Service-Oriented Computing Aug 15 2021 This book constitutes the proceedings of the 15th International Conference on Service-Oriented Computing, ICSOC 2017, held in malaga, Spain, in November 2017. The 33 full papers presented together with 20 short papers and 4 keynotes in this volume were carefully reviewed and selected from 179 submissions. The selected papers cover a wide variety of important topics in the area of service-oriented computing, including foundational issues on service discovery and service-systems design, business process modelling and management, economics of service-systems engineering, as well as services on the cloud, social networks, the Internet of Things (IoT), and data analytics. The chapter "Risk-based Proactive Process Adaptation" is available open access under a CC BY 4.0 license via link.springer.com.

Improving Safety in the Chemical Laboratory Sep 23 2019 This contributed volume provides much-needed practical information for setting up and operating a safe chemical laboratory. The reader will learn to discern whether close calls or non-events have happened, and how to identify and eliminate their causes. The book consists of five chapters. Chapter 1 covers organization for safety in laboratories. Chapter 2 describes precautionary labels, including OSHA, DOT, and other labeling systems, and material safety data sheets. Discussed in chapter 3 is the training and drill of staff, along with a selected bibliography. Chapter 4 covers the physical layout of the laboratory, including protective equipment, communication, ventilation, electrical hazards, storage, and emergencies. The last chapter rounds out the subject of accident prevention with a description of safety inspections and safety audits. Also contained are very extensive appendixes.
