[The California Gold Rush](#) Apr 10 2021 In January of 1848, James Marshall discovered gold at Sutter's Mill in the foothills of the Nevada. For a year afterward, news of this discovery spread outward from California and started a mass migration to the gold fields. Thousands of people from the East Coast aspiring to start new lives in California financed their journey West on the assumption that they would be able to find wealth. Some were successful, many were not, but they all permanently changed the face of the American West. In this text, Mark Eifler examines the experiences of the miners, demonstrates how the gold rush affected the United States, and the development of California and the American West in the second half of the nineteenth century. This migration dramatically shaped transportation systems in the US, led to a more powerful federal role in the West, and brought about mining regulation that shaped the twentieth century. Primary sources from the era and web materials help readers comprehend what it was like for these nineteenth-century Americans who gambled everything on the pursuit of gold.

[Challenging Misrepresentations of Black Womanhood](#) Sep 22 2019 'Challenging Misrepresentations of Black Womanhood' investigates the stereotyping of Black womanhood and the larger sociological impact on Black women's self-perceptions. It details the historical and contemporary use of stereotypes against Black women and how Black women work to challenge and dispel false perceptions. The book highlights the role of racist ideas in the reproduction and promotion of stereotypes of Black femaleness in media, literature, film, intelligence and the perceptions of the general public. Contributors in this collection identify the racist and sexist ideologies that perpetuate misperceptions of Black womanhood and illuminate twenty-first-century stereotypical treatment of Black women such as Michelle Obama and Serena Williams, and explore topics such as comedic expressions of Black motherhood, representations of Black women in film, dramas and literature, and identity reclamation and self-determination. The five sections of the book provide a brief historical overview of the long-standing use of stereotypes used against Black women; explore the systematic attack on Black motherhood and how Black women use self-determination to thrive; investigate treatments of Black womanhood in media, television and literature; examine the impact of stereotyped frameworks used for deconstructing Black female public figures; and discuss self-affirmation and identity reclamation among African women. 'Challenging Misrepresentations of Black Womanhood' establishes the criteria with which to evaluate the role of stereotypes in the lives of Black females and, more specifically, its impact on their social and psychological well-being.

[The American-Style University at Large](#) Jul 21 2019 The American-Style University at Large: Transplants, Outposts, and the Globalization of Higher Education is an edited collection by Kathryn L. Kleypas and James McDougall that analyzes the recent history of American universities overseas as well as the emergence of American-style universities in Europe, Asia, and Africa. The collection examines the various ways that American models of higher learning have become instituted around the world and explore ways that new configurations help to define the university as a force that organizes, develops, and controls methods of education, knowledge, and culture.

[Christian Politics in Oceania](#) May 31 2020 The phrase "Christian politics" evokes two meanings: political relations between different denominations in one direction, and the contributions of Christian churches to debates about the governing of society. The contributors in this volume address Christian politics in both senses and argue that Christianity is always and inevitably political in the Pacific region. Drawing on ethnographic and historical research in Papua New Guinea, Solomon Islands, Vanuatu, and Fiji, the authors argue that Christianity and politics have redefined each other in much of Oceania in ways that make the two categories inseparable at the level of analysis. The individual chapters vividly illuminate the ways in which Christian politics operate across a wide scale, from interdenominational relations to national and global interconnections.

[Summary of John A. McDougall's The McDougall Program for Maximum Weight Loss](#) Aug 14 2021 Please note: This is a companion version & not the original book. Sample Book Insights: #1 All fats are equal, and will be stored as fat if you don't use them for energy.

oil is far worse for your body than sugar, as it is easily stored as fat and doesn't satisfy your hunger. #2 The McDougall Program for Maximum Weight Loss is a no-nonsense diet based on the latest scientific and medical evidence about nutrition and the human weight loss plan that does not leave you hungry or weak. You should expect to lose between six and fifteen pounds of weight, especially if you start out needing substantial weight loss. #3 The McDougall Program for Maximum Weight Loss is based on natural mechanisms, and it is safe and healthy. It can be followed for the rest of your life if you are willing to change your lifestyle. The main causes of overweight and illness in America are a rich, fat-laden diet and a sedentary lifestyle. These two factors alone place an overwhelming burden on the human body. If you believe that you are a failure because you cannot lose weight on the American diet, you are wrong.

[Dermal Absorption Models in Toxicology and Pharmacology](#) Dec 07 2019 Many experimental methods and mathematical modeling approaches rooted in disciplines outside of toxicology can be effectively applied to estimating dermal absorption. [Dermal Absorption Models in Toxicology and Pharmacology](#) explores current approaches and techniques that can be used to quantify dermal absorption endpoints useful in both toxicology and pharmacology. The book begins with a review of basic principles and the in vitro and in vivo experimental approaches available for assessing dermal absorption of drugs and chemicals. This is followed by coverage of in vitro and in silico models for quantitating percutaneous absorption and the applications of these techniques to the risk assessment of chemicals. The remainder of the book explores scenarios where the unique properties of the chemicals being studied or the matrix in which they are exposed must be considered and then wraps up with a comparative analysis of chemical permeability in human and animal skin. The books covering this subject are just too comprehensive and serve primarily as reference works. This book takes a different approach. Jim Riviere's editorial guidance ensures that the information is readable, accessible, authoritative, and concise, making it the go-to resource for familiarizing new researchers and students to the field and updating established scientists.

[Cultural Ergonomics](#) Oct 04 2020 Even when products and systems are highly localized, rarely is there one design suitable for a mono-cultural population of users. The products and systems created and used are cultural artifacts representing shared cultural values that characterize mental models that result from interactions with physical environments. Thus, culture is embedded and impacts which products are usable, accessible, useful, and safe. Products and systems that deviate from users' mental models may have serious consequences for users, ranging from minor annoyance to more serious consequences such as severe injury or death. Both a primer and a primer, [Cultural Ergonomics: Theory, Methods, and Applications](#) demonstrates how cultural ergonomics can be applied in both academic and practitioner contexts. It covers selection of theories, descriptions of research designs, methods to analyze the results, and strategies used to draw inferences and conclusions in a vast array of areas including occupational safety, global issues, emergency management, human-computer interaction, warnings and risk communications, and product design. Human factors/ergonomics, a discipline, is slowly integrating cultural ergonomics into efforts to explore human capabilities and limitations in the context of product evaluation. Edited by experts and containing contributions from pioneers in this area, this book provides examples and methods within a human factors framework. It provides systematic methods to apply what is learned from analysis of culture to the development, and evaluation of products and systems.

[Reducing Crime](#) Jul 01 2020 Based on extensive research initiated by the UK Home Office, *Reducing Crime* offers an objective analysis of the effectiveness of criminal justice interventions in the reduction of crime. Bringing together information about where, for whom, and at what cost these interventions are effective, the book examines alcohol prevention and drug treatment studies; courts, sentencing and probation interventions; and situational burglary and housing interventions. In addition to a cost/benefit analysis of each intervention, the book also discusses future research and policy directions.

[Quicklet on Christopher McDougall's Born to Run](#) Oct 16 2021 Quicklets: Learn More. Read Less. Born in 1962, Christopher McDougall

is an American author and journalist with a penchant for covering the odd or extreme in the world: Frenchmen who work on trees, fugitive Mexican pop stars, and endurance running. After graduating from Harvard, McDougall was hired by the Associated Press as their new Lisbon correspondent, despite lacking knowledge of both Portuguese and journalism. After leaving the AP, McDougall worked for a wide variety of publications, including Men's Health and New York Times Magazine. In their pages, he covered a wide breadth of subjects, from why America hasn't been hit by another terrorist attack since September 11 to "physiological oddities" like the benefits of old lumberjack saws or the Tarahumara tribe of near superhuman ultrarunners. First published in 2009, *Born to Run: A True Story of Modern Obsession* became a New York Times bestseller, staying on the list for four months and selling over 219,000 hardcover copies in its first year. A movie version of the book is reportedly in the works and directed by Peter Sarsgaard.

Summary of Dennis McDougall's Mother Ap Day 2022 Please note: This is a companion version & not the original book. Sample Book Insights: #1 The myth that motherhood is sacred and unconditional is, unfortunately, not true. Many mothers choose not to care for their children, and some even abandon them. #2 The most insidious of these petty villains are those who don't understand that looking the other way is a crime. They are the ones who refuse to intervene when they see a woman backhanding her baby in a supermarket or shrieking at a son or daughter for no apparent reason at all.

Jesse Owens Aug 02 2020 Relates the story of the Olympic champ who had a huge impact on how African Americans were perceived at home and around the world.

Chemical Migration and Food Contact Materials 11 2021 Food and beverages can be very aggressive chemical milieu and may interact strongly with materials that they touch. Whenever food is placed in contact with another substance, there is a risk that chemicals from the contact material may migrate into the food. These chemicals may be harmful if ingested in large quantities, or impart an off-odour to the food, negatively affecting food quality. Food packaging is the most obvious example of a food contact material. As the use of pre-packaged foods increases, so might the potential risk to consumers from the release of chemicals into the food product. This book reviews migration and food contact materials reviews the latest controls and research in this field and how they can be used to ensure food is safe to eat. Part one discusses the regulation and quality control of chemical migration into food. Part two reviews the latest research in areas such as exposure estimation and analysis of food contact materials. The final part contains specific chapters on major food contact materials and packaging types, such as recycled plastics, metals, paper and board, multi-layer packaging and intelligent packaging. Edited by its distinguished editors and international team of authors, *Chemical migration and food contact materials* is an essential reference for scientists and professionals in food packaging manufacture and food processing, as well as all those concerned with assessing the safety of food. Reviews worldwide regulation of food contact materials Includes the latest developments in the analysis of food contact materials. Looks in detail at different food contact materials

Buying Freedom Feb 20 2022 In this examination of the practical and ethical implications of slave redemption the authors deal with questions such as: Does redeeming slaves actually increase the demand for -and so the number of- slaves? And what about the cost? Is it far from clear that redemption will improve the material condition or increase the real freedom, of a slave?

Preliminary Release of Scientific Reports on the Acidic Drainage in the Animas River Watershed, San Juan County, Colorado Nov 19 2019

Teaching History Nov 05 2020 Against a background of controversy surrounding the teaching of history, this reader gathers the thoughts of the leading practitioners. The development of school history up to the national curriculum and beyond is traced, and the issues concerning history teachers today are examined. These issues include access to history, the definition of 'British' history in a multicultural society, gender and the place of history with the humanities. Progression and attainment are discussed as is the role of pupil's historical understanding, and practical approaches to teaching history to 11-18 level pupils are explored.

American Baptist Missionary Magazine and Missionary Intelligencer 7 2021 Volumes 7-77, 80-83 include 13th-83rd, 86th-89th annual report of the American Baptist missionary union.

Summary of Christopher McDougall's Natural Born Heroes 10 2022 Please note: This is a companion version & not the original book. Sample Book Insights: #1 The German commander on Crete, General Friedrich-Wilhelm Müller, had a difficult time explaining what happened to his fellow commander, General Heinrich Kreipe. Kreipe had been captured by a British raiding force and taken off to a POW camp. #2 The Butcher was suspicious that the general had been grabbed after he left the city, but his car was found only a twenty-minute drive away. Within that brief window, these mystery men executed an ambush, disarmed and subdued two prisoners, and smoked a pack of cigarettes.

The Chapter VII Powers of the United Nations Security Council 16 2022 This study provides a comprehensive analysis of the questions pertaining to the powers of the Security Council under Chapter VII of the Charter of the United Nations. In doing so, it starts from the premise that an analysis of the limitations to the powers of the Security Council and an analysis of judicial review of those powers by the ICJ, respectively, are inter-dependent. On the one hand, judicial review would only become relevant if and to the extent that the powers granted to the Security Council under Chapter VII of the Charter are subject to justiciable limitations. On the other hand, the relevance of any limitation to the powers of the Security Council would remain limited if it could not be enforced by judicial review. This inter-dependence is reflected by the fact that Chapters 2 and 3 focus on judicial review in advisory and contentious proceedings, respectively, whereas Chapters 4 to 9 examine the limits to the powers of the Security Council. The concluding chapter summarises the findings and illuminates how the respective limits to the Security Council's enforcement powers could be enforced by judicial review. It also explores an alternative mode of review of binding Security Council decisions that could complement judicial review by the ICJ, notably the right of states to reject illegal Security Council decisions as a 'right of last resort'. The space and attention devoted to the limits to the Security Council's enforcement powers reflects the second aim of this study, namely to provide new direction to this aspect of the study of the Security Council's powers under Chapter VII of the Charter. It does so by paying particular attention to the role of human rights law.

limiting the type of enforcement measures that the Security Council can resort to in order to maintain or restore international security.

[From Slave Trade to 'Legitimate' Commerce](#) **May 23 2022** This edited collection, written by eleven leading specialists, examines the nineteenth-century commercial transition in West Africa: the ending of the Atlantic slave trade and the development of alternative 'legitimate' trade, mainly in vegetable products. Approaching the subject from an African, rather than a European or American perspective, the case studies consider the effects of transition on the African societies involved. They offer significant insights into the history of pre-colonial Africa and the slave trade, the origins of European imperialism, and longer-term issues of economic development in Africa.

[Trading and Pricing Financial Derivatives](#) **Nov 17 2021** Trading and Pricing Financial Derivatives is an introduction to the world of futures, options, and swaps. Investors who are interested in deepening their knowledge of derivatives of all kinds will find this an invaluable resource. The book is also useful in a very applied course on derivative trading. The authors delve into the history of pricing; simple strategies of options trading; binomial tree valuation; Black-Scholes option valuation; option sensitivities; risk management and interest rate swaps in this immensely informative yet easy to comprehend work. Using their vast working knowledge of the financial markets at international investment banks and hedge funds since the late 1990s and teaching derivatives and interest rate courses at the Master's level, Patrick Boyle and Jesse McDougall put forth their knowledge and expertise in clearly explained and practical terms. This book does not presuppose advanced mathematical knowledge, though it is presented for completeness for those that may need it, and is designed for a general audience, suitable for beginners through to those with intermediate knowledge of the subject.

[Race, Racism and Psychology](#) **July 24 2022** This book offers a comprehensive overview of the ways in which Psychology has engaged with 'race' and racism issues since the late 19th century. It emphasizes the complexities and convolutions of the story and attempts to explore the subtleties and occasional paradoxes that have arisen as a result. This new edition updates the research contained in the previous edition and includes brand new chapters. These additional chapters draw attention to the importance of the South African Black Consciousness movement and 'Post-colonial' Psychology, explore recent additional historical research on the fears of 'hybridisation', contain new material on French colonial psychiatry, and discuss the awkward status of virtually all the language and terms currently used in the discussion of the topic. This important and controversial book has proved to be a vital text, both as a point of departure for further inquiries, and also as an essential reference tool. The additional up-to-date material included in this new edition makes the book a more valuable resource to those working in and studying psychology, and also for anyone concerned with the 'race' issue either professionally or personally.

[International Law and the Use of Force](#) **Aug 22 2019** When the United Nations Charter was adopted in 1945, states established a new 'paradigm' for regulating the recourse to armed force. In the years since then, however, significant developments have challenged this paradigm's validity, causing a 'paradigmatic shift'. International Law and the Use of Force traces this shift and explores its implications for contemporary international law and practice.
