This research-based resource gives practitioners a nuts-and-bolts guide to designing and evaluating prevention programs in mental health that are culturally relevant and aimed at reducing the number of new problems that occur. Key Features Employs a 10-step prevention program development and evaluation model that emphasizes the concepts of community, collaboration, and cultural relevance Offers a brief, practical, how-to approach that is based on rigorous research Identifies specific prevention program development and evaluation steps Highlights examples of "everyday prevention" practices as well as concrete prevention programs that have proven, effective implementation Promotes hands-on learning with practical exercises, instructive figures, and a comprehensive reference list Intended Audience Written in a straightforward and accessible style, Prevention Program Development and Evaluation can be used as a core text in undergraduate courses devoted to prevention or in graduate programs aimed at practice issues. Current practitioners or policymakers interested in designing prevention programs will find this book to be an affable guide.*

*Emotional Intelligence in Education Jul 16 2021 This book highlights current knowledge, best practices, new opportunities, and difficult challenges associated with promoting emotional intelligence (EI) and social-emotional learning (SEL) in educational settings. The volume provides analyses of contemporary EI theories and measurement tools, common principles and barriers in effective EI and SEL programming, typical and atypical developmental considerations, and higher-level institutional and policy implications. It also addresses common critiques of the relevance of EI and discusses the need for greater awareness of sociocultural contexts in assessing and nurturing EI skills. Chapters provide examples of effective EI and SEL programs in pre-school, secondary school, and university contexts, and explore innovative applications of EI such as bullying prevention and athletic training. In addition, chapters explore the implications of EI in postsecondary, professional, and occupational settings, with topics ranging from college success and youth career readiness to EI training for future educators and organizational leaders. Topics featured in this book include: Ability and trait EI and their role in coping with stress, academic attainment, sports performance, and career readiness. Implications of preschoolers' emotional competence for future success in the classroom. Understanding EI in individuals with exceptionalities. Applications of school-based EI and SEL programs in North America and*

Europe. Policy recommendations for social-emotional development in schools, colleges and universities. Developing emotional, social, and cognitive competencies in managers during an MBA program. Emotional intelligence training for teachers. Cross-cultural perspective on EI and emotions. Emotional Intelligence in Education is a must-have resource for researchers, professionals, and policymakers as well as graduate students across such disciplines as child and school psychology, social work, and education policy. **Security-Related Advanced Technologies in Critical Infrastructure Protection Aug 17 2021** This book collects the latest research results on security-related advanced technologies. The chapters contain relevant and interesting topics from numerous research. Data science and artificial intelligence research nowadays one of the most important topics for the industry and the security sectors. The autonomy and counter-autonomy research topic are also very interesting. Autonomous cars have become a part of the common days, but their safe and secure application is not assured. The research results in this field want to support and assure safe and secure autonomous applications in our quotidian life. Also, the safe and secure robotics in the industries and the defence assure a high standard of living and the given research results in this area can use to increase it. The researchers work on it and publish the results that can be interesting for the other researchers and the innovators, but also the industrial part members. The researchers work on it and publish the results that can be interesting for the other researchers and the innovators, but also the industrial part members. Communication is a part of our life, but the communication systems mesh all around the world. Communication is the basis of modern life because without it life stop. One other interesting and very important research area is the material sciences. Virtual life cannot exist without hardware and materials. The new technical applications require new materials, that can suffice the mechanical and physical, chemical properties demand. Nowadays a common requirement of the materials the high strength and lightweight. Researchers want to serve the industrial requests and innovate new composite materials or increase the properties of the material through a new technological process. The authors publish the latest results of the security-related research area including the newest innovations and technologies which rise the interest of the defence and the modern industries even the interest of other researchers.

When It Is Darkest Jan 10 2021 'Read this incredible book. I wept and I learnt' - Prof Tanya Byron 'This book comes from the heart' - Roman Kemp 'Compassionate, personal and thought-provoking' - Prof Steve Peters When you are faced with the unthinkable, this is the book you can turn to. Suicide is baffling and devastating in equal measures, and it can affect any one of us: one person dies by suicide every 40 seconds. Yet despite the scale of the devastation, for family members and friends, suicide is still poorly understood. Drawing on decades of work in the field of suicide prevention and research, and having been bereaved by suicide twice, Professor O'Connor is here to help. This book will untangle the complex reasons behind suicide and dispel any unhelpful myths. For those trying to help someone vulnerable, it will provide indispensable advice on communication, stressing the importance of listening to fears and anxieties without judgment. And for those who are struggling to get through the tragedy of suicide, it will help you find strength in the darkest of places.

Evaluation of Parenting Capacity in Child Protection Oct 19 2021 Forensic mental health assessment (FMHA) has grown into a specialization informed by research and professional guidelines. This series presents up-to-date information on the most important and frequently conducted forms of FMHA. The 19 topical volumes address best approaches to practice for particular types of evaluation in the criminal, civil, and juvenile/family areas. Each volume contains a thorough discussion of the relevant legal and psychological concepts, followed by a step-by-step description of the assessment process from preparing for the evaluation to writing the report and testifying in court. Volumes include the following helpful features: - Boxes that zero in on important information for use in evaluations - Tips for best practice and cautions against common pitfalls - Highlighting of relevant case law and statutes - Separate list of assessment tools for easy reference - Helpful glossary of key terms for the particular topic In making recommendations for best practice, authors consider empirical support, legal relevance, and consistency with ethical and professional standards. These volumes offer invaluable guidance for anyone involved in conducting or using forensic evaluations. This book addresses evaluations for child protection, one of the most delicate legal arenas in which forensic mental examiners play a part. The evaluations are highly specialized, requiring child clinical specialization, a knowledge of the legal and social context, and a thorough understanding of the professional and ethical guidelines for child protection evaluations. This volume provides the foundation that any mental health professional needs when pursuing specialization in evaluating children and parents before the court in child abuse and neglect cases.

Cultural Competence in Health Jun 02 2020 This resource supports evidence-informed approaches to improving the cultural competence of health service delivery. By reviewing the evidence from Australia, Canada, New Zealand and the US, it provides readers with a clear and systematic overview of the interventions and indicators applied to enable health system agencies and professionals to work effectively in various cross-cultural health care situations. The book highlights the importance of cultural competence and describes the current situation in the studied countries; identifies effective approaches and strategies for improving the situation; reviews the indicators for measuring progress; assesses the health outcomes associated with cultural competence; summarizes the quality of the evidence; and presents an evidence-informed conceptual framework for cultural competence in health. Cultural competence is critical to reducing health disparities and has become a popular concept in these

countries for improving access to high-quality, respectful and responsive health care. This book provides policy makers, health practitioners, researchers and students with a much needed summary of what works to improve health systems, services and practice.

**Cognitive Aging Nov 27 2019** For most Americans, staying "mentally sharp" as they age is a very high priority. Declines in memory and decision-making abilities may trigger fears of Alzheimer's disease or other neurodegenerative diseases. However, cognitive aging is a natural process that can have both positive and negative effects on cognitive function in older adults - effects that vary widely among individuals. At this point in time, when the older population is rapidly growing in the United States and across the globe, it is important to examine what is known about cognitive aging and to identify and promote actions that individuals, organizations, communities, and society can take to help older adults maintain and improve their cognitive health. *Cognitive Aging* assesses the public health dimensions of cognitive aging with an emphasis on definitions and terminology, epidemiology and surveillance, prevention and intervention, education of health professionals, and public awareness and education. This report makes specific recommendations for individuals to reduce the risks of cognitive decline with aging. Aging is inevitable, but there are actions that can be taken by individuals, families, communities, and society that may help to prevent or ameliorate the impact of aging on the brain, understand more about its impact, and help older adults live more fully and independent lives. Cognitive aging is not just an individual or a family or a health care system challenge. It is an issue that affects the fabric of society and requires actions by many and varied stakeholders. *Cognitive Aging* offers clear steps that individuals, families, communities, health care providers and systems, financial organizations, community groups, public health agencies, and others can take to promote cognitive health and to help older adults live fuller and more independent lives. Ultimately, this report calls for a societal commitment to cognitive aging as a public health issue that requires prompt action across many sectors.

Preventing intimate partner violence Oct 26 2019 How can we prevent intimate partner violence (IPV)? And how do we define and measure "success" in preventing it? This book brings together researchers and practitioners from a wide range of fields to examine innovative strategies and programs for preventing IPV. The authors discuss evaluations of current prevention efforts, paying particular attention to underserved groups, including racial and ethnic minorities, immigrants and refugees. Among the issues addressed are primary prevention programs that target adolescents and young adults, strategies designed to engage men and boys, IPV screening in different settings, the impact of the criminalization of IPV on minority populations, restorative justice programs, interventions for women who use violence, and innovative shelter programming to prevent re-victimization. The volume concludes by identifying the gaps in knowledge about effective prevention and highlighting the most promising future directions for prevention research and strategies.
