## Here Is the Answer! What Is the Question?

Jan 28 2020 On a popular TV game show, the game board provides the answer and the contestants have to come up with the question. While the answers in this book all fall into one category, "Parliamentary Law" or "RONR," and the book doesn't have an electronic "buzz in" system, you can now join in the fun and try their hand at finding the correct question to parliamentary answers. This book replaces those books and provides 2,000 plus answers (and questions) covering "Robert's Rules of Order Newly Revised" (RONR) 11th Edition (2011). These answers (and questions) were prepared by the AIP Education Department. The answers and questions are grouped by the appropriate section in RONR. Each answer/question includes a reference to the page in RONR from which it was developed. Some are direct quotations, while others require applying the information from the referenced page.

**The Turing Test** Sep 23 2019 Historical and contemporary papers on the philosophical issues raised by the Turing Test as a criterion for intelligence. The Turing Test is part of the vocabulary of popular culture—it has appeared in works ranging from the Broadway play "Breaking the Code" to the comic strip "Robotman." The writings collected by Stuart Shieber for this book examine the profound philosophical issues surrounding the Turing Test as a criterion for intelligence. Alan Turing's idea, originally expressed in a 1950 paper titled "Computing Machinery and Intelligence" and published in the journal *Mind*, proposed an "indistinguishability test" that compared artifact and person. Following Descartes's dictum that it is the ability to speak that distinguishes human from beast, Turing proposed to test whether machine and person were indistinguishable in regard to verbal ability. He was not, as is often

assumed, answering the question "Can machines think?" but proposing a more concrete way to ask it. Turing's proposed thought experiment encapsulates the issues that the writings in *The Turing Test* define and discuss. The first section of the book contains writings by philosophical precursors, including Descartes, who first proposed the idea of indistinguishability tests. The second section contains all of Turing's writings on the Turing Test, including not only the Mind paper but also less familiar ephemeral material. The final section opens with responses to Turing's paper published in *Mind* soon after it first appeared. The bulk of this section, however, consists of papers from a broad spectrum of scholars in the field that directly address the issue of the Turing Test as a test for intelligence. Contributors John R. Searle, Ned Block, Daniel C. Dennett, and Noam Chomsky (in a previously unpublished paper). Each chapter is introduced by background material that can also be read as a self-contained essay on the Turing Test
