**Manufacturing Processes (As per the new Syllabus, B.Tech. I year of U.P. Technical University)** Aug 01 2020 About the Book: Manufacturing process has become important in the industrial environment to produce products for the service of mankind. The basic need is to provide theoretical and practical knowledge of manufacturing processes to all the engineering students. This book covers most of the syllabus of manufacturing processes for engineering classes prescribed by UPTU. At the end of each chapter, a number of questions have been provided for testing the students understanding about the concept of the subject. The whole text has been organized in 10 chapters. The first chapter presents the br.

**Corpora for University Language Teachers** Sep 21 2019 This volume is made up of 17 chapters which have developed out of papers and workshop sessions presented at the event entitled «Corpora: Seminar and Workshops», held at the University of Padua, March 29-31, 2007. It maintains the straightforward, practical approach which characterized that event, meant as an introduction to the use of corpora even for novices. At the same time it goes into a wide range of different applications for corpora in language teaching and language research in higher education. One of these involves the creation and use of learner corpora. Another application involves corpus-assisted research into political discourse in the media. Language for special purposes is also focussed on as a research topic, an academic discipline, and language to be translated. Multimodal corpora are also considered. Proposals are made for corpus-based research into the language of films, and into translation (and mediation) universals. A corpus-based study of text complexity in reading tests is also presented. Large-scale corpora commercially available are also discussed. An online module for translator training is presented, as is an Internet-accessible corpus of Old English poetry.

**Teaching First-Year College Students** Apr 21 2022 This book takes a comprehensive look at first-year library instruction from examining why first-year students struggle with academic assignments to exploring instruction roles at different institutions. It offers step-by-step guidance for planning, teaching, and assessing first-year students in and beyond the library instruction classroom.

**First-Year Composition** May 22 2022 First-Year Composition: From Theory to Practice’s combination of theory and practice provides readers an opportunity to hear twelve of the leading theorists in composition studies answer, in their own voices, the key question of what it is they hope to accomplish in a first-year composition course. In addition, these chapters, and the accompanying syllabi, provide rich insights into the classroom practices of these theorists.

**Teaching Formal Methods** Oct 03 2020 “Professional engineers can often be distinguished from other designers by the engineers’ ability to use mathematical models to describe and 1 analyze their products.” This observation by Parnas describes the de facto professional standards in all classical engineering disciplines (civil, mechanical, electrical, etc.). Unf- tunately, it is in sharp contrast with current (industrial) practice in software design, where mathematical models are hardly used at all, even by those who, 2 in Holloway’s words “aspire to be engineers.” The rare exceptions are certain critical applications, where mathematical techniques are used under the general name formal methods. Yet,thesamecharacteristicsthatmakeformalmethodsanecessityincritical applicationsmakethemalsoadvantageousineverydaysoftwaredesignatvarious levels from design e?ciency to software quality. Why, then, is education failing with respect to formal methods? – failing to convince students, academics and practitioners alike that formal methods are truly pragmatic; – failing to overcome a phobia of formality and mathematics; – failing to provide students with the basic skills and understanding required toadoptmoremathematicalandlogicalapproachtosoftwaredevelopment. Until education takes these failings seriously, formal methods will be an obscure byway in software engineering, which in turn will remain severely impoverished as a result.

**Teaching First-Year College Students** Sep 26 2022 Teaching First-Year College Students is a thoroughly expanded and updated edition of Teaching College Freshmen, which has become a classic in the field since it was published in 1991. The book offers concrete suggestions about specific strategies and approaches for faculty who teach first-year courses. The new edition is based on the most current research on teaching and learning and incorporates information about the demographic changes that have occurred in student populations since the first edition was published. The updated strategies are designed to help first-year students adjust effectively to both the academic and nonacademic pressures of college. The authors also help faculty understand first-year students and show how their experiences in high school have prepared3?4or not prepared3?4them for the world of higher education.

*A Humanizing Literary Pragmatics* Jul 12 2021 In much of his earlier work Roger D. Sell was shaping literary studies, historical perspectives, and pragmatics into a fluent interdisciplinarity. This enabled him to explore the fundamentally human relationships which develop between literary writers and those who respond to them. Literary writers, through their handling of deixis, evaluative and modal expressions, tellability, politeness norms, and genre expectations, activate the same interpersonal function of language as do other language users, and respondents’ hermeneutic contextualizations of literary texts are no less standard as a pragmatic procedure. Not that context is completely determinative. In Sell’s account, human beings are profoundly influenced by society, but can sometimes enter into co-adaptations with it. Like other people, literary writers and their respondents are “social individuals”, who themselves benefit from respecting each other’s relative autonomy. As well as explaining these theoretical positions, the papers selected here offered critical re-assessments of some major writers, including Chaucer and Dickens. They also suggested new ways of dealing with literary texts in literary and language education at all levels.

**What Now?** Jan 26 2020 An evaluation of a generation during a time of some economic turmoil, where jobs are not as easy to find as they once were and which poke fun at the situation while maintaining that it is also something that should not be overlooked or understated. The book follows many common situations which many recent graduates experience, from struggles of the monotony of earning a degree, to graduation, to talking to strangers who think that they should have studied a "better" subject, to loving that last slice of leftover pizza, to that parent and older generation who think they are just lazy, to interviews and job searches. What Now? is a humorous view of subject seldom engaged openly; a generation underemployed. Like Generation Y itself, this book can make fun of the situation, doesn’t take itself too seriously, and has its heart in the right place.

**Implementing Communities of Practice in Higher Education** Aug 25 2022 In this edited collection, the authors pick up the communities of practice (CoP) approach of sharing practice in their reflection on the experience of taking their CoP vision from a dream to reality. Their stories articulate the vision, the passion and the challenge of working within and/or changing existing institutional culture and practice. The book discusses strategies that worked and considers the lessons learnt to inspire future dreamers and schemers. The multiple perspectives provided in the case studies will assist higher education leaders, as well as academic and professional staff, in establishing or assessing CoPs. The book offers insights into implementation strategies, practical guidelines and ideas on how CoP theoretical underpinnings can be tailored to the higher education context.
