*Proceedings of the Fourth International Congress on Mathematical Education Jun 12 2021 Henry O. Pollak Chairman of the International Program Committee Bell Laboratories Murray Hill, New Jersey, USA The Fourth International Congress on Mathematics Education was held in Berkeley, California, USA, August 10-16, 1980. Previous Congresses were held in Lyons in 1969, Exeter in 1972, and Karlsruhe in 1976. Attendance at Berkeley was about 1800 full and 500 associate members from about 90 countries; at least half of these come from outside of North America. About 450 persons participated in the program either as speakers or as presiders; approximately 40 percent of these came from the U.S. or Canada. There were four plenary addresses; they were delivered by Hans Freudenthal on major problems of mathematics education, Hermina Sinclair on the relationship between the learning of language and of mathematics, Seymour Papert on the computer as carrier of mathematical culture, and Hua Loo-Keng on popularising and applying mathematical methods. George Polya was the honorary president of the Congress; illness prevented his planned attendance but he sent a brief presentation entitled, "Mathematics Improves the Mind". There was a full program of speakers, panelists, debates, miniconferences, and meetings of working and study groups. In addition, 18 major projects from around the world were invited to make presentations, and various groups representing special areas of concern had the opportunity to meet and to plan their future activities.*

*New Horizons in Media Psychology* Oct 16 2021 Technische und ökonomische Entwicklungen im Medienbereich setzen sich über nationale Grenzen hinweg durch, gelegentlich gilt dies auch für Medieninhalte und -formate. Die europäische Medienforschung im allgemeinen und damit auch die Medienpsychologie entwickelt sich bis heute jedoch zumeist noch im nationalen Rahmen. Erste Schritte zur Überwindung dieser unbefriedigenden Lage werden seit einigen Jahren von namhaften Medienpsychologen aus zahlreichen Ländern unternommen. Die in diesem Band versammelten Beiträge vermitteln dem Leser ein repräsentatives Bild von vielversprechenden Kooperationsmöglichkeiten wie auch von bereits bestehenden Kooperationsabsichten und gewähren ihm zugleich einen Einblick in den interessanten, wenngleich langwierigen Prozeß der europäischen Integration im Bereich der Medienforschung. Technical and economical developments in the media spread increasingly beyond national borders. Occasionally this also applies to the contents and formats of media. Yet research in general and also in the field of media psychology is done on an entirely national scale. Results, methods and theories of research in Europe are very often acknowledged only when they are published in American journals. In the present volume, well-known media psychologists from several European countries discuss new perspectives and schemes for cooperation on subjects such as content analysis, parasocial interaction with TV characters, television and language, and the impact of TV broadcasts on the audience, thus preparing the ground for further integration in the research of media in Europe.
