Neoliberalism, Globalization, and "Elite" Education in China Jan 28 2020 This book examines the practices and effects of emerging international curriculum programs established by Chinese elite public high schools and supported by China's New Curriculum Reform and the Chinese-Foreign Cooperation in Running Schools (CFCRS) policy. Drawing on critical theory, the book applies sociological and anthropological approaches to the study of the educational practices of such curriculum programs and the rising Chinese elite class, as well as educational policy globally. Through analyzing a wide variety of data sources, this book focuses on examining how changing local and global contexts have influenced and shaped the educational opportunities, experiences, and aspirations of privileged urban Chinese students who are able to attend these programs and who hope to study at U.S. universities. In doing so, the book is intended to define the problematics of the internationalization of Chinese education and an emergent form of elite education in China, which are complex and embedded in the process of modernization in China. Neoliberalism, Globalization, and "Elite" Education in China: Becoming International will appeal to undergraduates, postgraduates, and academics in the fields of curriculum studies, educational policy studies, sociology of education, and anthropology of education, as well as policymakers with an interest in globalization and education, education policy, and education and international development.

Learn the Secret to Success! After nearly 20 years of teaching Lewis Morris discovered a startling fact: Most students didn't struggle with the subject, they struggled with the language. It was never about brains or ability. His students simply didn't have the knowledge of the specific language needed to succeed. Through experimentation and research, he discovered that for any subject there was a list of essential words, that, when mastered, unlocked a student's ability to progress in the subject. Lewis called this set of vocabulary the "Insider's Words". When he applied these "Insider's Words" the results were incredible. His students began to learn with ease. He was on his way to developing the landmark series of workbooks and applications to teach this "Insider's Language" to students around the world.

A Close Look at Close Reading Sep 05 2020 The Common Core State Standards have put close reading in the spotlight as never before. While middle and high school teachers want and need students to connect with, analyze, and learn from both literary and informational texts, many are unsure how to foster the skills students must have in order to develop deep and nuanced understanding of complicated content. Is there a process to follow? How is close reading different from shared reading and other common literacy practices? How do you prepare students to have the ability to analyze complex texts measured by high-stakes assessments? And how do you fit close reading instruction and experiences into an already crowded curriculum? Literacy experts Barbara Moss, Diane Lapp, Maria Grant, and Kelly Johnson answer these questions and more as they explain how to teach middle and high school students to be close readers, how to make close reading a habit of practice across the content areas, and why doing so will build content knowledge. Informed by the authors' extensive field experience and enriched by dozens of real-life scenarios and downloadable tools and templates, this book explores • Text complexity and how to determine if a particular text is right for your learning purposes and your students. • The process and purpose of close reading, with an emphasis on its role in developing the 21st century thinking, speaking, and writing skills essential for academic communication and college and career readiness. • How to plan, teach, and manage close reading sessions across the academic disciplines, including the kinds of questions to ask, texts to use, and supports to provide. • How to assess close reading and help all students—regardless of linguistic, cultural, or academic background—connect deeply with what they read and derive meaning from complex texts. Equipping students with the tools and process of close reading sets them on the road to becoming analytical and critical thinkers—and empowered and independent learners. In this comprehensive resource, you'll find everything you need to start their journey.
