photosynthesis wikipedia Aug 24 2022 photosynthesis is a process used by plants and other organisms to convert light energy into chemical
that through cellular respiration can later be released to fuel the organism s activities some of this chemical energy is stored in carbohydra
molecules such as sugars and starches which are synthesized from carbon dioxide and water hence the name
5 2 the light dependent reactions of photosynthesis May 21 2022 in the case of photosynthesis light energy is transformed into chemical energy
which autotrophs use to build carbohydrate molecules however autotrophs only use a specific component of sunlight figure 5 8 autotrophs
capture light energy from the sun converting it into chemical energy used to build food molecules credit modification
ncert solutions for class 11 biology chapter 13 photosynthesis Sep 25 2022 ncert solutions for class 11 biology chapter 13 photosynthesis in higher
plants aids students in understanding complex topics and in the preparation of board examinations as well as entrance examinations studyin
answers from ncert solutions helps students to check their own understanding of a specific topic assessing their analyzing capabilities which
help
