**Planning and Using Time in the Foundation Stage** Apr 30 2020 Operating on two levels, this book aims to help students and practitioners understand how to plan and use time effectively within the foundation stage setting. The book examines how children learn and play at different times of day, how they function when they might be tired or hungry and how best to organize the learning day with this in mind. The authors discuss the issue of environment, how children relate to different areas within their own room, and what happens when routines of time and place are altered. The book also discusses how to develop children's understanding of time and how to incorporate the theme of time into children's play. The book includes: practical activities and examples that will allow children to fully comprehend the concept of time; advice on how to create time for children to learn through play, inquiry and investigation; sections on how time can be used to include parents, colleagues and the local community. This book provides in-depth analysis of how effective use of time can be beneficial for parents, children and staff in early years setting.

Generation Z Sep 04 2020 This book argues that the mythic figure of the zombie, so prevalent and powerful in contemporary culture, provides the opportunity to explore certain social models – such as ‘childhood’ and ‘school’, ‘class’ and ‘family’ – that so deeply underpin educational policy and practice as to be rendered invisible. It brings together authors from a range of disciplines to use contemporary zombie typologies – slave, undead, contagion – to examine the responsiveness of everyday practices of schooling such as literacy, curriculum and pedagogy to the new contexts in which children and young people develop their identities, attitudes to learning, and engage with the many publics that make up their everyday worlds.

**Massive Open Online Courses and Higher Education** Oct 05 2020 Since the first MOOC was launched at the University of Manitoba in 2008, this new form of the massification of higher education has been a rollercoaster ride for the university sector. The New York Times famously declared 2012 to be the year of the MOOC. However, by 2014, the number of academic leaders who believed the model was unsustainable doubled to more than 50%. While the MOOC hype has somewhat subsided, the attitudes and anxieties of this peak time can still be seen influencing universities and their administrations. This is the first volume that addresses Massive Open Online Courses from a post-MOOC perspective. We move beyond the initial hype and revolutionary promises of the peak-MOOC period and take a sober look at what endures in an area that is still rapidly growing, albeit without the headlines. This book explores the future of the MOOC in higher education by examining what went right, what went wrong and where to next for the massification of higher education and online learning and teaching. The chapters in this collection address these questions from a wide variety of different backgrounds, methodologies and regional perspectives. They explore learner experiences, the move towards course for credit, innovative design, transformations and implications of the MOOC in turn. This book is valuable reading for students and academics interested in education, eLearning, globalisation and information services.

**Medicines Management in Adult Nursing** Jun 13 2021 Correct medicines management for adults is a crucial skill that adult nursing students must develop in order to provide safe care to their patients. This book specifically supports pre-registration students in meeting the required competencies for medicines management needed to pass formal assessment and qualify as an adult nurse. It is clearly structured around the NMC Essential Skills Clusters for medicines management, covering legal aspects, drugs calculations, administration, storage, record keeping, introductory pharmacology, patient communication and contextual issues in medication. The book is written in user-friendly language and uses patient scenarios to explain concepts and apply theory to practice.
