Disaster Recovery and Backup Solutions for IBM FileNet P8 Version

4.5.1 Systems Jun 02 2020 Many organizations require continuous operation of their mission-critical, IBM® FileNet P8® systems after a failure has occurred. Loss of system resources and services as a result of any failure can translate directly into lost customers and lost revenue. The goal, therefore, is to design and implement a FileNet P8 system that ensures continuous operation even after a failure happens. This IBM Redbooks® publication focuses on FileNet P8 Version 4.5.1 systems disaster recovery. The book covers strategies, preparation levels, site sizing, data replication, testing, and what to do during a disaster. Backup and restore planning is a critical aspect of a disaster recovery strategy. We discuss backup types and strategies. We also discuss alternative strategies such as rolling storage policies and IBM FlashCopy® capability. With the help of use cases and our lab testing environment, the book provides guidelines for setting up a FileNet P8 production environment and a standby FileNet P8 disaster recovery system. This book is intended for IT architects, IT specialists, project managers, and decision makers, who must identify the best disaster recovery strategies and integrate them into the FileNet P8 system design process.

The Matriarchs in Genesis Rabbah Apr 12 2021 Katie J.

Woolstenhulme considers the pertinent questions: Who were 'the matriarchs', and what did the rabbis think about them? Whilst scholarship on the role of women in the Bible and Rabbinic Judaism has increased, the authoritative group of women known as 'the matriarchs' has been neglected. This volume consequently focuses on the role and

status of the biblical matriarchs in Genesis Rabbah, the fifth century CE rabbinic commentary on Genesis. Woolstenhulme begins by discussing the nature of midrash and introducing Genesis Rabbah; before exploring the term 'the matriarchs' and its development through early exegetical literature, culminating in the emergence of two definitions of the term in Genesis Rabbah – 'the matriarchs' as the legitimate wives of Israel's patriarchs, and 'the matriarchs' as a reference to Jacob's four wives, who bore Israel's tribal ancestors. She then moves to discuss 'the matriarchal cycle' in Genesis Rabbah with its three stages of barrenness; motherhood; and succession. Finally, Woolstenhulme considers Genesis Rabbah's portrayal of the matriarchs as representatives of the female sex, exploring positive and negative rabbinic attitudes towards women with a focus on piety, prayer, praise, beauty and sexuality, and the matriarchs' exemplification of stereotypical, negative female traits. This volume concludes that for the ancient rabbis, the matriarchs were the historical mothers of Israel, bearing covenant sons, but also the present mothers of Israel, continuing to influence Jewish identity.

Laboratory Exercises for Sensory Evaluation Dec 29 2019 Laboratory exercises are a necessary part of science education. They enable students to better understand the principles discussed in lectures, and provide them with hands-on experience of the practical aspects of scientific research. The purpose of this book is to provide students and instructors with a time-tested set of lab exercises that illustrate the common sensory tests and/or sensory principles used in evaluation of foods, beverages and consumer products. The appendices will also include a set of simple problem sets that can be used to teach and reinforce basic statistical tests. Approximately twenty years ago the Sensory Evaluation Division

of the Institute of Food Technologists sponsored the preparation of a set of exercises titled “Guidelines for Laboratory Exercises for a Course in Sensory Evaluation of Foods,” edited by one of the co-authors (Heymann). This book will provide additional materials from the second author (Lawless), as well as other instructors, in a uniform format that can be easily adopted for course use. Most importantly, the lab exercises will complement the flagship textbook in the field, Sensory Evaluation of Foods: Principles and Practices, 2E, also by Lawless and Heymann and published by Springer. Possible course adoption of the main text along with the lab manual should enhance the sales of these materials.
