[Mineral Resource Estimation](#) Feb 08 2021 Mineral resource estimation has changed considerably in the past 25 years: geostatistical techniques have become commonplace and continue to evolve; computational horsepower has revolutionized all facets of numerical modeling; mining and processing operations are often larger; and uncertainty quantification is becoming standard practice.

Recent books focus on historical methods or details of geostatistical theory. So there is a growing need to collect and synthesize the practice of modern mineral resource estimation into a book for undergraduate students, beginning graduate students, and young geologists and engineers. It is especially fruitful that this book is written by authors with years of relevant experience performing mineral resource estimation and with years of relevant teaching experience. This comprehensive textbook and reference fills this need.

Hope for the Future Aug 22 2019 This publication details components of California's statewide plan for educating homeless children and youth. Revisions of the original plan were based on data derived from statewide surveys of school districts and shelters conducted in 1988, 1989, and 1990. The 1990 amendments to the Stewart B. McKinney Homeless Assistance Act of 1987 focus more on what is happening or should be happening locally to ensure that homeless children are able to attend and remain in school. A particular concern is the lack of awareness that prevents homeless children from receiving the same educational opportunities as their peers. Following the preface, the introduction describes the basis and purpose of The State Plan for Educating Homeless Children and Youth. The next five sections present information and recommendations for state- and local-level responsibilities. Information is presented on developing and implementing the plan; resolving disputes about placement; eliminating barriers to educating homeless children and youth; providing equal access to educational programs and services; and promoting, implementing, and monitoring the plan. Appendices contain the Stewart B. McKinney Homeless Assistance Act, a legal advisory on applying residency requirements to homeless children, and lists of advisory committee members for 1988-89 and 1990-91. (LMI)

**Changing the Grade** Dec 18 2021 Many educators agree that the 100-point grading model is not always a reliable way to evaluate student learning. But is there another way to more accurately and equitably grade students and provide high-quality information to parents while fostering student learning? If so, why haven't school districts across the country changed their practices? In *Changing the Grade*, author and educator Jonathan Cornue presents a detailed model for developing a more reliable, standards-based grading system—including 30 steps to guide you through the process. In addition to identifying and addressing the barriers to change—such as concerns about how colleges and employers will interpret an alternative grading model—Cornue offers a concrete structure for changing the grading system, providing guidance on: • Thinking in a new way about why grades are given and the purpose of a report card grade; • Identifying what needs to be changed and what actions must be taken to facilitate the change; • Building a team of stakeholders—including teachers, principals, and guidance counselors—to lead the change process; • Developing the new standards-based grading structure; • Designing standards-based assignments and assessments that align with a new grading structure; • Avoiding grade inflation; and • Getting buy-in from teachers and other staff members, principals, administrators, the board of education, and the community by demonstrating that the change process is intentional, research-based, student-focused, and permanent. The book also includes helpful samples of standards-based gradebooks, homework assignments, rubrics, and report cards. If you are interested in making a systemic and systematic shift to a high-quality grading structure that is far less subjective than many commonly found in schools, consider *Changing the Grade*.
