The Hudson Jun 23 2019 Frances F. Dunwell presents a rich portrait of the Hudson and of the visionary people whose deep relationship with the river inspires changes in American history and culture. Lavishly illustrated with color plates of Hudson River School paintings, period engravings, and glass plate photography, The Hudson captures the spirit of the river through the eyes of its many admirers. It shows the crucial role of the Hudson in the shaping of Manhattan, the rise of the Empire State, and the trajectory of world trade and global politics, as well as the river's influence on art and architecture, engineering, and conservation.

High Plains Horticulture Apr 25 2022 High Plains Horticulture explores the significant, civilizing role that horticulture has played in the development of farmsteads and rural and urban communities on the High Plains portions of Colorado, Kansas, Nebraska, South Dakota, and Wyoming, drawing on both the science and the application of science practiced since 1840. Freeman explores early efforts to supplement native and imported foodstuffs, state and local encouragement to plant trees, the practice of horticulture at the Union Colony of Greeley, the pioneering activities of economic botanists Charles Bessey (in Nebraska) and Aven Nelson (in Wyoming), and the shift from food production to community beautification as the High Plains were permanently settled and became more urbanized. In approaching the history of horticulture from the perspective of local and unofficial history, Freeman pays tribute to the tempered idealism, learned pragmatism, and perseverance of individuals from all walks of life seeking to create livable places out of the vast, seemingly inhospitable High Plains. He also suggests that, slowly but surely, those that inhabit them have been learning to adjust to the limits of that fragile land. High Plains Horticulture will appeal to not only scientists and professionals but also gardening enthusiasts interested in the history of their hobby on the High Plains.

Dryland Horticulture Jun 15 2021 Sustainable livelihood security of resource poor farmers is the top priority for the nation today. However, there is wide gap in productivity of various horticultural commodities among different eco-regions, where horticulture can play significant role particularly in arid and semi arid regions, it is far below than the potential productivity. Hence, sustained and steady growth in rural income is critical for positive impact on living standard of various stakeholders. Therefore, an appropriate strategy needs to be devised for such climatically vulnerable regions. The net income of farmers can surely be increased by efficient management of nutrient, water and agri-input, integrated horticulture based farming system, better market price realization, post harvest management and value addition, integration of secondary enterprises and thereby improving productivity of arid and semi-arid horticultural crops. In this book, several such interventions are given in the form of various chapters which will be of immense use improving the productivity and profitability of horticultural commodities. Note: T&F does not sell or distribute the hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka. This title is co-published with NIPA.
