Philosophico-Methodological Analysis of Prediction and its Role in Economics Dec 24 2019 This book develops a philosophico-methodological analysis of prediction and its role in economics. Prediction plays a key role in economics in various ways. It can be seen as a basic science, as an applied science and in the application of this science. First, it is used by economic theory in order to test the available knowledge. In this regard, prediction has been presented as the scientific test for economics as a science. Second, prediction provides a content regarding the possible future that can be used for prescription in applied economics. Thus, it can be used as a guide for economic policy, i.e., as knowledge concerning the future to be employed for the resolution of specific problems. Third, prediction also has a role in the application of this science in the public arena. This is through the decision-making of the agents — individuals or organizations — in quite different settings, both in the realm of microeconomics and macroeconomics. Within this context, the research is organized in five parts, which discuss relevant aspects of the role of prediction in economics: I) The problem of prediction as a test for a science; II) The general orientation in methodology of science and the problem of prediction as a scientific test; III) The methodological framework of social sciences and economics: Incidence for prediction as a test; IV) Epistemology and methodology of economic prediction: Rationality and empirical approaches and V) Methodological aspects of economic prediction: From description to prescription. Thus, the book is of interest for philosophers and economists as well as policy-makers seeking to ascertain the roots of their performance. The style used lends itself to a wide audience.

Romance Linguistics Dec 04 2020 This volume contains a selection of refereed and revised papers, originally presented at the 32nd Linguistics Symposium on Romance Languages, dealing with linguistic theory as applied to the Romance languages, and on empirical studies on the acquisition of Romance, with studies on Romanian, French, Spanish, Portuguese, Italian, Romansch and Latin. The theoretical section contains contributions concentrating on specific properties of Romance at the syntax/semantics interface, on morphosyntactic issues, on subject licensing and case, and on phonology. The acquisition section includes contributions on first, bilingual and second language acquisition of functional structure, word structure, quantification and stress.

Current Topics in Artificial Intelligence Apr 27 2020 This book constitutes the thoroughly refereed joint post-proceedings of the 10th Conference of the Spanish Association for Artificial Intelligence, CAEPIA 2003, and the 5th Conference on Technology Transfer, TTIA 2003, held in San Sebastin, Spain, in November 2003. The 66 revised full papers presented together with one invited paper were carefully selected during two rounds of reviewing and improvement from an initial total of 214 submissions. The papers span the entire spectrum of artificial intelligence and advanced applications in various fields.

McGill Working Papers in Linguistics Sep 01 2020

Contributions in infinite-dimensional statistics and related topics Mar 19 2022 The interest towards Functional and Operatorial Statistics, and, more in general, towards infinite-dimensional statistics has dramatically increased in the statistical community and in many other applied scientific areas where people faces functional data. This volume collects the works selected and

presented at the Third Edition of the International Workshop on Functional and Operatorial Statistics held in Stresa, Italy, from the 19th to the 21st of June 2014 (IWFOS'2014). The meeting represents an opportunity of bringing together leading researchers active on these topics both for what concerns theoretical aspects and a wide range of applications in various fields. To promote collaborations with other important strictly related areas of infinite-dimensional Statistics, such as High Dimensional Statistics and Model Selection Procedures, this book hosts works in the latter research subjects too.

String Processing and Information Retrieval Jan 17 2022 This book constitutes the proceedings of the 17th International Symposium on String Processing and Information Retrieval, SPIRE 2010, held in Los Cabos, Mexico, in October 2010. The 26 long and 13 short papers presented were carefully reviewed and selected from 109 submissions. The volume also contains 2 invited talks. The papers are structured in topical sections on crowdsourcing and recommendation; indexes and compressed indexes; theory; string algorithms; compressions; querying and search user experience; document analysis and comparison; compressed indexes; and string matching.

Building the European Capacity in Operational Oceanography Oct 26 2022 This proceedings 3rd EuroGOOS Conference on Building the European Capacity in Operational Oceanography is volume 69 in the Elsevier Oceanography Series. The topics of the proceedings cover: Regional Systems I, Remote Sensing Systems, Numerical Modelling and Data Assimilation, Next Generation Systems, EC Operational Forecasting Workshop: Reports on EC Operational Forecasting, In-Situ Monitoring, Waves Monitoring and ForecastingUser Perspectives, EuroGOOS Task Teams, Regional Systems 2, Coastal Systems, Data - Products - Users, and GMES Marine Forum.

Water in Roads: Prediction of Moisture Content of Road Subgrades Jul 31 2020

Lexical Input Processing and Vocabulary Learning Mar 07 2021 This book focuses on theory, research, and practice related to lexical input processing (lex-IP), an exciting field exploring how learners allocate their limited processing resources when exposed to words and lexical phrases in the input. Unit 1 specifies parameters of lex-IP research among other levels of input processing as well as key components (form, meaning, mapping) and contexts (incidental/intentional) of vocabulary learning. Unit 2 highlights theoretical advances, such as the type of processing – resource allocation (TOPRA) model, consistent with research on tasks (sentence writing, word copying, word retrieval) that learners may perform during vocabulary learning. Unit 3 highlights patterns in partial word form learning and input-based effects, including the value of increased exposure, drawbacks of presenting vocabulary in semantic sets, and advantages of input enhancement, particularly with regard to increasing talker, speaking-style, and speaking-rate variability in spoken input. The book unifies a range of research pertinent to lex-IP, summarizes theoretical and instructional implications, and proposes intriguing new directions for future research.

An Unwanted War Oct 02 2020 Offner clarifies the complex relations of the United States, Spain, and Cuba leading up to the Spanish-American War and contends that the war was not wanted by any of the parties but was nonetheless unavoidable. He shows that a final round of peace negoti

Advances in Artificial Intelligence Feb 18 2022 This book constitutes the refereed proceedings of the 16th Conference of the Spanish Association for Artificial Intelligence, CAEPIA 2016, held in Salamanca, Spain, in September 2016. The 47 revised full papers presented were carefully selected from 166 submissions. Apart from the presentation of technical full papers, the scientific program of CAEPIA 2016 included an App contest, a Doctoral Consortium and, as a follow-up to the success achieved in previously CAEPIA editions, a special session on outstanding recent papers (Key Works) already published in renowned journals or forums.

Wireless Internet Sep 20 2019 This book constitutes the thoroughly refereed post-conference proceedings of the 8th International Conference on Wireless Internet, WICON 2014, held in Lisbon, Portugal, in November 2014. The 45 revised full papers were carefully reviewed and selected from numerous submissions. The papers cover topics such as 5G mobile communications, Internet of Things (IoT), super Wi-Fi and V2V/V21.

Drought: Research and Science-Policy Interfacing Nov 22 2019 Droughts occur in arid and semi-arid areas of the world, but also in humid areas, and can develop over short periods (flash drought) or longer periods (seasons/decades). Even though progress has been made, it remains difficult to adequately characterize, monitor, forecast and manage droughts, due to their multi-faceted nature.Usually, drought does

A Compilation of the Messages and Papers of the Presidents, 1789-1907 Jan 25 2020

Handbook of Wind Power Systems Jan 05 2021 Wind power is currently considered as the fastest growing energy resource in the world. Technological advances and government subsidies have contributed in the rapid rise of Wind power systems. The Handbook on Wind Power Systems provides an overview on several aspects of wind power systems and is divided into four sections: optimization problems in wind power generation, grid integration of wind power systems, modeling, control and maintenance of wind facilities and innovative wind energy generation. The chapters are contributed by experts working on different aspects of wind energy generation and conversion.

Working Papers on Bilingualism Oct 22 2019

Computers Helping People With Special Needs Oct 14 2021 This book constitutes the refereed proceedings of the 10th International Conference on Computers Helping People with Special Needs, ICCHP 2006, held in Linz, Austria, in July 2006. The 193 revised contributions presented were carefully reviewed and selected for inclusion in the book. The papers evaluate how various fields in computer science can contribute to helping people with various kinds of disabilities and impairment.

Proceedings of the 1st International Conference in Safety and Crisis Management in the Construction, Tourism and SME Sectors Jun 22 2022

The Papers of Thomas Jefferson, Volume 19 Nov 03 2020 Volume 19, covering the final critical weeks of the First Congress, reveals Washington and Jefferson in the closest and most confidential relationship that existed at any time during their official careers. It opens with the proclamation announcing the exact location of the Federal District, an unexplained choice made in the utmost secrecy by the President in consultation with the Secretary of State some weeks before Washington toured the upper Potomac in an ostensible journey to inspect rival sites and to encourage competition for the location of the national capital. It includes the politically related question of the chartering of the Bank of the United States, on which Jefferson delivered his famous opinion challenging its constitutionality. But the conflict with Hamilton over the Bank, important as it was, did not bring the two men on the public stage as contestants. Instead, the first focusing of public attention on the breach in the administration occurred with the publication of Jefferson's report on the whale and cod fisheries. This widely disseminated report is here presented in a context showing that, after Hamilton declined to cooperate in reciprocating the favors France had granted to American trade, Jefferson deliberately and publicly challenged the Hamiltonian opposition. In unusually blunt language, his report called for commercial retaliation against Great Britain, thus causing a sensation both in the ... ministry. This volume shows Jefferson's concern over the growing discontent in the South and West over fiscal and other policies of the national government, his resistance to interested promotion of consular appointments in business circles, his grappling with the political and constitutional questions concerning the admission of Kentucky and Vermont, his involvement in the political consequences of the death of Franklin that affected even the proceedings of the American Philosophical Society, his cautious relationship with Tench Coxe as a source of statistical information which the Secretary of the Treasury failed to supply, and his report to Washington on a judicial appointment that brought on both embarrassment and constitutional questions. Once Congress had dispersed, Jefferson was able to turn his attention to long-neglected private concerns and to the correspondence that gave him most satisfaction, that with the family at Monticello.

Entropy Application for Forecasting Aug 24 2022 This book shows the potential of entropy and information theory in forecasting, including both theoretical developments and empirical applications. The contents cover a great diversity of topics, such as the aggregation and combination of individual forecasts, the comparison of forecasting performance, and the debate concerning the tradeoff between complexity and accuracy. Analyses of forecasting uncertainty, robustness, and inconsistency are also included, as are proposals for new forecasting approaches. The proposed methods encompass a variety of time series techniques (e.g., ARIMA, VAR, state space models) as well as econometric methods and machine learning algorithms. The empirical contents include both simulated experiments and real-world applications focusing on GDP, M4-Competition series, confidence and industrial trend surveys, and stock exchange composite indices, among others. In summary, this collection provides an engaging insight into entropy applications for forecasting, offering an interesting overview of the current situation and suggesting possibilities for further research in this field.

Water Policy and Management in Spain Jul 11 2021 Spain is facing an increasingly difficult situation in terms of water stress. This is an issue that is due mostly to poor management practices in all sectors. Large amounts of water have been used for agricultural purposes at very low prices for too long; there is an uncontrolled use of most aquifers in rural areas which result from ineffective control by the public administration; per capita consumption continues increasing as well as water used for industrial and energy generation, the construction and tourism sectors and for recreation activities. In fact, they have all exerted additional pressure on available water resources. In order to face the above challenges, water policy has made a gradual shift towards more rational and sustainable management of water resources. This has also been influenced by the European Water Framework Directive about which, as the book discusses, there are both myths and misunderstandings. This book analyses the very complex position of all sectors in the country, the alternatives available and the challenges ahead. In so doing, it makes an important contribution to the literature on water resources management. This book was published as a special issue of the International Journal of Water Resources Development.

Current Topics in Artificial Intelligence May 29 2020 This book constitutes the thoroughly refereed joint post-proceedings of the 10th Conference of the Spanish Association for Artificial Intelligence, CAEPIA 2003, and the 5th Conference on Technology Transfer, TTIA 2003, held in San Sebastián, Spain, in November 2003. The 66 revised full papers presented together with one invited paper were carefully selected during two rounds of reviewing and improvement from an initial total of 214 submissions. The papers span the entire spectrum of artificial intelligence and advanced applications in various fields.

IMF Staff Papers, Volume 52, Special Issue, IMF Conference in Honor of Michael Mussa Nov 15 2021 This paper focuses on expectations for the American economy focused on the likelihood of secular stagnation, which continued to be debated throughout the post-war period. Concerns rose during the late 1960s and early 1970s about rapid population growth smothering the potential for

economic growth in developing countries were contradicted when, during the mid- and late-1970s, fertility rates began to decline rapidly. In policy-oriented institutions (and in most businesses and individual decision making), policymaking decisions are often guided by projections and forward-looking indicators. The case of Michael Mussa has been one of great anticipation, and of great accomplishment, and all the early optimistic forecasts about him have turned out to be correct. Within the sphere of economics, undoubtedly the most famous and widely used forecast—one, incidentally, that thus far has often been incorrect—is that based on the Malthusian doctrine of the relationship between resources and population.

Selected papers from the XIIIth Linguistic Symposium on Romance Jun 29 2020 The papers in this volume are a selection from the paper presented at the 13th Annual Linguistic Symposium on Romance Languages (1983). The languages discussed include Romance in general, Spanish, French, Portuguese, and Gascon. The diversity of the topics encompassed by these papers conforms to the principal goal of the LSRL conferences: to contribute to the synchronic and diachronic description and analysis of the Romance Languages within the context of current developments in linguistic theory.
