**The CCL Handbook of Coaching** Jul 01 2020 Coaching is vital to developing talent in organizations, and it is an essential capability of effective leaders. The CCL Handbook of Coaching is based on a philosophy of leadership development that the Center for Creative Leadership has honed over thirty years with rigorous research and with long, rich experience in the practice of leadership coaching. The book uses a coaching framework to give a compass to leaders who are called to coach as a means of building sustainability and boosting performance in their organizations. The book explores the special considerations that leader coaches need to account for when coaching across differences and in special circumstances, describes advanced coaching techniques, and examines the systemic issues that arise when coaching moves from a one-to-one relationship to a developmental culture that embraces entire organizations.

**Lessons from Charles** Feb 08 2021 Alone, depressed, hopeless, and unwanted—these were the emotions that defined me in the aftermath of divorce and death that had turned my world upside down. And then into my life bounced an abandoned little puppy, rescued from the shoulder of a busy interstate highway, where he had been thrown from a car. He looked like I felt: discarded and beat up by life. But from the moment he bounded through my front door, Charles began teaching me valuable lessons about life, recovery, and finding joy again. From his story, I began writing a new chapter of my own life, one of hope and restoration, healing and forgiveness, love and kindness. His lessons continued as new love bloomed and blossomed, and his story became our story. It is my hope that what Charles taught us will resonate with you, no matter where you are in this crazy journey we call life.

These powerful dispatches also challenge readers to consider complex questions found at the intersections of gender, race, socioeconomic status, and politics. A sampling of topics in the Handbook: · An organizational systems view of sex trafficking. · Vulnerability factors when women and girls are trafficked. · Men, boys, and LGBTQ: invisible victims of human trafficking. · Organized crime, gangs, and trafficking. · Human trafficking prevention efforts for kids (NEST). · Treating victims of human trafficking: core therapeutic tasks. · From Trafficked to Safe House (C-SAFE). The Handbook of Sex Trafficking will interest a wide professional audience, particularly mental health workers, legal professionals, and researchers in these and related fields. The current guide is designed to be easy to navigate and use, even for first-time group facilitators. Modules include the following: \*An overview and goals for the topic \*Recommended readings, materials and handouts \*Specific tips for facilitators and notes to guide each session \*Detailed agendas with suggested activities \*The guide gives group leaders all the information needed to facilitate a Pathways to Recovery group, including tips on how to adapt the sessions to meet specific needs. CONTENTS: Army Combat Fitness Test Training Guide Version 1.2 FIELD TESTING MANUAL Army Combat Fitness Test Version 1.4 Army Combat Fitness Test CALL NO. 18-37, September 2018 FM 7-22 ARMY PHYSICAL READINESS TRAINING, October 2012 IOC TESTING - ACFT EQUIPMENT LIST (1 X LANE REQUIREMENT) Version 1.1, 4 September 2018 ACFT Field Test Highlight Poster (Final) OVERVIEW: The Army will replace the Army Physical Fitness Test (APFT) with the Army Combat Fitness Test (ACFT) as the physical fitness test of record beginning in FY21. To accomplish this, the ACFT will be implemented in three phases. Phase 1 (Initial Operating Capability – IOC) includes a limited user Field Test with approximately 60 battalion-sized units from across all components of the Army. While the ACFT is backed by thorough scientific research and has undergone several revisions, there are still details that have not been finalized. The ACFT requires a testing site with a two-mile run course and a flat field space approximately 40 x 40 meters. The field space should be grass (well maintained and cut) or artificial turf that is generally flat and free of debris. While maintaining testing standards and requirements, commanders will make adjustments for local conditions when necessary. The start and finish point for the two-mile run course must be in close proximity to the Leg Tuck station. When test events are conducted indoors, the surface must be artificial turf only. Wood and rubberized surfaces are not authorized as they impact the speed of the Sprint-Drag-Carry. When environmental conditions prohibit outdoor testing, an indoor track may be used for the 2 Mile Run. The Test OIC or NCOIC are responsible to inspect and certify the site and determine the number of testing lanes. There should not be more than 4 Soldiers per testing group for the SPT, HRP, and SDC. The OIC or NCOIC must add additional lanes or move Soldiers to a later testing session to ensure no more than 4 Soldiers per testing group. Concerns related to Soldiers, graders, or commanders will be addressed prior to test day. The number of lanes varies by number of Soldiers testing. A 16-lane ACFT site will have the following: ACFT specific test equipment requirements: 16 hexagon/trap bars (60 pounds), each with a set of locking collars. While all NSN approved hexagon bars must weigh 60 pounds, there is always a small manufacturer's production tolerance. The approved weight tolerance for the hexagon bar is + 2 pounds (58-62 pounds). Weight tolerance for the hexagon bar and therefore the 3 Repetition Maximum Deadlift does not include the collars. An average hexagon bar collars weigh 2.0 pounds per pair and are considered incidental to the total weight of the MDL weight. Approximately 3,000 lbs. of bumper plates. 16 x 10 lb. medicine ball 16 x nylon sled with pull straps. 32 x 40 lb. kettle bells. Permanent or mobile pull up bars (16 x pull-up bars at approximately 7.5 feet off the ground with, step-ups for shorter Soldiers). Common unit equipment for set-up and grading: 16 stop watches. 8 x 25m tape measures. 8 x wooden or PVC marking sticks for the SPT. One stick for every two lanes. 70 x 18" traffic cones. 50 field / dome cones. A soft, flat, dry test area approximately 40m x 40m on grass or artificial turf (half of a soccer or football field). A site that is free of any significant hazards. A preparation area (can be same as briefing area) to conduct Preparation Drill. A generally flat, measured running course with a solid, improved surface that is not more than 3 percent uphill grade and has no overall decline (start and finish must be at the same altitude).

**Enterprise Cybersecurity Study Guide Jul 13 2021** Use the methodology in this study guide to design, manage, and operate a balanced enterprise cybersecurity program that is pragmatic and realistic in the face of resource constraints and other real-world limitations. This guide is an instructional companion to the book Enterprise Cybersecurity: How to Build a Successful Cyberdefense Program Against Advanced Threats. The study guide will help you understand the book's ideas and put them to work. The guide can be used for self-study or in the classroom. Enterprise cybersecurity is about implementing a cyberdefense program that will succeed in defending against real-world attacks. While we often know what should be done, the resources to do it often are not sufficient. The reality is that the Cybersecurity Conundrum—what the defenders request, what the frameworks specify, and what the budget allows versus what the attackers exploit—gets in the way of what needs to be done. Cyberattacks in the headlines affecting millions of people show that this conundrum fails more often than we would prefer. Cybersecurity professionals want to implement more than what control frameworks specify, and more than what the budget allows. Ironically, another challenge is that even when defenders get everything that they want, clever attackers are extremely effective at finding and exploiting the gaps in those defenses, regardless of their comprehensiveness. Therefore, the cybersecurity challenge is to spend the available budget on the right protections, so that real-world attacks can be thwarted without breaking the bank. People involved in or interested in successful enterprise cybersecurity can use this study guide to gain insight into a comprehensive framework for coordinating an entire enterprise cyberdefense program. What You'll Learn Know the methodology of targeted attacks and why they succeed Master the cybersecurity risk management process Understand why cybersecurity capabilities are the foundation of

What if Jesus actually meant for us to do the things he said? What if those who "believe in Jesus" really did value the things he valued? Would the church look different? Would your neighborhood stay the same? In *Think Red*, Larry Stoess takes a close look at the values, the vision, and the mission of Jesus, and then holds up a mirror for us to see if our communities look anything like Jesus. If we dare look in the mirror we may be inspired to leave behind our obsession with consumer-based religion and follow the way of Jesus. Those who do will be set free to imagine creative and whimsical expressions of community.

**Recovery Groups** Nov 05 2020 This book focuses on community self-help and support groups specifically in the context of recovery movements in addiction and mental health care. The idea of groups of recovering people meeting together may seem like a simple one and not one requiring much effort and thought; however, as this book will show, this is not the case. In *Recovery Groups: A Guide to Creating, Leading, and Working with Groups for Addictions and Mental Health Conditions* Linda Kurtz breaks down the recovery movement for addictions and mental health care into three sections. In the first section recovery concepts are broken down into two fields: how they differ and how they come together. The second section focuses on methods of working with independent self-help groups and leadership in support groups. Kurtz touches on the study of helping mechanisms, social climate, group teachings, group structure, and how to use each of these to improve group performance. In the third section of the book, Kurtz examines social and community actions from members involved in Twelve-Step fellowships and consumer survivor organizations. The final section also details programs that provide employment, housing, and mutual support, explaining how to accomplish these goals without a large expense. This book will be useful to students, professional mental health and addiction workers, recovery coaches and peer support specialists, and group members and leaders who are interested in this topic.
