Managing the Paralympics Aug 02 2020 This book critically examines the planning, management, and operations of the world's premier event for Para sport athletes. Noting a lack of research into how these games are planned and managed, the authors of this contributed volume discuss how the Paralympics are essentially different to the Olympics and what this means for their management. Managing the Paralympics explores how the organizers and connect stakeholders effectively organize and deliver the Paralympics, taking into account what has been learned from previous events. Including emergent models of best practice from event management, project management and management literature, the book gives an insight into the planning of one of the world's biggest sporting events and encompasses ten impairment types and multiple sport classes within sports.

Effective Learning in the Life Sciences Mar 09 2021 Effective Learning in the Life Sciences is intended to help ensure that each student achieves his or her true potential by learning how to solve problems creatively in laboratory, field, or other workplace setting. Each chapter describes state of the art approaches to learning and teaching and will include case studies, worked examples and a section that lists additional online and other resources. All of the chapters are written from the perspective both of students and academics and emphasize and embrace effective scientific methods throughout. This title also draws on experience from a major project conducted by the Centre for Bioscience, with a wide range of collaborators, designed to identify and implement creative teaching in bioscience laboratories and other settings. With a strong emphasis on students thinking for themselves and actively learning about their chosen subject Effective Learning in the Life Sciences provides an invaluable guide to making the university experience as effective as possible.

Evidence-Based Physical Examination Feb 08 2021 The first book to teach physical assessment techniques based on evidence and clinical relevance. Grounded in an empirical approach to history-taking and physical assessment techniques, this text for healthcare clinicians and students focuses on patient well-being and health promotion. Based on an analysis of current evidence, up-to-date guidelines, and best-practice recommendations. It underscores the evidence, acceptability, and clinical relevance behind physical assessment techniques. Evidence-Based Physical Examination offers the unique perspective of teaching both a holistic and a scientific approach to assessment. Chapters are consistently structured for ease of use and include anatomy and physiology, key history questions and considerations, physical examination, laboratory considerations, imaging considerations, evidence-based practice recommendations, and differential diagnoses related to normal and abnormal findings. Case studies, clinical pearls, and key takeaways aid retention, while abundant illustrations, photographic images, and videos demonstrate history-taking and assessment techniques. Instructor resources include PowerPoint slides, a test bank with multiple-choice questions and essay questions, and an image bank. This is the physical assessment text of the future. Key Features: Delivers the evidence, acceptability, and clinical relevance behind history-taking and assessment techniques Eschews "traditional" techniques that do not demonstrate evidence-based reliability Focuses on the most current clinical guidelines and recommendations from resources such as the U.S. Preventive Services Task Force Focuses on the modern technology for assessment Aids retention through case studies, clinical pearls, and key takeaways Demonstrates techniques with abundant illustrations, photographic images, and videos Includes robust instructor resources: PowerPoint slides, a test bank with multiple-choice questions and essay questions, and an image bank Purchase includes digital access for use on most mobile devices or computers

International Law on Tuna Fisheries Management Mar 21 2022 Tuna and tuna-like species are migrating over long distances and cross national and international boundaries. Therefore, international cooperation is required in order to ensure sustainable management of the fisheries targeting these species. The book deals with the international legal framework for the management. It focuses on the Regional Fisheries Management Organizations (RFMOs), concentrating particularly on fisheries management in the Western and Central Pacific Ocean regions. It aims at providing a broader understanding of the international legal framework and to examine whether or not this

framework enables tuna RFMOs and, in particular, the Western Central Pacific Fisheries Commission to manage their fisheries sustainably.

**Protected Area Governance and Management** One 28 2022 Protected Area Governance and Management presents a compendium of original text, case studies and examples from across the world, by drawing on the literature, and the knowledge and experience of those involved in protected areas. The book synthesises current knowledge and cutting-edge thinking from the diverse branches of practice and learning relevant to protected area governance and management. It is intended as an investment in the skills and competencies of people and consequently, the effective governance and management of protected areas for which they are responsible, now and into the future. The global success of the protected area concept lies in its shared vision to protect natural and cultural heritage for the long term and organisations such as International Union for the Conservation of Nature are a unifying force in this regard. Nonetheless, protected areas are a socio-political phenomenon and the ways that nations understand, govern and manage them is always open to contest and debate. The book aims to enlighten, educate and above all to challenge readers to think deeply about protected areas—their future and their past, as well as their present. The book has been compiled by 169 authors and deals with all aspects of protected area governance and management. It provides information to support capacity development training of protected area field officers, managers in charge and executive level managers.

Managing Airline Networks  
Nov 05 2020  
Managing Airline Networks: Design, Integration and Innovative Technologies is a fully comprehensive description of state-of-the-art network management practices at airlines.

Designed as a compendium on current practices and future trends in the field, the book offers an instructive guide through the complex world of non-linear production systems. Written by a renowned consultant and aviation expert, the book discusses the impact of network management on airline resource planning and performance, and examines the interplay between network management and adjacent functions. The book includes a practical case study and is enriched with academic perspectives. Discussing upcoming trends in the sector, the book provides an outlook on advanced technologies that may play a role in next-generation network management. Features include: a description of basic network types, performance indicators for profitable networks, efficient processes and success factors for network management, and common optimisation models and tools; descriptive overviews, supported by practical examples, and leading to a deep-dive case study; a section on trends in network management, outlining new demand forecasting models, 'big data' applications, machine learning and AI use cases, and alternative optimisation models for airlines. *Managing Airline Networks: Design, Integration and Innovative Technologies* is designed as a comprehensive compendium and is essential reading for both aviation practitioners and students of airline management.
