*The Automotive Industry and European Integration* Jul 16 2021 This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.

*Latin American and Caribbean Trade Agreements* Feb 20 2022 Latin American and Caribbean Trade Agreements: Keys to a Prosperous Community of the Americas is the essential reference guide for companies trading with Latin America and the Caribbean or wishing to use a country in the region as an export platform. This work fills the void in academic texts that are used to teach courses on economic integration in the Western Hemisphere. It provides a road map for the Obama Administration to launch an ambitious project designed to encourage economic growth, promote energy security, and reduce harmful greenhouse gas emissions, while at the same time realistically meeting the development needs of Latin America and the Caribbean. Latin American and Caribbean Trade Agreements: Keys to a Prosperous Community of the Americas posits that the myopic focus of past United States administrations on free markets to spur economic development in the Western Hemisphere is not enough. A bolder and more ambitious project that also seeks to redress many of the deep-seated problems that have long plagued the region is required. The Community of the Americas proposed in this book rests upon the important work that has already been done at the sub-regional level in terms of economic and political reform, identifying infrastructure and human capital needs, and regulating migration. It provides a new and cohesive vision for U.S. policy in Latin America and the Caribbean.

**Lemon-Aid New Cars and Trucks 2012** Aug 05 2020 Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago You can save \$2,000 by cutting freight fees and "administrative" charges Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki

**Imagining Marketing** Feb 08 2021 Imagination is a word that is widely used by marketing practitioners but rarely examined by marketing academics. This neglect is largely due to the imagination's 'artistic' connotations, which run counter to the 'scientific' mindset that dominates marketing scholarship. Of late, however, an artistic 'turn' has taken place in marketing research, and this topical study argues that the mantle of imagination has now passed on from the artist to the marketer. It contends, moreover, that the tools and techniques of artistic appreciation can be successfully applied to all manner of marketplace phenomena. Key features include: \* the treatment of artistic artefacts as a source of marketing understanding \* a detailed discussion surrounding the argument that marketers should adopt more imaginative modes of academic expression \* an analysis of the kind of art that marketing is, and the place of imagination in marketing's artistic palette. This book provokes a new way of thinking about marketing, and will prove invaluable to marketing academics, researchers and practitioners.

**Driving from Japan** Jan 22 2022 This study chronicles the success of the Japanese car in America. Starting with Japan's first gasoline-powered car, the Takuri, it examines early Japanese inventors and automotive conditions in Japan; the arrival of Japanese cars in California in the late 1950s; consumer and media reactions to Japanese manufacturers; what obstacles they faced; initial sales; and how the cars gained popularity through shrewd marketing. Toyota, Honda, Datsun (Nissan), Mazda, Subaru, Isuzu, and Mitsubishi are profiled individually from their origins through the present. An examination follows of the forced cooperation between American and Japanese manufacturers, the present state of the industry in America, and the possible future of this union, most importantly in the race for a more environmentally-sound vehicle.
