[Chase's Calendar of Events 2016](#) Feb 29 2020 Chase's Calendar of Events is the most comprehensive and authoritative reference available on special events, holidays, federal and state observances, historic anniversaries, astronomical phenomena, and more. Published since 1957, Chase's is the only guide to special days, weeks, and months.

International Business Ethics Nov 07 2020 This book addresses an essential need felt by many who seek to promote best business practices in China and East Asia – namely the need for culturally appropriate instructional materials (basic information, case studies and ethical perspectives) that will allow managers and entrepreneurs to understand and embrace the challenge of moral leadership in business. In an era characterized by globalization and the increasing importance of the economies of China, India, Japan and SE Asia, international business ethics must reflect the concerns of the people living and working in this area, the moral and spiritual traditions that have nurtured them and their specific contributions to sustainable development. This book presents twenty important case studies, taken from newsworthy events of the past few years, in which Asians and others have attempted to respond to this challenge. Each case study has been selected and shaped in order to highlight various aspects of doing business in Asia, starting with basic principles and moving on to the specific responsibilities that businesses have towards their various stakeholders. The authors contend that the best way to appreciate the relevance of Asian moral and spiritual traditions is to determine their specific contribution to virtue ethics, where the ancient traditions of both East and West converge in their focus on the qualities of moral leadership that form the basis of best business practice. Exploring the case studies will enable readers to appreciate the continued relevance of these ethical perspectives in Asian business. Best business practice clearly involves learning to do business and playing the game according to the rules; but the necessity of playing by the rules is not likely to become clear until one takes up the path that leads to a virtuous life in business, developing a moral character chiefly based on integrity.

Milton Friedman and Economic Debate in the United States, 1932–1972, Volume 1 Feb 20 2022 Milton Friedman is widely recognized as one of the most influential economists of the twentieth century. Yet no previous study has distilled Friedman's vast body of writings into an authoritative account of his research, his policy views, and his interventions in public debate. With this ambitious new work, Edward Nelson closes the gap: Milton Friedman and Economic Debate in the United States is the defining narrative on the famed economist, the first to grapple comprehensively with Friedman's research output, economic framework, and legacy. This two-volume account provides a foundational introduction to Friedman's role in several major economic debates that took place in the United States between 1932 and 1972. The first volume, which takes the story through 1960, covers the period in which Friedman began and developed his research on monetary policy. It traces Friedman's thinking from his professional beginnings in the 1930s as a combative young microeconomist, to his wartime years on the staff of the US Treasury, and his emergence in the postwar period as a leading proponent of monetary policy. The second volume covers the years between 1960 and 1972— years that saw the publication of Friedman and Anna Schwartz's Monetary History of the United States. The book also covers Friedman's involvement in a number of debates in the 1960s and 1970s, on topics such as unemployment, inflation, consumer protection, and the environment. As a fellow monetary economist, Nelson writes from a unique vantage point, drawing on both his own expertise in monetary analysis and his deep familiarity with Friedman's writings. Using extensive documentation, the book weaves together Friedman's research contributions and his engagement in public debate, providing an unparalleled analysis of Friedman's views on the economic developments of his day.

[The Politics of Controlling Organized Crime in Greater China](#) Jun 02 2020 In China, the central government has the political will to control organized crime, which is seen as a national security threat. The crux of the problem is how to control local governments that have demonstrated lax enforcement without sufficient regulation from the provincial governments. The development of prostitution, underground gambling and narcotics production has become so serious that the central government has to rely on anti-crime campaigns to combat these "three evils". This book explores the specific role of government institutions and agencies, notably the police, in controlling organised and cross-border crime in Greater China. Drawing heavily on original empirical data, it compares the both the states of the People's Republic of China and Taiwan, as well as city-states Hong Kong and Macao. This region has become increasingly economically integrated, and human interactions have been enhanced through improved trade relations, tourism, and increased individual freedom. The book argues that the regime capacity of crime control across Greater China has been expanded through regional and international police cooperation as well as anti-crime campaigns. It suggests that a strong central state in China is necessary to rein in the local states and to prevent the risk of deteriorating into a political-criminal nexus. Focusing on regime capacity in crime control, regime autonomy from crime groups, and regime legitimacy in the fight against organized crime, this thought-provoking book will be of great interest to students and scholars of Chinese politics and criminology more broadly.

[Smart World Cities in the 21st Century](#) Oct 19 2021 The term smart city has become a buzzword. City planners develop ubiquitous connectivity through Wi-Fi hotspots, establish science parks, introduce bike and car sharing, and push entrepreneurship. All this is happening under the flagship of becoming a knowledge city. This book investigates the digital and cognitive infrastructure of 31 cities and how they meet the demands of the knowledge society in an increasingly digitized environment.

[Global review of agricultural census methodologies and results \(2006 – 2015\)](#) Oct 07 2020 At the end of each census round, FAO reviews and assesses national census practices, methodologies and results, and summarizes the findings in methodological publications, under the Statistical Development Series (SDS). For the WCA 2010 round (2006–2015), these assessments have been presented in two separate publications. The first one, titled “Main results and metadata by country” (SDS 17), published in 2019, presented a compendium of census metadata and main results for a record number of 127 countries and territories. The SDS 18, i.e. this publication, presents in its first part (Chapters 1 to 12) a methodological review of the national censuses. In its second part (Chapter 13), it illustrates global comparable data on key variables characterizing the structure of agriculture. The global review of census results includes key structural variables that are not available elsewhere. Some examples are number and area of holdings, land tenure and holder gender. Other variables are land size classes, average holding sizes, legal status of holders, household sizes, source of farm labour, land use and operated land.

The Detective's Handbook Jan 22 2022 The Detective's Handbook details the vital information law enforcement officers need to know to become better detectives. Since all essential aspects of detective work cannot be covered in a single volume, the editors have selected 20 of the most critical issues detectives face in their day-to-day work and present them in separate chapters. Using a unique format and style, this essential handbook draws on the expertise of contributors with police and academic backgrounds to provide both new and seasoned detectives with invaluable insights. It covers a wide range of detective procedures and practices employed in the United States and can be read as a whole or used as a reference for conducting various types of investigations and interrogations. The book highlights common mistakes and outlines best practices to help readers avoid making the same mistakes in the field. It provides the tools and understanding to conduct the range of investigations that today's detectives will most likely have to conduct, including those involving sexual predators, healthcare and financial fraud, cyber crime, gangs, cults, personal violence, and property. The text concludes with a section on all-purpose practices and lessons for investigations. In this section, readers will learn the practical aspects of interviewing and interrogating witnesses, including how to interview and communicate with special populations, such as those with mental and physical disabilities. Sharing the most effective investigative practices and procedures in use today, this book is a must-have for police, sheriffs, and other government agencies that are responsible for protecting the public.

Property Threats and the Politics of Anti-Statism Jun 14 2021 Contemporary tax burden differences in Latin America are a function of historical threats to private property.

Teaching Reasoning Nov 19 2021 Teach students essential skills with engaging activities. Explore key reasoning skills from the Common Core and Next Generation Science Standards and strategies for teaching them to students. Then, discover fun, research-based games and activities to reinforce students' reasoning skills. This practical text provides clear guidance for incorporating these tools into your classroom to prepare students for academic and lifetime success.

[Paving the Way for Reagan](#) Feb 08 2021 From 1964 to 1980, the United States was buffeted by a variety of international crises, including the nation's defeat in Vietnam, the growing aggression of the Soviet Union, and Washington's inability to free the fifty two American hostages held by Islamic extremists in Iran. Through this period and in the decades that followed, Commentary, Human Events, and National Review magazines were critical in supporting the development of GOP conservative positions on key issues that shaped events at home and abroad. These publications and the politicians they influenced pursued a fundamental realignment of US foreign policy that culminated in the election of Ronald Reagan. Paving the Way for Reagan closely examines the ideas and opinions conveyed by the magazines in relationship to their critiques of the dominant liberal foreign policy events of the 1960s and 1970s. Revealed is how the journalists' key insights and assessments of the US strategies on Vietnam, China, the Strategic Arms Limitations Talks (SALT), the United Nations, the Panama Canal, Rhodesia, and the Middle East applied pressure to leaders on the Right within the GOP who they believed were not being faithful to conservative principles. Their views were ultimately adopted within the conservative movement, and subsequently, helped lay the foundation for Reagan's "peace through strength" foreign policy. Incorporating primary sources and firsthand accounts from writers and editors, Jurdem provides a comprehensive analysis of how these three publications played a fundamental role influencing elite opinion for a paradigm shift in US foreign policy during this crucial sixteen--year period.

First Responders Handbook Jul 24 2019 The objective of this handbook is to make available in a quick reference form, the information to enhance and support the response capabilities of firefighters, emergency medical technicians, hazardous materials response teams, law enforcement officers, bomb squads, medical doctors and nurses, emergency managers, schools, and others. This handbook is dedicated and committed to disaster prevention, preparedness, readiness, response, mitigation and recovery efforts. This is an ideal book for newcomers to the field, and can be used for fast knowledge for application to any areas of response.

Comparative Politics and Government of the Baltic States Jan 28 2020 This book traces the development of the political institutions, electoral systems, parties, civil society, economic and social policies and foreign affairs of the three Baltic states of Estonia, Latvia and Lithuania over the last quarter century.

Hell from the Heavens Oct 31 2022 Looking toward the heavens, the destroyer crew saw what seemed to be the entire Japanese Air Force assembled directly above. Hell was about to be unleashed on them in the largest single-ship kamikaze attack of World War II. On April 16, 1945, the crewmen of the USS Laffey were battle hardened and prepared. They had engaged in combat off the Normandy coast in June 1944. They had been involved in three prior assaults of enemy positions in the Pacific-at Leyte and Lingayen in the Philippines and at Iwo Jima. They had seen kamikazes purposely crash into other destroyers and cruisers in their unit and had seen firsthand the bloody results of those crazed tactics. But nothing could have prepared the crew for this moment—an eighty-minute ordeal in which the single small ship was targeted by no fewer than twenty-two Japanese suicide aircraft. By the time the unprecedented attack on the Laffey was finished, thirty-two sailors lay dead, more than seventy were wounded, and the ship was grievously damaged. Although she lay shrouded in smoke and fire for hours, the Laffey somehow survived, and the gutted American warship limped from Okinawa's shore for home, where the ship and crew would be feted as heroes. Using scores of personal interviews with survivors, the memoirs of crew members, and the sailors' wartime correspondence, historian and author John Wukovits breathes life into the story of this nearly forgotten historic event. The US Navy described the kamikaze attack on the Laffey "as one of the great sea epics of the war." In Hell from the Heavens, the author makes the ordeal of the Laffey and her crew a story for the ages.

Africa and Global Health Governance Aug 17 2021 Her findings will benefit health and development practitioners, scholars, and students of global health governance and African politics.

Cybersecurity in Our Digital Lives Dec 29 2019 Did you know your car can be hacked? Your medical device? Your employer's HVAC system? Are you aware that bringing your own device to work may have security implications? Consumers of digital technology are often familiar with headline-making hacks and breaches, but lack a complete understanding of how and why they happen, or if they have been professionally or personally compromised. In Cybersecurity in Our Digital Lives, twelve experts provide much-needed clarification on the technology behind our daily digital interactions. They explain such things as supply chain, Internet of Things, social media, cloud computing, mobile devices, the C-Suite, social engineering, and legal confidentiality. Then, they discuss very real threats, make suggestions about what can be done to enhance security, and offer recommendations for best practices. An ideal resource for students, practitioners, employers, and anyone who uses digital products and services.

Environmental Security in Greece May 02 2020 Environmental Security in Greece establishes stakeholders' perceptions of environmental security and energy security taking a Q methodology and Digital Media Research Framework approach. In-depth individual viewpoints and opinions of policymakers, energy-industry leaders, NGOs' members and the public are described throughout.

Sino-Japanese Relations in a Trilateral Context Mar 24 2022 This book explains the increasingly turbulent Sino–Japanese relations since the 2000s by innovatively investigating the formation mechanism of mutual misperception deeply rooted in China-Japan-U.S. trilateral structural dynamics. The political and security relationship has been increasingly deteriorating against the high interdependency between the world's second and third largest economies. More ironically, both sides have also shown the intent and made efforts to improve bilateral ties. The author systematically conducts a focused comparison of the evolution of the Sino-Japanese mutual perceptions and policies toward one another during the past decade and a half. Empirically, Yun Zhang closely examines five case studies that provide insights to IR students and scholars and policy makers on how misperception and mistrust have formed, replicated, and intensified.

Letters from Heaven May 26 2022 Heaven is trying to speak to us but we are not listening. In the silence, God speaks. He will speak to every soul that will listen.

Women Presidents of Latin America Dec 09 2020 Women are gaining ground as presidents of Latin America. Women leaders in presidential systems (particularly women directly elected by the public) were generally limited to daughters and wives of male executives or opposition leaders. With the election of Michelle Bachelet in Chile, these traditional patterns appeared to be shifting. This book asks: what conditions allowed for a broadening of routes, beyond family ties, for women in Latin America? Do women presidents of Latin America use their powers to enhance women's representation? While providing valuable insight into the big picture of women in presidential politics throughout Latin America over the last several decades, this book more closely analyzes four women presidents gaining office since 2006: Michelle Bachelet (Chile) Cristina Fernández (Argentina) Laura Chinchilla (Costa Rica) and Dilma Rousseff (Brazil). It assesses the paths and impacts of Latin American women presidents and scrutinizes the ways gender shapes both aspects. No other scholar has offered such an in-depth analysis of the paths and actions of women presidents of Latin America. As such, this book offers important contributions to the gender in politics literature. Its multi-methodological approach consisting of original data collection from field work and in person interviews of political elites and experts combined with an analysis of a host of secondary sources including media articles and public opinion data makes this work exceptionally comprehensive. Its findings are applicable to those studying women, gender, and politics as well as comparative politics, Latin American politics, and leadership studies.

Regional Economic Integration and the Global Financial System Dec 21 2021 In theory, regionalism and globalization are intended to be viewed as two separate concepts. However, as long as the approaches complement each other, considering these paradigms in tandem can have significantly positive effects on the overall status of the world economy. Regional Economy Integration and the Global Financial System addresses recent trends in regional integration projects and the strides that such projects are making on the road toward globalization. Focusing on a range of economic projects, emerging supranational units, and possible implications for future trends, this book is an essential reference source for professionals, scholars, and institutions interested in the dynamic effects of regionalism and globalization.

Nine Days in May Sep 25 2019 Moving through the jungle near the Cambodian border on May 18, 1967, a company of American infantry observed three North Vietnamese Army regulars, AK-47s slung over their shoulders, walking down a well-worn trail in the rugged Central Highlands. Startled by shouts of “Lai day, lai day” (“Come here, come here”), the three men dropped their packs and fled. The company commander, a young lieutenant, sent a platoon down the trail to investigate. Those few men soon found themselves outnumbered, surrounded, and fighting for their lives. Their first desperate moments marked the beginning of a series of bloody battles that lasted more than a week, one that survivors would later call “the nine days in May border battles.” Nine Days in May is the first full account of these bitterly contested battles. Part of Operation Francis Marion, they took place in the Ia Tchar Valley and the remote jungle west of Pleiku. Fought between three American battalions and two North Vietnamese Army regiments, this prolonged, deadly encounter was one of the largest, most savage actions seen by elements of the storied 4th Infantry Division in Vietnam. Drawing on interviews with the participants, Warren K. Wilkins recreates the vicious fighting in gripping detail. This is a story of extraordinary courage and sacrifice displayed in a series of battles that were fought and won within the context of a broader, intractable strategic stalemate. When the guns finally fell silent, an unheralded American brigade received a Presidential Unit Citation and earned three of the twelve Medals of Honor awarded to soldiers of the 4th Infantry Division in Vietnam.

Programming Chrome Apps Apr 24 2022 Put your web app design skills to work by learning how to create powerful and portable Chrome Apps. With this practical book, you'll learn how to build Google's unique apps to behave just like native apps so they can interact with hardware devices, access external files, and send notifications. Chrome Apps run on any platform that supports the Chrome browser—including OS X, Windows, Linux, as well as Android and iOS. If you know how to work with HTML, CSS, JavaScript, and the DOM, you're ready to get started.

The Angelus Transcripts Oct 26 2019 Since birth, author Emrayel A'a Ra iry a'a has been blessed with psychic ability, and she was encouraged by her family to pursue that calling. Her skills came to a head when the angels took over and trained her to new levels. She began not only to hear the angels but to also see them. Those angels have become her friends. In The Angelus Transcripts, she shares a journal of the messages delivered by the angels for two years beginning in 2013. Enlightening and inspiring, the messages and visions encourage people to grow in mind and soul. The visions show how much more there is to the universe, and the messages help you grow outside the box of normal life. A mixture of humor, wisdom, lessons, and growth, the messages communicate love and inspiration from the angels and beyond. The Angelus Transcripts guides you on your journey to your destiny, ensuring you take the correct steps in life.

Risk and Hyperconnectivity Jul 16 2021 Risk and Hyperconnectivity brings the paradigms of new risk theory, neoliberalization they, and connectivity theory together for the first time to illuminate how the kaleidoscope of risk events in the opening years of the new century has recharged a neoliberal battlespace of media, economy, and security. Probing a series of risk events that have already contoured the twenty-first century, this account shows how both established and emergent media are central in shaping past, present and future horizons of neoliberalism, while also propelling pressure for its alternatives.

Official Congressional Directory 114th Congress, 2015-2016, Convened January 2015 Jun 26 2022 This handy guide provides a color photograph of each Member of the House of Representatives and the Senate of the 114th Congress and details each Member's length of service, political party affiliation, and congressional district. The Pictorial Directory also contains pictures of the President, Vice President, and House and Senate officers and officials.

Countless Blessings Jul 28 2022 A study of pregnancy and childbirth customs in Niger, and how it has both a high fertility rate and high rates of maternal and infant mortality. How do women in Niger experience pregnancy and childbirth differently from women in the United States or Europe? Barbara M. Cooper sets out to understand childbirth in a country with the world's highest fertility rate and an alarmingly high rate of maternal and infant mortality. Cooper shows how the environment, slavery and abolition, French military rule, and the rapid expansion of Islam have all influenced childbirth and fertility in Niger from the nineteenth century to the present day. She sketches a landscape where fear of infertility generates intense competition between communities, ethnicities, and co-wives and creates a culture where concerns about infertility dominate concerns about overpopulation, where illegitimate children are rejected, and where the education of girls is sacrificed in the name of avoiding shame. Given a medical system poorly adapted to women's needs, a precarious economy, and a political context where it is impossible to address sexuality openly, Cooper discovers that it is little wonder that pregnancy and birth are a woman's greatest pride as well as a source of grave danger. “Beautifully written, insightful, and full of empathy. A must read for anyone seeking to understand the damaging consequences of neglecting women's and infants' health.” —Johanna Schoen, author of Abortion after Roe “Few experiences are more potent than reproduction. Countless Blessings brilliantly unwinds the full import of this potency, tracing a history of demography, bodily peril, parental joy, and social, religious, and political meaning. Cooper's tremendous skill and creativity as a scholar enable us to see the political stakes of reproduction, even as they are grounded in the intimacies of embodied experience.” —Julie Livingston, author of Self-Devouring Growth: A Planetary Parable as Told from Southern Africa “Countless Blessings shows how women in Niger and in West Africa have long navigated the various states of social value, personhood, spirituality, and childbirth, and it paints a remarkable picture of how contested and embodied the social and material concerns of childbirth remain for women today.” —Ampson Hagan, Univeristy of North Carolina-Chapel Hill, IJAHs
