Strategic Management Jun 02 2020 The 9th edition of Strategic Management offers comprehensive coverage of all the core areas of business strategy with a strong global perspective. Key features: Balanced coverage of prescriptive and emergent models of strategic management. Application of strategic theory to new areas including technology and innovation strategy, sustainability and green strategy, entrepreneurial strategy and public sector strategy. Major revisions to chapters on Strategic Purpose, Knowledge and Networks, Theories of Entrepreneurship and International and Global Strategy in line with key developments. 20 brand new cases and updated case material throughout exploring the shifting economic fortunes of companies around the world, the rise of developing nations and rapid changes in communications and technology including the impact of the Corona virus. Range of tools within the book and online to support your learning including key strategic principles, strategic project ideas, critical reflections, questions and further reading. Richard Lynch

is Emeritus Professor of Strategic Management at Middlesex University, London. Quarterly Review of Distance Education Mar 24 2022 The Quarterly Review of Distance Education is a rigorously refereed journal publishing articles, research briefs, reviews, and editorials dealing with the theories, research, and practices of distance education. The Quarterly Review publishes articles that utilize various methodologies that permit generalizable results which help guide the practice of the field of distance education in the public and private sectors. The Quarterly Review publishes full-length manuscripts as well as research briefs, editorials, reviews of programs and scholarly works, and columns. The Quarterly Review defines distance education as institutionally-based formal education in which the learning group is separated and interactive technologies are used to unite the learning group.

Free Electron Lasers Feb 08 2021 Free Electron Lasers consists of 10 chapters, which refer to fundamentals and design of various free electron laser systems, from the infrared to the xuv wavelength regimes. In addition to making a comparison with conventional lasers, a couple of special topics concerning near-field and cavity electrodynamics, compact and table-top arrangements and strong radiation induced exotic states of matter are analyzed as well. The control and diagnostics of such devices and radiation safety issues are also discussed. Free Electron Lasers provides a selection of research results on these special sources of radiation, concerning basic principles, applications and some interesting new ideas of current interest.

Scientometrics May 26 2022 Technological change is one of the greatest issues in the modern world. As the world faces societal challenges, e.g., climate challenges, aging problem, and energy security, technology will contribute to new or better solutions for those problems. New technologies take time to develop and mature; moreover, they tend to be born in the gaps of multiple technology fields; therefore, early detection of emerging technological concepts across multiple disciplines will be a very important issue. Our goal seeks to develop automated methods that aid in the systematic, continuous, and comprehensive assessment of technological emergence using one of the major foresight exercises, scientometrics. There is now a huge flood of scientific and technical information, especially scientific publications and patent information. Using the information patterns of emergence for technological concepts has been discovered and theories of technical emergence have been also developed in several years. We have been developing visualization tools in which thousands of technical areas have been interacted with each other and evolved

in time. Several indicators of technical emergence have been improved by universities, international organizations, and funding agencies. This book intends to provide readers with a comprehensive overview of the current state of the art in scientometrics that focuses on the systematic, continuous, and comprehensive assessment of technological emergence.

Evangelical Review of Theology, Volume 45, Number 2, May 2021 Feb 20 2022

ERT publishes quality articles and book reviews from around the world (both original and reprinted) from an evangelical perspective, reflecting global evangelical scholarship for the purpose of discerning the obedience of faith, and of relevance and importance to its international readership of theologians, educators, church leaders, missionaries, administrators and students. The journal is published as a ministry rather than as a commercial project, seeking to be of service to the worldwide spread of the gospel and the building up of the church and its leadership, in co-ordination with the World Evangelical Alliance's broader mission and activities.
