active university lectureship. 72 assessed papers are included from the many submitted. Papers cover the main theme of the volume, i.e. the interaction between English and indigenous Nigerian languages, and there are a number of papers on other secular areas of linguistics such as: language and history, language planning and policy, language documentation, language engineering, lexicography, translation, gender studies, language acquisition, language teaching and learning, pragmatics, discourse and conversational analysis, and literature in English and African languages. There is also a rich section devoted to the major 'traditional' fields of linguistics - phonology, morphology, syntax and semantics.

Fire-Resistant Paper Dec 04 2020 Even in today's electronic information age, traditional paper is a multi-purpose product that continues to be indispensable to people's daily work and lives. While paper is a valued product, the paper industry contributes to environmental pollution and consumption of natural resources, and the organic substances out of which traditional paper is made render it highly flammable and easy to burn. This book introduces a new technology to develop environmentally friendly fire-resistant paper using highly flexible ultralong hydroxyapatite nanowires and discusses applications and potential for commercialization. Discusses characterization, properties, and synthesis of ultralong hydroxyapatite nanowires and compares them with cellulose fibers. Describes steps to design and create fire-resistant paper. Covers a variety of function-based fire-resistant paper, including antibacterial, magnetic, photoluminescent, among others. Examines a host of applications, such as paper for anti-counterfeiting, encryption and decryption, environmental, energy, and biomedical uses. Considers commercialization potential and future prospects. This book is aimed at materials scientists, chemical engineers, industrial chemists, and other researchers from across the scientific and engineering disciplines interested in the development of this exciting alternative to traditional paper.

Annual Reports Jul 23 2022 This book concentrates on ensuring that the 'corporate message' is communicated to stakeholders in a way that maximises the value of the annual report and outlines how this might best be achieved. It explains the importance not only of the quantitative (accounting) information but also the qualitative content such as the chairman's statement, directors' report, operating and financial review, explanatory notes and so on. Particular recognition is given to the legal, stock exchange and professional accounting requirements as well as to the increasingly important but more discretionary areas of content such as social, environmental and ethical reporting issues. Crucially, the book discusses the importance of electronic communication now that legislation allows companies to deliver information over the internet. On a practical level, the book

takes the reader through the procedures and processes in actually managing the preparation and production of the report. Both the practical and theoretical aspects of the book are placed in context by the use of relevant extracts taken from 'real-life' annual reports of major organisations. By using these authentic examples the book clearly highlights what works and what doesn't. Ensure that your company's annual reports conform to the highest standards of best practice. Don't waste the opportunity to deliver your message.
