A History of the Royal College of General Practitioners May 14 2021 John P. Horder, President, 1980-82 The first 30 years of the College have been an exciting experience for those most closely involved. Some have already passed on, but this account has been written soon enough for many of the actors to be historians. Future members of the College will be grateful to them for what they have written, as well as for what they did as a remarkably determined and harmonious team. Students of twentieth century medicine in this country will also be grateful for a first-hand account of the development of an institution which has been closely associated with, and partly responsible for, important changes in medical care and education. Those who read these pages may wonder how the builders of this young College could have found time to do much general practice. They did. The three editors of this history, which covers 25 years, and the general practitioner members of the Steering Committee all ran large practices, in which they worked very hard throughout that time. Most of their work for the College was done during off-duty hours, weekends and holidays. The College could not have developed as it did, had they not been personally concerned with the practical problems and needs of clinical medicine. This is also true of many of the contributors. It is impossible to mention everyone who deserves credit. The editors hope that they may be forgiven for any serious omissions.

Positive Schooling and Child Development May 02 2020 This volume discusses the importance of positive schooling in producing responsible and potentially productive adults. Students are generally more motivated to do well and to realize their full potential in schools that have a positive schooling climate, where they feel safe, included and supported. Nevertheless, the reality in today's schools is very different. This volume discusses the major challenges faced by children and adolescents in schools, including problems with curricula, safety issues, lack of inclusive policies, non-availability of teachers, ineffective teaching, insensitivity towards students' issues, improper evaluation methods, harmful disciplinary measures, and so on. Experts in child psychology and education discuss these issues at length in this volume and offer viable solutions for policymakers, school administrators, teachers and parents to make suitable changes and create a positive atmosphere in educational institutions. This volume further discusses the role of various stakeholders---school principals, teachers, counsellors and psychologists---in addressing these challenges. In addition, it raises other, emerging issues which have not been covered in previous volumes on this topic and offers evidence-based suggestions to address them. The intended readership of the volume is researchers and students of psychology, education, sociology, social work and public health, and school teachers, administrators and teacher-trainers.
