**Context and Contextuality** Sep 21 2019 Since 1988, hundreds of thousands of evangelical Christians have migrated to the United States of America from former Soviet Union countries, establishing many Russian-speaking immigrant congregations across the country. This study analyzes how these immigrant churches function in their new cultural, social, and religious context. Dr Vyacheslav Tsvirinko, a Russian who lived in the USA for over twenty-five years, examines the holism, authenticity and contextuality of the mission work done by churches in the Pacific Coast Slavic Baptist Association (PCSBA) in America. He defines authentic mission in light of three major Christian groups – the World Council of Churches, the Lausanne Movement, and Anabaptists – and uncovers startling insights on how PCSBA churches engage in mission, both back in their homeland and in the USA. The findings and conclusions of this work are invaluable to diasporic

Christian communities who wish to address their authenticity in the way they do mission, both internationally and in their local context, creating a path to more fruitful gospel and kingdom work.

**The Gospel according to Mark** Aug 21 2019 The world to which the Gospel of Mark introduces its reader is a world of conflicts and suspense, enigmas and secrets, questions and overturning of evidence, irony and surprise. Its principal actor, Jesus, is perplexing in the extreme. He is evidently so for the religious authorities who oppose him, but also for his disciples, who shift from incomprehension to opposition and flight. Questions of meaning, life and death, good and evil are continually broached. This narrative is a subtle invitation to enter into a new world, that of the coming Reign of God, in which the first are last and whoever wants to save his life must lose it. This commentary on the Gospel of Mark has been enthusiastically reviewed in the French edition as one of the best current commentaries on Mark. As a narrative critical commentary, it favors an interpretation of the Gospel that tries to grasp the dynamic of the text taken as a whole. Even if the technical vocabulary of narrative analysis is not used, and the main results of the historical-critical criticism, particularly those of redaction criticism, are not neglected, as the notes will reveal, it is narrative criticism that guides the proceedings.

**Context Sensitive Health Informatics: Sustainability in Dynamic Ecosystems** Oct 23 2019 The digital transformation of healthcare delivery remains a work in progress, and contextual variation continues to be one of the barriers to the development of sustainable health information technology. Context-sensitive health informatics concerns health information technologies and their environments, which may be people such as patients, users, designers and evaluators, but also non-human constructs such as organizations, work practices, guidelines and protocols, or buildings and markets. This book presents papers from CSHI 2019, the international conference on Context Sensitive Health Informatics, held in Lille, France, on 23 and 24 August 2019. The subtitle of the conference was Sustainability in Dynamic Ecosystems, and the thirty papers included here are divided into six sections: understanding organizational contexts; towards sustainable EHR; different contexts for medication errors and patient safety; methods and models to study contexts for health information systems; citizens in health contexts; and designing and evaluating in contexts. Two keynote speeches from the conference are also included. With its focus on context sensitivity and sustainability in digital healthcare, the book will be of interest to all those working in the field of health informatics.

The papers feature research in a wide range of disciplines related to issues of context and contextual knowledge and discuss commonalities across and differences between the disciplines' approaches to the study of context. They are organized in the following topical sections: context in representation; context modeling of human activities; context in communication; context awareness; and various specific topics.

**The Internet of Things for Smart Urban Ecosystems** May 30 2020 The main objective of this book is to provide a multidisciplinary overview of methodological approaches, architectures, platforms, and algorithms for the realization of an Internet of Things (IoT)-based Smart Urban Ecosystem (SUE). Moreover, the book details a set of real-world applications and case studies related to specific smart infrastructures and smart cities, including structural health monitoring, smart urban drainage networks, smart grids, power efficiency, healthcare, city security, and emergency management. A Smart Urban Ecosystem (SUE) is a people-centric system of systems that involves smart city environments, applications, and infrastructures. SUEs require the close integration of cyber and physical components for monitoring, understanding and controlling the urban environment. In this context, the Internet of Things (IoT) offers a valuable enabling technology, as it bridges the gap between physical things and software components, and empowers cooperation between distributed, pervasive, and heterogeneous entities.

**The New Testament for English Readers: The three first gospels** May 10 2021

*Scripture in Context II* Apr 21 2022 "In the summers of 1978 and 1980, William W. Hallo directed two National Endowment for the Humanities Summer Seminars, both of which had the title: 'Biblical History in its Near Eastern Setting.' These seminars, conducted at Yale University, have now resulted in two related collections of essays. This second collection, *Scripture in Context II*, had its origins in the 1980 seminar. Both seminars investigated in chronological sequence the major phases of ancient Near Eastern history and focused on the history, literary traditions, and religion of ancient Israel within the context of her cultural environs. A major concern was to recognize and explore the implications of the way in which the native biblical and extra-biblical literary traditions rendered account of themselves. The methodology followed in the seminars and the resulting essays is the contextual approach. This approach to the study of biblical history, literature, and religion is concerned not only to discover illuminating and insightful parallels between biblical and extrabiblical sources, but also to note and recognize the implications of significant and important differences."--Jacket.

*Modeling and Using Context* Sep 02 2020 This volume contains the papers presented at the Second International and - terdisciplinary Conference on Modeling and Using Context (CONTEXT'99), held in Trento (Italy) from 9 to 11 September 1999. CONTEXT'99 is the second in the CONTEXT series. The rst was held in Rio de Janeiro (Brazil) in 1997. The CONTEXT conference series is meant to provide an interdisciplinary - rum where researchers can exchange ideas, methodologies, and results on c- text, and is increasingly becoming an important reference for all people doing research on context. This is testi ed by the larger number of research areas that are represented at CONTEXT'99 (in particular, Philosophy and Cognitive Psychology were not signi cantly present at the rst conference), and by the number and quality of submitted papers. Speci cally, we received 118 papers, mostly of good or excellent quality. Among them, 33 (28%) have been accepted as full papers, and 21 as short papers. We think it is fair to say that the 54 papers collected in this volume provide a signi cant picture of the international research on context currently going on. The notion of context plays an important role in many areas, both theoretical and applied, such as Formal Logic, Arti cial Intelligence, Philosophy, Pragm- ics, Computational Linguistics, Computer Science, Cognitive Psychology.

*The Semantic Web* Jan 26 2020 The Annual Asian Semantic Web Conference is one of the largest regional events in Asia with focused topics related to the Semantic Web. With the decade-round endeavor of Semantic Web believers, researchers and practitioners, the Semantic Web has made remarkable progress recently. It has raised significant attention from US and UK governments, as

well as the European Commission who are willing to deploy Semantic Web technologies to enhance the transparency of eGovernment. The Linked Open Data initiative is on its way to convert the current document Web into a data Web and to further enabling various data and service mashups. The fast adoption of Semantic Web technologies in medical and life sciences has created impressive showcases to the world. All these efforts are a crucial step toward enabling the take-off and the success of the Semantic Web. The First Asian Semantic Web Conference was successfully held in China in 2006. With the following editions in Korea in 2007 and Thailand in 2008, it fostered a regional forum for connecting researchers and triggering innovations. This year, the 4th Asian Semantic Web Conference was held in Shanghai, China. We received 63 submissions from Asia, Europe, and North America, and 25 papers were accepted (the acceptance rate is around 40%). Each submission was reviewed by at least three members of the Program Committee. The Chairs moderated the discussion of conflict reviews or invited external reviewers to reach the final decisions.

**Text and Context in Functional Linguistics** Nov 23 2019 The shift towards a sociolinguistic approach to the analysis of language in the last few decades has necessitated new definitions for a number of concepts that linguists have taken for granted for a long time. This volume attempts to demystify the important notions of 'text' and 'context' by providing clear definitions and examples within the assumptions of Systemic Functional (SF) linguistics. After a discussion of the role and significance of context by three eminent SF linguists in section one, the influence of context on text is dealt with in section two 'From Context to Language'. Section three 'From Language to Context' considers textual features and their relationship to contextual factors. All the contributors base their analyses on data collected from a variety of spoken and written registers of contemporary English.

Modeling and Using Context Jan 06 2021 This book constitutes the reviewed proceedings of the Third International Conference on Modeling and Using Context, CONTEXT 2001, held in Dundee, UK in July 2001. The 30 full papers and 15 short papers presented were carefully reviewed, selected, and revised for inclusion in the proceedings. The papers presented deal with the interdisciplinary topic of modeling and using contextual information from various points of view, ranging through cognitive science, formal logic, artificial intelligence and information processing. Highly general philosophical and logical theories are complemented by specific applications in a variety of fields.

Formal Aspects of Context May 22 2022 We welcome Volume 20, Formal Aspects of Context. Context has always been recognised as strongly relevant to models in language, philosophy, logic and artificial intelligence. In recent years theoretical advances in these areas and especially in logic have accelerated the study of context in the international community. An annual conference is held and many researchers have come to realise that many of the old puzzles should be reconsidered with proper attention to context. The volume editors and contributors are from among the most active front-line researchers in the area and the contents shows how wide and vigorous this area is. There are strong scientific connections with earlier volumes in the series. I am confident that the appearance of this book in our series will help secure the study of context as an important area of applied logic. D.M.Gabbay INTRODUCTION This book is a result of the First International and Interdisciplinary Conference on Modelling and Using Context, which was organised in Rio de Janeiro in January 1997, and contains a selection of the papers presented there, refereed and revised through a process of anonymous peer review. The treatment of contexts as bona-fide objects of logical formalisation has gained wide acceptance in recent years, following the seminal impetus by McCarthy in his Turing award address.

**Rethinking Education for Sustainable Development in a Local Community Context** Apr 28 2020 This book bridges the gap between Education for Sustainable Development and community development and examines the contributions of critical environmental education as a theoretical framework to the policy, research, and practice of Education for Sustainable Development. The book investigates what Education for Sustainable Development really means when it happens from the perspectives of a marginalized individual at the very bottom of society in a local community, where there is no such 'educational' institution, no policy or no curriculum to support the effort, but there is the necessity of learning and empowerment for changing the situation. In particular, drawing on the experience of the indigenous Ainu fisherman, it critically examines the theoretical foundation of Education for Sustainable Development, critical environmental education, investigating methodologically and epistemologically the relevance and efficacy of critical environmental education to socially critical approaches to Education for Sustainable Development in a community development context. And this investigation leads to develop a praxis framework for socially critical Education for Sustainable Development in a community development context so that both fields would be mutually supportive to strengthen the practices.

**The New Testament for English readers: containing the Authorized version, with marginal corrections of readings and renderings; and a comm. by H. Alford** Oct 15 2021

*Modeling and Using Context* Mar 20 2022 Here are the refereed proceedings of the 6th International and Interdisciplinary Conference on Modeling and Using Context. The 42 papers deal with the interdisciplinary topic of modeling and using context from various perspectives, including computer science, artificial intelligence, cognitive science, linguistics, organizational science, philosophy, and psychology. In addition, readers discover applications in areas such as medicine and law.

**Abduction, Belief and Context in Dialogue** Aug 01 2020 Language is always generated and interpreted in a certain context, and the semantic, syntactic, and lexical properties of linguistic expressions reflect this. Interactive language understanding systems, such as language-based dialogue systems, therefore have to apply contextual information to interpret their inputs and to

generate appropriate outputs, but are in practice very poor at this. This book contains a number of studies in Computational Pragmatics, the newly emerging field of study of how contextual information can be effectively brought to bear in language understanding and generation. The various chapters center around the conceptual, formal and computational modeling of context in general, of the relevant beliefs of dialogue participants in particular, and of the reasoning that may be applied to relate linguistic phenomena to aspects of the dialogue context. These issues are discussed both from a theoretical point of view and in relation to their roles in prototypical language understanding systems.

**Gun Politics in America: Historical and Modern Documents in Context [2 volumes]** Jun 23 2022 Covering the history of firearms and gun control in America, this two-volume work presents original documents and helps readers understand these documents in relation to the social and political context in which they were written. • Includes coverage of gun control issues and politics from the Colonial era through the Sandy Hook shooting and its aftermath • Gives readers the benefit of reading each actual document, law, or court case and learning about the context in which it was written • Helps readers understand the cultural and political developments that brought America to its current stalemate over guns and gun policies • Presents the voices of activists, lawmakers, and ordinary Americans on both sides of the issue

Our Reason for Being Dec 25 2019 Ecclesiastes is a persuasive speech with a rhetoric so unique that it can be easily misunderstood. It speaks powerfully to believers as well as nonbelievers because it addresses the question of the meaning of life in the most satisfying way. The heart of this book is an expositional commentary that interprets Ecclesiastes as authoritative Scripture. It seeks to recover the rhetoric of the speech in terms of its comprehensive message on the meaning of life as well as its compelling force to get the message across. Preceding the expositional commentary is an introduction to Ecclesiastes that presents a new approach to outlining and reading Ecclesiastes as a coherent speech. It also presents an overview of the “forest”—the overall rhetorical flow of the speech from beginning to end. This is to prevent one from getting lost when immersed in the “trees” of the expositional commentary. Following the expositional commentary are two topical studies to give Ecclesiastes the breadth and depth of coverage it deserves. The first is an interdisciplinary exposition on the meaning of life. The second is an interpretive essay to defend exegetically the interpretation of Ecclesiastes as a coherent speech.
