**Diskurse und Praktiken der Schulbuchproduktion in der Bundesrepublik Deutschland und England am Beispiel von Afrikawissen** Jul 26 2022 Was ist aus Schulbüchern über Afrika zu lernen und woher kommen diese Wissensbestände? Schulbuchproduktion wird in diesem Band als Knotenpunkt gesellschaftlicher Diskurse und Praktiken verstanden und Schulbuchwissen im Kontext seiner Produktionsbedingungen sowie der gesellschaftlichen Debatten analysiert. Mit Blick auf die Schulbuchproduktion wird gezeigt, dass die Vorstellung, dass Schulbücher in einem Top-down-Modell produziert werden, relativiert werden muss. Zudem wird sichtbar, wie viele unterschiedliche Akteurinnen und Akteure im Bildungsbereich um Afrikawissen rangen. Lars Müller zeichnet das Spektrum des Sagbaren in Bezug auf Afrikawissen nach und zeigt, wie sich manche Wissensbestände durchsetzen und andere randständig blieben. What can we learn about Africa from textbooks, and where does this knowledge originate? This study locates textbook production at the intersection of societal discourse and practice, and analyses textbook knowledge in the context of its production conditions as well as debates within society. Focusing particularly on textbook production, Müller's study critically questions the common assumption that textbooks are produced in a top-down model and calls for this premise to be relativised. It also shows how many different actors contend to define knowledge about Africa within the education sector. Ultimately, this book traces the spectrum of what is considered utterable in regard to knowledge about Africa and shows how certain knowledge corpora have become prominent and others marginalised.

**Why Geography Matters** Apr 23 2022 In recent years our world has seen transformations of all kinds: intense climate change accompanied by significant weather extremes; deadly tsunamis caused by submarine earthquakes; unprecedented terrorist attacks; costly wars in Iraq and Afghanistan; a terrible and overlooked conflict in Equatorial Africa costing millions of lives; an economic crisis threatening the stability of the international system. Is there some way we can get our minds around these disparate global

upheavals, to grasp these events and their interconnections, and place our turbulent world in a more understandable light? Acclaimed author Harm de Blij answers this question with one word: geography. In this revised edition of the immensely popular and influential *Why Geography Matters*, de Blij tackles topics from the burgeoning presence of China to the troubling disarray of the European Union, from the dangerous nuclear ambitions of North Korea to the revolutionary Arab Spring. By improving our understanding of the world's geography, de Blij shows, we can better respond to the events around us, and better prepare ourselves to face the global challenges ahead. Peppering his writing with anecdotes from his own professional travels, de Blij expands upon his original argument, offering an updated work that is as engaging as it is eye-opening. Casual students of geography and professional policy-makers alike will benefit from this stimulating and crucial perspective on geography and the way it shapes our world's events. America, de Blij warns, has become the world's most geographically illiterate society of consequence. Indeed, despite increasing global interconnectivity and rapid change, Americans seem to be less informed and less knowledgeable about the rest of the world than ever. In this compelling volume, de Blij shows why this dispiriting picture must change, and change now.

**Powerful Geography** Dec 27 2019 In recent years the emphasis has shifted away from a focus on pedagogy (the how of teaching) and towards curriculum (the what of teaching). Ofsted's revised inspection framework reflects this shift, and their plans to -deep dive- into subject areas - meaning that teachers and department heads now need a much greater understanding of curricular structures - leave many educators having to think about their subject in new ways. Luckily for geography teachers, however, bestselling author Mark Enser provides plenty of insightful, subject-specific guidance in this all-encompassing book. Mark explores both the purpose of the geography curriculum and its various applications in practice. He details how teachers can take their students' learning beyond the acquisition of knowledge to transform how they see the world. He also tackles the changing nature of school geography, shares a variety of case studies, and offers his take on how best to facilitate geographical enquiry and fieldwork. The first part of the book considers the issue of purpose by looking at the role of the school in society and then shows the place that geography occupies within it. It also considers the history of the subject so as to help geography teachers better understand where they stand today, and concludes by discussing how the concepts of powerful knowledge and GeoCapabilities can help them find their way again. The second part is a practical guide which illustrates how to put this theory of curriculum purpose into practice. It explores the steps which must be taken to create a powerful geography curriculum by deciding on content and places to be studied, putting the components into a sequence and then using all this to do geography. It will also discuss the extent to which teachers need to consider the future and respond to the concerns of the wider world when planning the curriculum. Suitable for department heads and classroom teachers of geography in secondary schools and subject leads in primary schools. Powerful Geography was Highly Commended in the Geographical Association Awards 2022.
