Rethinking Old Age Jun 01 2020 With the aspiration for a long life now achievable for many individuals, the status of old age as a distinct social position has become problematic. In this radical re-examination of the nature of old age, Paul Higgs and Chris Gilleard reveal the emergence of a 'fourth age' that embodies the most feared and marginalised aspects of old age, conceptually linked to and yet distinct from traditional models of old age. Inspired by the authors' ground-breaking work on the third and fourth age and supported by extensive sociological, medical and historical research, Rethinking Old Age offers a unique and timely analysis of the fourth age as a 'social imaginary' that is shaped and maintained by the social, cultural and political discourses and practices that divide later life. It stands as a significant resource for students, academics and practitioners of sociology, ageing studies, gerontology, social policy, health studies, social work and nursing.

Model Choice in Nonnested Families Feb 27 2020 This book discusses the problem of model choice when the statistical models are separate, also called nonnested. Chapter 1 provides an introduction, motivating examples and a general overview of the problem. Chapter 2 presents the classical or frequentist approach to the problem as well as several alternative procedures and their properties. Chapter 3 explores the Bayesian approach, the limitations of the classical Bayes factors and the proposed alternative Bayes factors to overcome these limitations. It also discusses a significance Bayesian procedure. Lastly, Chapter 4 examines the pure likelihood approach. Various real-data examples and computer simulations are provided throughout the text.

Light, Paper, Process Sep 04 2020 From its beginnings, photography has been shaped by the desire to understand and explore the essence of the medium. Light, Paper, Process features the work of seven artists—Alison Rossiter, Marco Breuer, James Welling, Lisa Oppenheim, Chris McCaw, John Chiara, and Matthew Brandt—who investigate the possibilities of analog photography by finding innovative, surprising, and sometimes controversial ways to push light-sensitive photographic papers and chemical processing beyond their limits. A panoply of practices emerges in the work of these artists. Some customize cameras with special lenses or produce images on paper without a camera or film. Others load paper, rather than film, in the camera or create contact-printing with sources of light other than the enlarger, while still others use expired photographic papers and extraneous materials, such as dust and sweat, selected to match the particular subject of the photograph. All of the artists share a willingness to embrace accident and chance. Trial and error contribute to an understanding of the materials and their potential, as do the attitudes of underlying curiosity and inventive interrogation. The act of making each image is like a performance, with only the photographer present. The results are stunning. This lavish publication accompanies an eponymous exhibition on view at the J. Paul Getty Museum from April 14 to September 6, 2015.

She Has Her Mother's Laugh Nov 25 2019 2019 PEN/E.O. Wilson Literary Science Writing Award Finalist "Science book of the year"—The Guardian One of New York Times 100 Notable Books for 2018 One of Publishers Weekly's Top Ten Books of 2018 One of Kirkus's Best Books of 2018 One of Mental Floss's Best Books of 2018 One of Science Friday's Best Science Books of 2018 “Extraordinary”—New York Times Book Review "Magisterial"—The Atlantic "Engrossing"—Wired "Leading contender as the most outstanding nonfiction work of the year"—Minneapolis Star-Tribune Celebrated New York Times columnist and science writer Carl Zimmer presents a profoundly original perspective on what we pass along from generation to generation. Charles Darwin played a crucial part in turning heredity into a scientific question, and yet he failed spectacularly to answer it. The birth of genetics in the early 1900s seemed to do precisely that. Gradually, people translated their old notions about heredity into a language of genes. As the technology for studying genes became cheaper, millions of people ordered genetic tests to link themselves to missing parents, to distant ancestors, to ethnic identities... But, Zimmer writes, “Each of us carries an amalgam of fragments of DNA, stitched together from some of our many ancestors. Each piece has its own ancestry, traveling a different path back through human history. A particular fragment may sometimes be cause for worry, but most of our DNA influences who we are—our appearance, our height, our penchants—in inconceivably subtle ways.” Heredity isn’t just about genes that pass from parent to child. Heredity continues within our own bodies, as a single cell gives rise to trillions of cells that make up our bodies. We say we inherit genes from our ancestors—using a word that once referred to kingdoms and estates—but we inherit other things that matter as much or more to our lives, from microbes to technologies we use to make life more comfortable. We need a new definition of what heredity is and, through Carl Zimmer’s lucid exposition and storytelling, this resounding tour de force delivers it. Weaving historical and current scientific research, his own experience with his two daughters, and the kind of original reporting expected of one of the world’s best science journalists, Zimmer ultimately unpacks urgent bioethical quandaries arising from new biomedical technologies, but also long-standing presumptions about who we really are and what we can pass on to future generations.

Collage May 24 2022 Collage has enjoyed a resurgence in popularity during the twenty-first century, resulting in an explosion of creativity. This showcase of cutting-edge contemporary art from across the globe features galleries of collage by 30 practitioners, from the surreal landscapes of Beth Hoeckel to Fabien Souche's humorous appropriations of pop culture. Each artist has also created a new piece especially for this book—all using the same original image, but with results as wildly diverse as the medium of collage itself. This collection is visual inspiration for art lovers and an appreciation of the transformation of old into new.

Entrepreneurial New Venture Skills Mar 22 2022 As business schools expand their entrepreneurship programs and organizations seek people with entrepreneurial skills, it has become clear that the skills and mindset of an entrepreneur are highly valued in all business contexts. This latest edition of Entrepreneurial New Venture Skills continues to focus on helping students develop entrepreneurial skills, whether they seek to become entrepreneurs or employees. Focusing on the entrepreneurial start-up process, the third edition of Entrepreneurial New Venture Skills takes the reader through the steps of selecting, planning, financing, and controlling the new venture. The authors cover multiple forms of new ventures, as well as ways to utilize entrepreneurial skills in other contexts, encouraging students to engage with the material and apply it to their lives in ways that make sense for them. Skill development features include: Entrepreneurial profiles of small business owners Personal applications for students to apply questions to their new venture or a current business Global and domestic cases Elevator pitch assignments, which put students in the venture capitalist position Application exercises and situations covering specific text concepts Business plan prompts to help students construct a business plan over the course of a semester Featuring pedagogical tools like review questions and learning outcomes, and a full companion website that expands upon skill development and offers instructor resources, the third edition of Entrepreneurial New Venture Skills is the perfect resource for instructors and students of entrepreneurship.

Counter-Terrorism Technologies Sep 16 2021 This book critically discusses the role of technology for counter-terrorism in general, and for securing our vulnerable open societies in particular. It is set against the backdrop of the terrorist threat posed by the combined forces of Al Qaeda and ISIS/Daesh in the foreseeable future. The book commences by illuminating current and foreseeable tactics and weapons used by these implacable enemies – weapons that may well include chemical, biological, radiological and potentially even nuclear (CBRN) devices. In a second part, it introduces technologies already available or in development that promise an increase in safety and security when it comes to the dangers posed by these terrorists. This part also includes a critical discussion of advantages and disadvantages of such technologies that are, quite often, sold as a ‘silver bullet’ approach in the fight against terrorism. Controversies such as those triggered by the abuse of millimeter wave scanners deployed at several Western European airports will demonstrate that there are costs involved with regard to human rights. The third, analytical part takes the critical discussion further by arguing that the uncritical fielding of new surveillance and control technologies in parallel with the on-going outsourcing and privatization of key services of the state could well lead to dystopias as envisaged in a rather prescient way by the so-called cyperpunk novels of the 1980s. The book concludes with the question that any liberal democracy should ask itself: how far can we go with regard to hardening our societies against terrorist threats?

The Archaeology of Tibetan Books Jul 02 2020 Agnieszka Helman-Wa?ny’s Archaeology of Tibetan Books provides a comprehensive guide to the making of Tibetan books. Concerned with the relation of papers, inks, and layout to questions of provenance and dating, this work is a must-have companion to any textual analysis.

Doing Document Analysis Jul 14 2021 Grounded in real examples, this book gives you the skills and confidence to conduct rich, systematic analysis of print and digital documents.

Waste Oct 29 2022 Waste: A Handbook for Management, Second Edition, provides information on a wide range of hot topics and developing areas, such as hydraulic fracturing, microplastics, waste management in developing countries, and waste-exposure-outcome pathways. Beginning with an overview of the current waste landscape, including green engineering, processing principles and regulations, the book then outlines waste streams and treatment methods for over 25 different types of waste and reviews best practices and management, challenges for developing countries, risk assessment, contaminant pathways and risk tradeoffs. With an overall focus on waste recovery, reuse, prevention and lifecycle analysis, the book draws on the experience of an international team of expert contributors to provide reliable guidance on how best to manage wastes for scientists, managers, engineers and policymakers in both the private and public sectors. Covers the assessment and treatment of different waste streams in a single book Provides a hands-on report on each type of waste problem as written by an expert in the field Highlights new findings and evolving problems in waste management via discussion boxes

Anti-fragile ICT Systems May 12 2021 This book introduces a novel approach to the design and operation of large ICT systems. It views the technical solutions and their stakeholders as complex adaptive systems and argues that traditional risk analyses cannot predict all future incidents with major impacts. To avoid unacceptable events, it is necessary to establish and operate anti-fragile ICT systems that limit the impact of all incidents, and which learn from small-impact incidents how to function increasingly well in changing environments. The book applies four design principles and one operational principle to achieve anti-fragility for different classes of incidents. It discusses how systems can achieve high availability, prevent malware epidemics, and detect anomalies. Analyses of Netflix’s media streaming solution, Norwegian telecom infrastructures, e-government platforms, and Numenta’s anomaly detection software show that cloud computing is essential to achieving anti-fragility for classes of events with negative impacts.

Uppsc 2020: Previous Years' Topic-Wise Solved Papers (Paper I 2003-19 & Paper II 2012-19) 2ed Feb 09 2021 This book is a collection of questions of previous years' question papers of UPPCS presented topic-wise. It has been divided into two sections: a and B. Section A: covers General Studies Paper I questions for the years 2003 to 2019 with answer key. Questions have been broadly divided into the following topics: General Science & technology, Indian history, National Movement, Indian Polity, Indian Economy, Agriculture & trade commerce, population, environment & urbanization, Geography of India & world, National & international events, sports & Awards, Uttar Pradesh special, Miscellaneous. Surface and Apparition Jun 20 2019 Surface is one of the most intensely debated topics in recent arts, humanities and social science scholarship. The changing technologies which manufacture the actual and virtual surfaces of today are radically altering our perception of thresholds and borders. In contrast to the responses to preceding industrial revolutions, contemporary concerns with surface seem preoccupied with its function of mediation or passage, rather than with that of separation or boundary. In Surface and Apparition, each chapter explores a different meaning and function of the material and immaterial qualities of 'surface'. Case studies include various surfaces from computer screens, 'artisanal' engines and glass architecture to gauzy veils, the planetary surface of supply chain capitalism, and spatial embodiment in street markets. International scholars of design, architecture, film, media, fine art, fashion, textiles, silversmithing, woodworking and archival practices account for how the

material and the immaterial draw attention to each other in both their everyday and artistic practice. Each chapter addresses particular systems (from the human body to manually operated tools and machines); materials (for instance cloth, wood and light); modes of attention, movement and engagement. 'Surface' therefore functions in this book as a multidisciplinary method for attending to critical issues concerning human creative and technological endeavours.

25 Online JEE Main Year-wise Solved Papers (2019 - 2012) with 5 Online Mock Tests 2nd Edition Mar 30 2020 25 Online JEE Main Year-wise Solved Papers for NTA JEE Main consists of Past Year-wise Solved Papers from 2019 - 2012. The book includes 4 papers of 2019 - 2 of Phase I and 2 of Phase II. It further provides link to the rest of the 12 papers held in 2019. The book contains 2700 past MCQs - 900 each in Physics, Chemistry & Mathematics. The students can also appear in these tests as Practice Sets. The book further provides 5 Online Tests with Insta Results & Solutions. The uniqueness of this book is the authenticity of the questions and originality of the solutions.

The Life History of the Parental Shield Bug, Parastrachia Japonensis Feb 21 2022 This book presents the discoveries made during nearly three decades of research on the parental shield bug, Parastrachia japonensis inhabiting Kyushu Island, Japan. P. japonensis has evolved a unique and fascinating life history, characterized by extreme behavioral and physiological adaptations that have culminated in a singularly dependent relationship with its lone host tree, Schoepfia jasminodora (Olacaceae), which is a generally scarce and unreliable resource. It is expected that the evolution of parental care behaviors in the strictly semelparous P. japonensis was more directly influenced by the benefit to females that arises from enhanced survivorship of current offspring, rather than any possible cost the females might incur in terms of reduced future reproductive success, because no future reproduction is possible. The authors explain how the different parental cares in this species enhance offspring survivorship in the context of the ecological conditions it has experienced over evolutionary time. The book begins with a recap of the earliest studies, the reports through 1991, and then introduces the many fascinating aspects of the life history, neurobiology, physiology and behavior of P. japonensis that have been newly discovered since, and those aspects that have been confirmed through experimentation over the past thirty years. This comprehensive review of information will be useful for comparative studies of parental care in other semelparous and iteroparous organisms experiencing both similar and different ecological constraints. The book will be of academic interest to undergraduate and graduate students of entomology, zoology, behavior, and behavioral ecology.

China's Cyber Warfare Aug 23 2019 The turn of the century was accompanied by two historically significant phenomena. One was the emergence of computer networks as a vital component of advanced militaries and interdependent global economic systems. The second concerned China's rise on the global stage through economic reforms that led to sustained growth and military modernization. At the same time, Chinese government policies and actions have drawn international criticisms including persistent allegations of online espionage, domestic Internet censorship, and an increased military capability, all of which utilize computer networks. These threat perceptions are heightened by a lack of transparency. Unlike the United States or the North Atlantic Treaty Organization, China does not articulate its strategic doctrine. Further, open source material on this topic is often contradictory, cursory, and unclear due, in part, to the absence of consensus on cyber-related terminology and the infancy of this field. With a focus on the period 1998 to 2016, this book identifies and analyzes the strategic context, conceptual framework, and historical evolution of China's cyber warfare doctrine.

ACCA Paper P2 - Corporate Reporting (INT and UK) Practice and revision kit Jun 25 2022 The examiner-reviewed P2 Practice and Revision Kit provides invaluable guidance on how to approach the exam and contains many of the long, case study questions that you will find in the exam. Three mock exams provide you with more essential practice and marking schemes show you how the examiner awards marks.

False Feathers Apr 23 2022 Since human beings have been writing it seems there has been plagiarism. It is not something that sprouted with the advent of the Internet. Teachers have been struggling for years in countries all over the globe to find good methods for dealing with the problem of plagiarizing students. How do we spot plagiarism? How do we teach them not to plagiarize? And how do we deal with those who have been found out to be plagiarists? The purpose of this book is to collect material on the various aspects of plagiarism in education with special attention given to the German problem of dissertation plagiarism. Since there is a wide-spread interest in the German plagiarism situation and in strategies for dealing with it, the book is written in English in order to be accessible to a larger audience.
