**International Scientific Siberian Transport Forum TransSiberia - 2021** Apr 12 2021 This book presents innovations in the field of high-speed rail technology, hyperloop transportation technologies and Maglev system, information and communication technology (ICT) for intelligent transportation systems (ITS), multimodal transportation, sustainable freight transportation, and others. The papers presented in the book are proceedings of the annual scientific forum "TransSiberia" which is the foremost Russian transport event that focuses on innovations in rail transport. The book also presents research in the field of railway engineering, health monitoring, inspection, NDT & E, and signal processing. Developments in the field of decarbonization of railway transport and new types of fuel as an alternative to electrification are proposed. The issues of sustainable operation and maintenance of railway systems and sustainable freight transportation, such as digitalization and AI technologies for sustainable asset management, operation, and maintenance of railway systems, have received a lot of research attention. The book serves as a medium for railroad academia and industry to exchange new ideas and share the latest achievements, as well as to continue supporting the productivity of the transport industry in a sustainable manner

*A Global Warming Forum* Aug 17 2021 A Global Warming Forum: Scientific, Economic, and Legal Overview provides an integrated, thematic approach to major critical aspects of the problem presented by global warming. Scientific issues; economics; natural resource management concerns; and legal, educational, and policy considerations are discussed within the context of arriving at solutions to global warming problems. Data and information is derived from diverse geographic locations, especially in the case history chapters requiring the use of integrated interdisciplinary methods. Graphs and tables are used extensively throughout the text to illustrate key concepts. A Global Warming Forum: Scientific, Economic, and Legal Overview is an excellent survey for researchers in all areas of geoscience and climate assessment, including geochemistry, oceanography, climatology, and resource management.

**Video Game Audio** Feb 29 2020 From the one-bit beeps of Pong to the 3D audio of PlayStation 5, this book examines historical trends in video game sound and music. A range of game systems sold in North America, Europe and Japan are evaluated by their audio capabilities and industry competition. Technical fine points are explored, including synthesized v. sampled sound, pre-recorded v. dynamic audio, backward compatibility, discrete and multifunctional soundchips, storage media, audio programming documentation, and analog v. digital outputs. A timeline chronicles significant developments in video game sound for PC, NES, Dreamcast, Xbox, Wii, Game Boy, PSP, iOS and Android devices and many others.

[British Railway Enthusiasm](#) Oct 26 2019 This is the first academic book to study railway enthusiasts

in Britain. Far from a trivial topic, the postwar train-spotting craze swept most boys and some girls into a passion for railways. For many in this cohort, train spotting ignited a lifetime's interest. British Railway Enthusiasm traces this postwar cohort and those who followed, as they moved through the life cycle. As the years turned these people invigorated different sectors in the world of railway enthusiasm--train spotting, railway modeling, collecting railway relics--and then, in response to widespread grief at main line steam traction's death, Britain's now-huge preserved railway industry. Today this industry finds itself riven by tensions between preserving a loved past which ever fewer people can remember and earning money from tourist visitors.
