OECD Economic Surveys: Japan 2017 May 12 2021 Economic growth has picked up since Abenomics was launched in 2013, and so has job creation. However, Japan faces serious demographic headwinds, as its population is projected to decline by a quarter over 2015-50, with the share over age 65 rising from 26% to almost 40%. Firms already face labour shortages. Population ageing also puts upward pressure on government spending. Gross government debt, which has risen to 219% of GDP, the highest ever recorded in the OECD area, continues to rise. Labour productivity is about a quarter below the top half of OECD countries despite Japan's high levels of human capital, R&D and business investment. Slowing productivity growth has been accompanied by increased income inequality and relative poverty. Gender gaps in employment and wages are relatively large. This Economic Survey of Japan assesses the country's recent macroeconomic performance and prospects, and offers recommendations to boost productivity and foster more inclusive growth. In particular, the expanding gap between leading and lagging firms should be narrowed by promoting business sector dynamism and entrepreneurship. Breaking down labour market dualism is a priority to bring about inclusive growth and raise productivity. Faster productivity and output growth, accompanied by measures to limit public spending growth and gradually increase government revenue, would help ensure fiscal sustainability. SPECIAL FEATURES: PRODUCTIVITY FOR INCLUSIVE GROWTH; FISCAL SUSTAINABILITY

The Handbook of White-Collar Crime Apr 30 2020 A comprehensive and state-of-the-art overview from internationally-recognized experts on white-collar crime covering a broad range of topics from many perspectives Law enforcement professionals and criminal justice scholars have debated the most appropriate definition of "white-collar crime" ever since Edwin Sutherland first coined the phrase in his speech to the American Sociological Society in 1939. The conceptual ambiguity surrounding the term has challenged efforts to construct a body of science that meaningfully informs policy and theory. The Handbook of White-Collar Crime is a unique re-framing of traditional discussions that discusses common topics of white-collar crime—who the offenders are, who the victims are, how these crimes are punished, theoretical explanations—while exploring how the choice of one definition over another affects research and scholarship on the subject. Providing a one-volume overview of research on white-collar crime, this book presents diverse perspectives from an international team of both established and newer scholars that review theory, policy, and empirical work on a broad range of topics. Chapters explore the extent and cost of white-collar crimes, individual- as well as organizational- and macro-level theories of crime, law enforcement roles in prevention and intervention, crimes in Africa and South America, the influence of technology and globalization, and more. This important resource: Explores diverse implications for future theory, policy, and research on current and emerging issues in the field Clarifies distinct characteristics of specific types of offences within the general archetype of white-collar crime Includes chapters written by researchers from countries commonly underrepresented in the field Examines the real-world impact of ambiguous definitions of white-collar crime on prevention, investigation, and punishment Offers critical examination of how definitional decisions steer the direction of criminological scholarship Accessible to readers at the undergraduate level, yet equally relevant for experienced practitioners, academics, and researchers, The Handbook of White-Collar Crime is an innovative, substantial contribution to contemporary scholarship in the field.

Chinese-Japanese Competition and the East Asian Security Complex Jun 25 2022 This volume examines contemporary diplomatic, economic, and security competition between China and Japan in the Asia-Pacific region. The book outlines the role that Sino-Japanese competition plays in East Asian security, an area of study largely overlooked in contemporary writing on Asian security, which tends to focus on US-China relations and/or US hegemony in Asia. The volume focuses on Chinese and Japanese foreign policy under President Xi Jinping and Prime Minister Shinzō Abe, and regional security dynamics within and between Asian states/institutions since 2012. It employs regional security complex theory as a theoretical framework to view Chinese and Japanese competition in the Asian region. In doing so, the volume draws on a "levels of analysis" approach to demonstrate the value in looking at security in the Asia-Pacific from a regional rather than global perspective. The vast majority of existing research on the region's security tends to focus on great power relations and treats Asia as a sub-region within the larger global security architecture. In contrast, this volume shows how competition between the two largest Asian economies shapes East Asia's security environment and drives security priorities across Asia's sub-regions. As such, this collection provides an important contribution to discussion on security in Asia; one with potential to influence both political and military policy makers, security practitioners, and scholars. This book will be of much interest to students of Asian politics, regional security, diplomacy, and international relations.

Journal of International Students, 2018(4) Mar 22 2022 The Journal of International Students (JIS), an academic, interdisciplinary, and peer-reviewed publication (Print ISSN 2162-3104 & Online ISSN 2166-3750), publishes scholarly peer reviewed articles on international students in tertiary education, secondary education, and other educational settings that make significant contributions to research, policy, and practice in the internationalization of higher education.

Masculinity and Body Weight in Japan Aug 23 2019 Drawing on the concept of the somatic self, Castro-Vázquez explores how Japanese men think about, express and interpret their experiences concerning bodyweight control. Based on an extensive ethnographic investigation, this book offers a compelling analysis of male obesity and overweight in Japan from a symbolic interactionism perspective to delve into structure, meaning, practice and subjectivity underpinning the experiences of a group of middle-aged, Japanese men grappling with body weight control. Castro-Vázquez frames obesity and overweight within historical and current global and sociological debates that help to highlight the significance of the Japanese case. By drawing on evidence from different locations and contexts, he sustains a comparative perspective to extend and deepen the analysis. A valuable resource for scholars both of contemporary masculinity and of medical sociology, especially those with a particular interest in Japan.

Crustal Permeability Jul 02 2020 Permeability is the primary control on fluid flow in the Earth's crust and is key to a surprisingly wide range of geological processes, because it controls the advection of heat and solutes and the generation of anomalous pore pressures. The practical importance of permeability – and the potential for large, dynamic changes in permeability – is highlighted by ongoing issues associated with hydraulic fracturing for hydrocarbon production ("fracking"), enhanced geothermal systems, and geologic carbon sequestration. Although there are thousands of research papers on crustal permeability, this is the first book-length treatment. This book bridges the historical dichotomy between the hydrogeologic perspective of permeability as a static material property and the perspective of other Earth scientists who have long recognized permeability as a dynamic parameter that changes in response to tectonism, fluid production, and geochemical reactions.

Countering Coercion in Maritime Asia Jan 20 2022 In the past decade, tensions in Asia have risen as Beijing has become more assertive in maritime disputes with its neighbors and the United States. Although taking place below the threshold of direct military confrontation, China's assertiveness frequently involves coercive elements that put at risk existing rules and norms; physical control of disputed waters and territory; and the credibility of

U.S. security commitments. Regional leaders have expressed increasing alarm that such “gray zone” coercion threatens to destabilize the region by increasing the risk of conflict and undermining the rules-based order. Yet, the United States and its allies and partners have struggled to develop effective counters to China’s maritime coercion. This study reviews deterrence literature and nine case studies of coercion to develop recommendations for how the United States and its allies and partners could counter gray zone activity.

Energy Security Cooperation in Northeast Asia Apr 23 2022 Drawing on cutting-edge research from leading scholars, this book investigates state preferences for regime creation and assesses state capacity for executing these preferences in Northeast Asia’s energy domain, defined as the geographical area comprising the following countries: Russia, Mongolia, China, Japan, South Korea and North Korea. It examines questions pertaining to how states perceive the need and necessity for establishing a regime when it comes to the issue of energy and how much commitment they make to the effort in Northeast Asia. The book analyses the factors that shape each country’s fundamental energy interests in the region, how these interests impact their attitudes toward engaging the region on energy security and the way they carry out their regional engagement. Based on countries’ interests in promoting institutionalized regional energy cooperation and their capacity for forging that cooperation, the collection assesses each state’s role in contributing to an energy regime in Northeast Asia. It then concludes with a critique on the decade-plus quest for energy security cooperation in Northeast Asia and suggests ways forward for facilitating regional energy security cooperation. This book will be of great interest to scholars and students of environmental policy, energy policy, security studies, Asian studies and international relations.

Issues in Environmental Economics, Engineering, and Technology: 2013 Edition Sep 16 2021 Issues in Environmental Economics, Engineering, and Technology: 2013 Edition is a ScholarlyEditions™ book that delivers timely, authoritative, and comprehensive information about Environmental Economics. The editors have built Issues in Environmental Economics, Engineering, and Technology: 2013 Edition on the vast information databases of ScholarlyNews™. You can expect the information about Environmental Economics in this book to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Environmental Economics, Engineering, and Technology: 2013 Edition has been produced by the world’s leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. Food Identities at Home and on the Move Feb 27 2020 How does food restore the fragmented world of migrants and the displaced? What similar processes are involved in challenging, maintaining or reinforcing divisions between groups coexisting in the same living place? Food Identities at Home and on the Move examines how ‘home’ is negotiated around food in the current worldwide context of uncertainty, mobility and displacement. Drawing on empirical approaches to heritage, identity and migration studies, the contributors analyse the relationship between food and the various understandings of home and dwelling. With case studies on sushi around the world, food as heritage in the Afghan diaspora and Mexican foodways in Chicago, these chapters offer novel readings on the convergence of food and migration studies, the anthropology of space and place and the field of mobility by focusing on how entangled stories of food and home are put on display for constructing the present and imagining the future.

Basic Income in Japan Dec 19 2021 Basic Income in Japan is the first collective volume in English entirely devoted to the discussion of Japan’s potential for a basic income program in the context of the country’s changing welfare state. Vanderborght and Yamamori bring together over a dozen contributors to provide a general overview of the scholarly debate on universal and unconditional basic income, including a foreword by Ronald Dore. Drawing on empirical data on poverty and inequality as well as normative arguments, this balanced approach to a radical idea is essential reading for the study of contemporary Japan.

Japan’s Development Assistance Nov 18 2021 Once the world’s largest ODA provider, contemporary Japan seems much less visible in international development. However, this book demonstrates that Japan, with its own aid philosophy, experiences, and models of aid, has ample lessons to offer to the international community as the latter seeks new paradigms of development cooperation.

Shifting Power in Asia-Pacific? Jul 26 2022 This book investigates whether a power shift has taken place in the Asia-Pacific region since the end of the Cold War. By systematically examining the development of power dynamics in Asia-Pacific, it challenges the notion that a wealthier and militarily more powerful China is automatically turning the regional tides in its favour. With a special emphasis on Sino-US competition, the book explores the alleged linkage between the regional distribution of relevant material and immaterial capabilities, national power and the much-cited regional power shift. The book presents a novel concept for measuring power in international relations by outlining a composite index on aggregated power (CIAP) that includes 55 variables for 44 regional countries and covers a period of twenty years. Moreover, it develops a middle power theory that outlines the significance of middle powers in times of major power shifts. By addressing political, military and economic cooperation via a structured-focused comparison and by applying a comparative-historical analysis, the book analyses in depth the bilateral relations of six regional middle powers to Washington and Beijing.

Developing Drug Products in an Aging Society Nov 06 2020 This book aims to address the major aspects of future drug product development and therapy for older adults, giving practical guidance for the rational product and clinical development and prescribing of drug products to this ever growing segment of the population. With authors coming from key “aging” markets such as Europe, the USA, China and Japan, the book will provide valuable information for students, scientists, regulators, practitioners, and other healthcare professionals from academia, industry and regulatory bodies.

The Routledge Handbook of Environmental Economics in Asia Jun 13 2021 Problems of climate change, biodiversity and air pollution are clearly growing globally, but more particularly in Asia because of its economic importance and richness in nature. The increasing interest in environmental and resource economics applied in regions of Asia will make this book an outstanding resource to the existing literature, particularly in the fields of environmental and resource economics and the integration of applied content in traditional and agricultural development. At present there is no single handbook or text on the state of current knowledge in environmental economics in Asia or one which offers a comprehensive guide to students and academics on the subjects of environmental economics research. This book will help to fill the gap in the existing literature.

Examining Japan’s Lost Decades Oct 17 2021 This book examines five features of Japan’s ‘Lost Decades’: the speed of the economic decline in Japan compared to Japan’s earlier global prowess; a rapidly declining population; considerable political instability and failed reform attempts; shifting balances of power in the region and changing relations with Asian neighbouring nations; and the lingering legacy of World War Two. Addressing the question of why the decades were lost, this book offers 15 new perspectives ranging from economics to ideology and beyond. Investigating problems such as the risk-averse behaviour of Japan’s bureaucracy and the absence of strong political leadership, the authors analyse how the delay of ‘loss-cutting policies’ led to the 1997 financial crisis and a state of political gridlock where policymakers could not decide on firm strategies that would benefit national interests. To discuss the rebuilding of Japan, the authors argue that it is first essential to critically examine Japan’s ‘Lost Decades’ and this book offers a comprehensive overview of Japan’s recent 20 years of crisis. The book reveals that the ‘Lost Decades’ is not an issue unique to the Japanese context but has global relevance, and its study can provide important insights into challenges being faced in other mature economies. With chapters written by some of the world’s leading Japan specialists and chapters focusing on a variety of disciplines, this book will be of interest to students and scholars in the areas of Japan studies, Politics, International Relations, Security Studies, Government Policy and History.

Industrial Competitiveness and Design Evolution Aug 15 2021 This book integrates the concept of design into the existing framework of industrial performance, international trade and comparative advantage in trade and industrial phenomena, which increasingly have been affected by design characteristics of tradable goods. Design, capability and their evolution are introduced into current theories of trade to explain the reality of international trade in the early twenty-first century and the possibility of design-based comparative advantage is explored. Toward that end, the concepts of design, architecture, organizational capability and productivity are introduced, as are their interactions and evolution. The author starts from the fact that firms' selection of design locations precedes that of production locations and that a new product's initial production location is usually the same as its design location. In other words, design matters in explaining today's trade phenomena. Thus, this book analyzes product design and its evolution in the context of the comparative advantage theory. The author argues that the concept of Ricardo's comparative advantage must be reinterpreted in a more dynamic way than in the past, with changing labor input coefficients treated as variables and driven by international capability-building competition between factories. Some of the many topics dealt with in this volume include a capability-architecture view of industrial comparative advantage, a design-based view of manufacturing, the evolution of manufacturing capabilities, Ricardian comparative advantage with changing labor input coefficients, comparative design cost and selection of design locations and a design process model behind comparative design cost. In this way, the behaviors of factories, product development projects, firms, industries and national economies in today's global competition are described and analyzed in the most realistic way.

India's National Security Nov 25 2019 The global security environment in the last five years has been characterised by a state of 'no war, no peace' among major powers, resulting in a state of uncertainty about their national security objectives. For instance, the US has been concerned about the attitudes of Iran, Russia, North Korea, China, and others, and yet did not expect a direct military conflict with them. On the other hand, China has expanded its naval strategy from a mere 'off-shore defence' to 'open seas protection' and has called for both 'defence and offence' instead of merely 'territorial air defence', thereby indicating preparedness for the possibility of a military confrontation. The major powers have been thus groping for suitable responses to their threat perceptions. It is in this kind of a complex and confusing international environment that India, as a rising power, has been called upon to wade through its strategic partnerships with major powers and nurture friendships with various Asian and African countries. This sixteenth volume of India's National Security Annual Review offers indispensable information and evaluation on matters pertaining to national security. It undertakes a thorough analysis of the trends to provide a backdrop to India's engagement with various countries. The volume also discusses persisting threats from China and Pakistan. With contributions from experts from the fields of diplomacy, academia, and civil and military services, the book will be one of the most dependable sources of analyses for scholars of international relations, foreign policy, defence and strategic studies, and political science, and practitioners alike.

Management of Software Engineering Innovation in Japan Oct 29 2022 This book assesses the achievements of the software engineering discipline as represented by IT vendors in Japan in order to deepen understanding of the mechanisms of how software engineering capabilities relate to IT vendors' business performance and business environment from the perspective of innovation and engineering management. Based on the concepts of service science and science for society, the volume suggests how to improve the sophistication of services between the demand side, i.e., IT user companies, and the supply side, i.e., IT vendors, simultaneously. The author and his colleagues developed a structural model including innovational paths, such as service innovation, product innovation and process innovation, and a measurement model including the seven software engineering capabilities: deliverables, project management, quality assurance, process improvement, research and development, human resource development and customer contact. Then they designed research on software engineering excellence and administered it with the Japanese Ministry of Economy, Trade and Industry and Information-Technology Promotion Agency. Through statistical analyses of the results, they found that human resource development and R&D are significant fundamental conditions to improve the quality of the deliverables and that IT firms with high levels of deliverables, derived from high levels of human resource development, quality assurance, project management and process improvement, tend to sustain high profitability. In addition, they developed a measurement model based on Porter's five forces and Barney's resource-based view. A regression tree analysis suggested that manufacturer spin-off vendors tend to expand business with well-resourced R&D, whereas user spin-off vendors tend to depend heavily on parent company demand.

Collaborative Policing Mar 10 2021 "The chapters in this book reveal that police education, training, and practices are now closely tied to collaboration between police, academics, professional practitioners, and community agencies, and such collaboration is described and evaluated." Immigrant Japan Jul 22 2019 Immigrant Japan? Sounds like a contradiction, but as Gracia Liu-Farrer shows, millions of immigrants make their lives in Japan, dealing with the tensions between belonging and not belonging in this ethno-nationalist country. Why do people want to come to Japan? Where do immigrants with various resources and demographic profiles fit in the economic landscape? How do immigrants narrate belonging in an environment where they are "other" at a time when mobility is increasingly easy and belonging increasingly complex? Gracia Liu-Farrer illuminates the lives of these immigrants by bringing in sociological, geographical, and psychological theories—guiding the reader through life trajectories of migrants of diverse backgrounds while also going so far as to suggest that Japan is already an immigrant country.

Linguistic Tactics and Strategies of Marginalization in Japanese Jan 28 2020 This edited book brings together studies on different aspects of marginalization in Japanese, creating a framework for studying marginalization which can also be applied in other linguistic and international contexts. The chapters in this book look at both marginalization of others and self-marginalization, examining the pragmatic strategies used to achieve marginalization, and investigating situations where it acts as an agentive tactic of speakers, in addition to a strategy of broader social structures. This book will be of interest to students and scholars of sociolinguistics, pragmatics, linguistic anthropology, and East Asian languages and cultures.

Japan's new security partnerships Feb 09 2021 After decades of solely relying on the United States for its national security needs, over the last decade, Japan has begun to actively develop and deepen its security ties with a growing number of countries and actors in the Asia-Pacific region and Europe, a development that has further intensified under the Shinzo Abe administration. This is the first book that provides a comprehensive analysis of the motives and objectives from both the Japanese and the partner-countries' perspectives, and asks what this might mean for the security architecture in the Asia-Pacific region, and what lessons can be learned for security cooperation more broadly. This book is for those interested in Japan's security policy beyond the US-Japan security alliance, and non-US centred bilateral and multilateral security cooperation. It is an ideal textbook for undergraduate and graduate level courses on regional security cooperation and strategic partnerships, and Japanese foreign and security policy.

Serviceology for Services Oct 05 2020 Services are key activities in the globalization of the economy and also underlie the quality of life of local residents. The advanced work presented in this book was selected from the proceedings of the First International Conference on Serviceology (ICServ2013), held October 16–18, 2013 in Tokyo. This book provides a useful overall guide to the state of the art in theory and practice of services for

researchers in various fields, including engineering, marketing, economics, and others. This work also facilitates the scientific systematization of services and promotes technological developments for solutions of industrial issues.

Critical Issues in Contemporary Japan Aug 27 2022 This book provides undergraduate and graduate students with an interdisciplinary compendium written by a number of leading specialists on contemporary Japan. Chapters reflect the standards of rigorous scholarly work, but also exceed them in their accessibility of language and engagement with concerns relevant to non-specialists. The probing analysis of key debates and issues confronting Japan make this ideal for college courses and an essential reference work on Japan/Asia for libraries. This book encompasses a range of disciplines in the social sciences and thus will be useful for a variety of courses including Comparative Politics, Media Studies, Anthropology, Sociology, Asian Studies, International Relations, Public Policy, Healthcare, Education, Judicial Reform, Gender and Minority Studies. The strength of this volume is in the collective efforts of accomplished experts providing in-depth analysis and up-to-date comprehensive coverage of Japan in the 21st century. Students will gain the analytical insights and information necessary to assess the challenges that confront the Japanese people, policymakers and private and public sector institutions. Key issues covered in this volume include: * Rapidly Aging society * Changing Employment system * Energy policy-Nuclear and Renewable * Gender discrimination * Immigration * Ethnic minorities * Trade policy * Civil society * Rural Japan * Okinawa * Post-3.11 Tsunami, earthquake, nuclear meltdown developments * Internationalization * Sino-Japanese relations * East Asia's divisive history

Line of Advantage Dec 07 2020 No other country has devised a grand strategy for managing China's rising economic and military power as deliberately or successfully as Japan. Seeking to counter Chinese ambitions toward regional hegemony, Japan has taken an increasingly assertive role in East Asia and the world. During the tenure of Prime Minister Abe Shinzo, the country pursued closer security cooperation with the United States and other democracies, established a more centralized national defense system, and advanced rules and norms to preserve the open regional order in the Indo-Pacific that is crucial to its prosperity and survival—all while managing an important economic relationship with China. In *Line of Advantage*, Michael J. Green provides a groundbreaking and comprehensive account of Japan's strategic thinking under Abe. He explains the foundational logic and the worldview behind this approach, from key precedents in Japanese history to the specific economic, defense, and diplomatic priorities shaping contemporary policy toward China, the United States, the two Koreas, and the Indo-Pacific region. Drawing on two decades of access to Abe and other Japanese political, military, and business leaders, Green provides an insider's perspective on subjects such as how Japan pursued competition with China without losing the benefits of economic cooperation. Assessing the strengths and weaknesses of Japan's new active role, *Line of Advantage* sheds new light on a period with profound implications for the future of U.S. competition with China and international affairs in Asia more broadly.

Perceptions of East Asian and Asian North American Athletics Jan 08 2021 This book highlights inconsistencies within the field of sports scholarship and provides an opportunity to open up and extend conversations about the intersection of sports media and race particularly surrounding athletes of East Asian descent. Despite the growing influence of East Asian and Asian American/Canadian athletes, they are still underrepresented in Western media and in scholarship. This anthology adds much-needed literature to sports, popular culture, East Asian, and Asian American studies. The prominence of sports in global popular culture makes the intersections explored in this collection a crucial addition to existing conversations about both sports and East Asian/Asian American/Canadian studies.

Annual Report on the Development of the Indian Ocean Region (2018) Jul 14 2021 The report was written by senior scholars of international studies and Indian Ocean studies and focuses on international relations in Indian Ocean region and covers many aspects of "Indo-Pacific". The report includes both strategic review and major events and related data in this region. This book also includes the origin, the aims, frameworks and regional and global impact of "Indo-Pacific". The book includes the authors from 5 different institutes in China which provide readers with a full and authentic picture of "Indo-Pacific" most recent development. This year's Annual Report is the Sixth of this kind and the only one which covers exclusive on the Indian Ocean region in China.

Textbook of Cultural Psychiatry Oct 25 2019 The textbook offers comprehensive understanding of the impact of cultural factors and differences on mental illness and its treatment.

Intimate Rivals Apr 11 2021 No country feels China's rise more deeply than Japan. Through intricate case studies of visits by Japanese politicians to the Yasukuni Shrine, conflicts over the boundaries of economic zones in the East China Sea, concerns about food safety, and strategies of island defense, Sheila A. Smith explores the policy issues testing the Japanese government as it tries to navigate its relationship with an advancing China. Smith finds that Japan's interactions with China extend far beyond the negotiations between diplomats and include a broad array of social actors intent on influencing the Sino-Japanese relationship. Some of the tensions complicating Japan's encounters with China, such as those surrounding the Yasukuni Shrine or territorial disputes, have deep roots in the postwar era, and political advocates seeking a stronger Japanese state organize themselves around these causes. Other tensions manifest themselves during the institutional and regulatory reform of maritime boundary and food safety issues. Smith scrutinizes the role of the Japanese government in coping with contention as China's influence grows and Japanese citizens demand more protection. Underlying the government's efforts is Japan's insecurity about its own capacity for change and its waning status as the leading economy in Asia. For many, China's rise means Japan's decline, and Smith suggests how Japan can maintain its regional and global clout as confidence in its postwar diplomatic and security approach diminishes.

International Education Aid in Developing Asia Aug 03 2020 This book provides an Asian perspective on the timely, urgent questions of how international education aid and development should move forward and what development roles Asia should play, especially following the end of the UN Millennium Development Goals (MDGs) and Education for All (EFA) in 2015. To answer these questions, four separate but interwoven parts, which analyze and anchor education MDGs and EFA policies and practices by means of diverse case studies of donor states, recipient states, and states with a dual and transitional role in Asia, are addressed. On the basis of the analyses, a clearer and concrete direction for effectively and sustainably extending international education aid and development beyond 2015 can be derived.

Health in Japan Sep 23 2019 In the latter half of the 20th century, Japan developed into a thriving economy, and the Japanese remain one of the healthiest populations in the world to this day. However, in the past 25 years, low-growth, mounting debt, and rapid ageing have complicated this image, and global interest in the longevity and social cohesion of the Japanese populace is now greater than ever. Health in Japan brings together the perspectives and research of Japan's leading social epidemiologists in English for the first time, creating an enriching reading experience for both Japanese and international readers. With chapters on key topics such as Chronic Disease, Disasters and Health, and Mental Health and Wellbeing, this textbook offers a comprehensive examination of all major health issues facing the country. Focusing on the primary, upstream causes of health and disease, as well as novel evidence on the wider determinants of well-being and illness, this is a must-read for any public health professional or researcher with an interest in Japanese society, culture, and healthcare.

Identity Change and Foreign Policy Jun 01 2020 Identity has become an explicit focus of International Relations theory in the past two to three decades, with one case attracting and puzzling many early identity scholars: Japan. These constructivist scholars typically ascribed Japan a 'pacifist' or 'antimilitarist' identity – an identity which they believed was constructed through the adherence to 'peaceful norms' and 'antimilitarist culture'. Due to the alleged resilience of such adherences, little change in Japan's identity and its international relations was predicted. However, in recent years, Japan's foreign and security policies have begun to change, in spite of these seemingly stable norms and culture. This book seeks to address these changes through a pioneering engagement with recent developments in identity theory. In particular, most chapters theorize identity as a product of processes of differentiation. Through detailed case analysis, they argue that Japan's identity is produced and reproduced, but also transformed, through the drawing of boundaries between 'self' and 'other'. In particular, they stress the role of emotions and identity entrepreneurs as catalysts for identity change. With the current balance between resilience and change, contributors emphasize that more drastic foreign and security policy transformations might loom just beyond the horizon. This book was originally published as a special issue of *The Pacific Review*.

Asia's Alliance Triangle Mar 30 2020 Drawing together articles from the new online journal *The Asian Forum*, commissioned from leading experts in the USA, Japan, and South Korea, this book reconsiders what we thought we knew about the three legs of this alliance triangle.

Community Practices for Disaster Risk Reduction in Japan Sep 28 2022 This book presents key lessons from community-based risk-reduction practices in Japan, a country that is often hit by disasters and that also has shown strong resilience in coping with those disasters. Japan has a

strong governance system for disaster risk reduction. However, the Kobe earthquake of 1995 showed the importance of community involvement in disaster response as well as recovery. With several examples from different parts of Japan, the book elaborates on the importance of community-based risk reduction and the innovations required for sustaining some of the community approaches. The book has 13 chapters and is divided into three parts: (1) Evolution of community-based risk reduction in Japan; (2) Community-based risk-reduction issues; and (3) Case studies. The primary target groups for this book are students and researchers in the fields of environment, disaster risk reduction, and climate change studies. The book provides them with a good idea of the current research trends in the field and furnishes basic knowledge about these vital topics. Another target group comprises practitioners and policy makers, who will be able to apply the knowledge collected here to policy and decision-making.
