[Calculus for the Managerial, Life, and Social Sciences](#) Jan 10 2021 Author Soo Tang Tan knows that students majoring in business, management, economics, and the social and life sciences appreciate understanding how the math they are learning relates to their future careers. So Tan has filled this Fourth Edition of Calculus for the Managerial, Life and Social Sciences with a wealth of new applications and examples drawn from newspapers and magazines. It is this real-life, problem-solving approach that makes calculus easier to understand. Tan's concise, inviting writing style and the wide variety of helpful in-text learning features augments this text's user-friendly feel. Wherever possible the author uses an intuitive approach to present new mathematical concepts. Results are often presented informally--without compromising the mathematical content and accuracy--to help students understand new material.

Basic Concepts of Chemistry, Study Guide Jun 22 2019 This Third Edition, revised to provide smoother transitions between topics, employs a concise yet informal approach to basic chemistry, organized to help students employ basic math skills and problem-solving strategies. Writing style is straightforward, and presentation incorporates many concrete analogies to clarify new concepts. Includes many illustrative worked examples.

Introduction to Engineering Electromagnetics Nov 27 2019 This text provides students with the missing link that can help them master the basic principles of electromagnetics. The concept of vector fields is introduced by starting with clear definitions of position, distance, and base vectors. The symmetries of typical configurations are discussed in detail, including cylindrical, spherical, translational, and two-fold rotational symmetries. To avoid serious confusion between symbols with two indices, the text adopts a new notation: a letter with subscript 1-2 for the work done in moving a unit charge from point 2 to point 1, in which the subscript 1-2 mimics the difference in potentials, while the hyphen implies a sense of backward direction, from 2 to 1. This text includes 300 figures in which real data are drawn to scale. Many figures provide a three-dimensional view. Each subsection includes a number of examples that are solved by examining rigorous approaches in steps. Each subsection ends with straightforward exercises and answers through which students can check if they correctly understood the concepts. A total 350 of examples and exercises are provided. At the end of each section, review questions are inserted to point out key concepts and relations discussed in the section. They are given with hints referring to the related equations and figures. The book contains a total of 280 end-of-chapter problems.

The HM Learning and Study Skills Program Apr 24 2022 The hm Learning and Study Skills Program: Level II was designed to provide an introduction to learning and study skills for 8th, 9th, and 10th grade students through a series of activity-oriented units. It is structured on the assumption that an activity-oriented lesson is the most effective instructional strategy for the teaching of study skills: more succinctly, that "learning by doing" is the best way 'study smart'. The Level II Teacher's Guide includes a pretest, a wide variety of teaching suggestions, unit summaries, activities for retrieval and closure as well as teaching adaptations through the use of technology. It was published to help teachers assist students in the development of essential study skills and to reinforce their existing strategies that work. The Program supports academic independence for students that have a wide range of ability with college and career readiness as a tangible and realistic goal.
