International Case Studies in Mental Health Nov 27 2019 Senel Poyrazli's and Chalmer Thompson's International Case Studies in Mental Health presents a variety of global cases from both developed and developing countries, detailing descriptions of the people who are seeking help to eliminate their distress and of the exceptional practitioners who provide the help. In most of the cases, the practitioner is someone who shares a similar heritage with her or his help-seeker, and who is influenced at least partly by Western psychotherapy traditions. Each chapter also is a showcase of how scholars pair up with mental health practitioners to create a work that weaves together contextual and individual qualities to inform an understanding of the help-seeker and the intervention. This book aims to help prepare both mental health trainees and practicing professionals to be effective in the provision of healing in their work with people in different regions of the world. Consequently, the authors hope to offer practitioners a glimpse of what can be achieved in these regions by people whose reputations within the respective communities are strong.

**Computer Information Systems** Oct 19 2021 These case studies are part of an on-going curriculum and simulations development project between the College of Saint Scholastica's School of Business and Technology (SBT) and Learning-Games.net ([www.learninggames.net](http://www.learninggames.net)), and are designed to help students explore the field of information systems analysis through case simulations and role-playing game (RPG) scenarios. In addition, they can be used in combination with a queueing theory model and both continuous, as well as discrete-event simulations. The related RPG scenarios focus on real-life systems found in performance and management information systems. In short, through the case studies presented in this collection, students will explore mission critical computer information systems designed to teach and explore

analytic thinking and best practices through operations research modeling methods and solution algorithms.

**Effects of Engagement and Resources on Learning Outcomes in Vocational Colleges: Emerging Research and Opportunities** Nov 19 2021 A main staple of today's world that has played a key role in the development of society is education and institutions of higher learning. An ongoing concern, however, has been the lack of access and resources to superior teaching in developing areas of the world. The revised edition has new cases reflecting the complexity of today's environment at colleges and universities, including the expanded use of social networking and new technology, the rise in mental health issues, and Title IX issues. **The Case Study Handbook** Dec 21 2021 If you're enrolled in an executive education or MBA program, you've probably encountered a powerful learning tool: the business case. But if you're like many people, you may find interpreting and writing about cases mystifying, challenging, or downright frustrating. In "The Case Study Handbook", William Ellet presents a potent new approach for analyzing, discussing, and writing about cases. Early chapters show how to classify cases according to the analytical task they require (solving a problem, making a decision, or forming an evaluation) and quickly establish a base of knowledge about a case. Strategies and templates, in addition to several sample Harvard Business School cases, help you apply the author's framework. Later in the book, Ellet shows how to write persuasive case-analytical essays based on the process laid out earlier. Extensive examples of effective and ineffective writing further reinforce your learning. The book also includes a chapter on how to talk about cases more effectively in class. Any current

or prospective MBA or executive education student needs to read this book.

*Funds of Knowledge in Higher Education* Dec 09 2020 Refining and building on the concept in a sophisticated and multidisciplinary way, this book uses a funds of knowledge approach and connects it to other key conceptual frameworks in education to examine issues related to the access and transition to college, college persistence and success, and pedagogies in higher education. *Assessment Practice in Student Affairs* Aug 17 2021 When *Assessment in Student Affairs* was first published in 1996, readers found a practical context for viewing the power of assessment across the domain of student services. Since then, John H. Schuh and M. Lee Upcraft have received numerous requests for more specific guidance to assessing and communicating the value of student affairs. This manual continues the work begun in their earlier book and provides a full range of tools for conducting effective assessments. The authors begin with an overview of the assessment process and then detail a range of methodologies, approaches, and issues—explaining how to use them and when to recruit expertise from other campus sources. Drawing from the latest practice and a wealth of case studies, they discuss: Qualitative assessment, including how to conduct focus groups Quantitative assessment, including how to select and design instruments Data collection and analysis, including mailed questionnaires, telephone surveys, and Web-based surveys Assessing diverse needs, satisfaction, outcomes, environments, cost effectiveness, and accreditation Specialized assessment studies, including how to review dropouts, graduates, academic success, and group

educational programs Select programs in student services, including first-year programs, recreation programs, financial aid, admissions, residence halls, college unions, health services, career services, counseling services, judicial affairs, and Greek life Organizational and ethical approaches to assessment  
*Minority Student Retention* Mar 12 2021 Student retention continues to be a vexing problem for all colleges and universities. In spite of the money spent on creating programs and services to help retain students until they achieve their academic and personal goals, and graduate, the figures have not improved over time. This is particularly true for minority students, who have a greater attrition rate than majority students.

Demographic information shows that the minority population in the United States is growing at a faster rate than the majority. It is imperative that educational institutions find ways to help improve retention rates for all students but particularly minority students. Retention rates should not differ appreciably among different racial/ethnic groups."The Journal of College Student Retention: Research, Theory and Practice" is the only scholarly, peer-reviewed journal devoted solely to college student retention. It has published many articles on minority student retention, and this topic continues to garner much attention. This book is a compilation of the very best of these articles, selected on the basis of reviews by a cadre of experts in the education field. The articles discuss African American, Latino/Latina, Asian and Asian Pacific, Native American, and biracial students, and institutional commitments to retaining a diverse student population. For those interested in this vital area, the collection will teach and inspire them to achieve greater heights and pay additional attention to retaining minority students in our colleges and universities.

*On the Case* Jul 16 2021 In this seminal book on the construction of case studies in the field of language and literacy, the authors consider in detail what it means to be "on the case". For the novice researcher, this book is an essential manual on how to design and carry out a case study. For the experienced researcher, this

book offers fresh insights into the theoretical issues that underpin qualitative case study research. On the Case features examples from the authors' research with young children and their teachers, demonstrating how any school and any classroom can present a plethora of potential "cases".

**Critical Perspectives on Equity and Social Mobility in Study Abroad** Feb 29 2020 This edited volume brings together the perspectives of a diverse group of international scholars to explore the intersections of study abroad and social mobility.
