[Health Care Turning Point](#) May 08 2021 An expert debunks popular misconceptions about health policy, including the merits of single-payer plans, and offers an alternative. In the battle over health care reform we can try to fashion new policies based on old ideas—or we can acknowledge today's demographic and economic realities. In [Health Care Turning Point](#), health policy expert Roger Battistella argues that the conventional wisdom that dominates health policy debates is out of date. Battistella takes on popular misconceptions about the advantages of single-payer plans, the role of the market, and other health policy issues and outlines a pragmatic new approach. Few would disagree that the current system is broken. But, Battistella asserts provocatively, a government takeover of health insurance patterned after Medicare and Medicaid won't work either. Battistella argues that contrary to popular belief, single-payer coverage will not lower health spending but would encourage overconsumption and drive costs up. If consumers were

responsible for buying their own health insurance (as they are for buying their own car and home insurance), he argues, they'd look for value and demand greater price and quality transparency from providers. The economic shibboleth that the principles of market competition don't apply to health care is nonsense, Battistella says. We won't achieve real health care reform until policy makers adjust to this reality and adopt a more pragmatic view.

[Africa at a Turning Point?](#) Mar 26 2020 Since the mid-1990s, sub-Saharan Africa has experienced an acceleration of economic growth that has produced rising incomes and faster human development. However, this growth contrasts with the continent's experience between 1975 and 1995, when it largely missed out on two decades of economic progress. This disparity between Africa's current experience and its history raises questions about the continent's development. Is there a turnaround in Africa's economy? Will growth persist? 'Africa at a Turning Point?' is a collection of essays that analyzes three interrelated aspects of Africa's

recent revival. The first set of essays examines Africa's recent growth in the context of its history of growth accelerations and collapses. It seeks to answer such questions as, is Africa at a turning point? Are the economic fundamentals finally pointing toward more sustainable growth? The second set of essays looks at donor flows, which play a large role in Africa's growth. These essays focus on such issues as the management and delivery of increased aid, and the history and volatility of donor flows to Africa. The third set of essays considers the recent impact of one persistent threat to sustained growth in Africa: commodity price shocks, particularly those resulting from fluctuations in oil prices.

*Turning Point 1917* Mar 06 2021 For the British Empire and its allies of the Great War, 1917 was a year marked by crises. But here and there glimmers of light pierced the gloom. Soldiers began solving the problems posed by trench warfare. The dominions asserted themselves in the councils of imperial power. And the US finally entered the war. This book examines the British imperial war effort during the most pivotal and dynamic twelve months of the war. Written by internationally recognized historians, its chapters explore military, diplomatic, and domestic aspects of how the empire prosecuted the war. Their rich, nuanced analysis transcends narrow, national viewpoints to provide a multi-faceted perspective of events that laid the groundwork for victory.

**Turning Point** May 28 2020 Dick B. is today regarded as the leading A.A. historian. He is a writer, Bible student, retired attorney, and active recovered member of the A.A. fellowship. He has brought to the history table: (1) His strong belief in the Creator, Christianity, and the Bible as the main source book for truth. (2) His long and fervent work with newcomers in helping them to overcome their alcoholism with the power of God. (3) His talents in writing and research that emerged from his work at the University of California where he received a Phi Beta Kappa key, his editorship of the Stanford Law Review, and his vigorous practice in writing and presenting legal briefs before many many courts. This mid-point treatise had been followed by and added up to 33 A.A. history titles so far. This book is foundational.

Rural Transport Services Oct 21 2019 This book considers the problem of

providing maximum access to transport services, and to roads for the rural population of the world's developing countries when limited funds are available. Access is a key factor in both social and economic development. It promotes social intercourse and opens up markets for both the rural and urban populations. Access connotes the ability to travel and to transport goods. The components of access include both the infrastructure and the transport modes or aids that use the infrastructure.

**Service Success! Lessons From a Leader on How to Turn Around a Service Business** Oct 25 2022 Packed with practical ideas and strategies for service managers, this candid case study demonstrates how to improve performance and profitability in any service business. A success story himself, Kaplan pioneers a radical new system for measuring quality in the service industry.

Is Latin America Turning Protestant? Oct 01 2020 Examines the phenomenal growth of Protestantism in Latin America and how a new politics of redemption is transforming the religious landscape of these countries.

Turning Off the Television Jan 04 2021 Explores the constant shifts in the technologies, business models and social uses of TV and radio, and explains the aspects of broadcast media which have attracted so much government policy attention, as well as what might happen to them in future.

The 21st Century — Turning Point for the Northern Sea Route? Jun 09 2021 by Claes Lykke Ragner, The Fridtjof Nansen Institute Marking the end of the International Northern Sea Route Programme (INSROP), the Northern Sea Route User Conference was organized in Oslo on 18-20 November 1999. The purpose of the Conference was two-fold. First, it was the intention of the organizers to present to the potential users of the Northern Sea Route - i. e. the international shipping industry and relevant cargo owners - the results of six years of multidisciplinary INSROP research. Second, it was the organizers' intention to create a unique meeting place for the different Northern Sea Route stakeholders - a forum where users, the Russian NSR administrators, the researchers

and other interested parties could discuss the status and future of the route. In these Conference Proceedings, you will find the manuscripts of the speeches presented during the Conference: The manuscripts can roughly be divided into three groups with widely different focuses: On one hand, you will find the representatives of shipping and other commercial interests, focusing on the NSR's potential for profit in the short term, and on the shortcomings of the route. On the other hand, you will find representatives of different levels of Russian authorities, presenting the possibilities offered by the route, and emphasizing Russia's long experience in using and administering it. In between these two groups stand the researchers, presenting a multi-faceted and hopefully balanced picture of the NSR and its possibilities vs.

Multimedia Services in Intelligent Environments Feb 05 2021 Multimedia services are now commonly used in various activities in the daily lives of humans. Related application areas include services that allow access to large depositories of information, digital libraries, e-learning and e-education, e-government and e-governance, e-commerce and e-auctions, e-entertainment, e-health and e-medicine, and e-legal services, as well as their mobile counterparts (i.e., m-services). Despite the tremendous growth of multimedia services over the recent years, there is an increasing demand for their further development. This demand is driven by the ever-increasing desire of society for easy accessibility to information in friendly, personalized and adaptive environments. In this book at hand, we examine recent Advances in Recommender Systems. Recommender systems are crucial in multimedia services, as they aim at protecting the service users from information overload. The book includes nine chapters, which present various recent research results in recommender systems. This research book is directed to professors, researchers, application engineers and students of all disciplines who are interested in learning more about recommender systems, advancing the corresponding state of the art and developing recommender systems for specific applications.

**Tables Turned on Them** Apr 26 2020 As the systematic murder of six million Jews by Nazi Germany and its collaborators was taking place,

Jewish soldiers in the United States Army participated in guarding, healing, and reeducating of some of the four hundred thousand German prisoners of war (PW) held in camps scattered across the United States. History has paid little attention to the participation of Jewish GIs at these camps and the role they played in preparing PWs to return and participate in a postwar democratic Germany. Very little is known about the experiences of these Jewish soldiers that prepared them to go face-to-face with German PWs, some of which were hardened Nazi party members. In addition, little is known about how the tour of duty in these camps affected the GIs' postwar lives. It was fifty years after the German PWs returned home that I found an unexpected gift my late parents left me that became a portal to discover stories of individual Jewish men whose deeds should inspire future generations on confronting anti-Semitism and racism. These men did not feel sorry for themselves being assigned to PW camps, did not request transfers, and embraced the change and focused on the things they could control. They viewed their roles not as custodians or babysitters of prisoners but as role models of Jewish men who were fit, trim, educated, held rank, and wanted to do more than just "ride out the war" in the zone of the interior. Their stories are about affecting positive change in the PWs' thinking and behaviors. Their mission of tikkun olam—"repair of the world"—is the subject of this book. How, where, and when they started and completed this mission is unique to each Jewish GI despite them having common basic training in Jewish upbringing and values. It is hoped that this book will inspire other Jewish soldiers who served at PW camps or their family members knowledgeable about their service to step forward and share their experiences. This could lead to a future updated edition of this book.

*Organizational Transformation and Order Reconstruction in "Village-Turned-Communities"* Aug 11 2021 Since the beginning of the 21st century, a state-led urbanization has evolved into a "city management" in China: a large number of villages were demolished; cultivated land was centralized; and peasants went to live in apartments, which led to the widespread emergence of "village-turned-communities". This title

explores the evolving and complex relationship between the urbanization of land and people – two core components of China’s urbanization strategy. What role does the government play in creating conflicts around these two aspects of urbanization? What role can it play in adjudicating them? To answer these questions, the author examines rural migrants’ experience in integrating and being integrated into the cities. Through a three-year investigation in Beijing, Shandong, Wuhan and Yunnan, the author shows how government policies can either engender or mitigate conflicts, as well as identifies integrated governance as an effective approach to urbanization of both land and people. This title is awarded the top ten Chinese sociology books in 2019. Students and scholars of sociology, politics and public administration will benefit from this book.

Turning Point Aug 31 2020 This text discusses the current basis of economic growth, concluding that it is failing to deliver, and is actually harming our prospects for future security. Further arguments propose a possible long-term strategy for economic revival - eco-restructuring. This strategy involves a shifting away from production of goods to production of services, closing material cycles and eliminating reliance on non-renewable resources.

**Turning Point** Jul 30 2020 First Published in 1997. Routledge is an imprint of Taylor & Francis, an informa company.

*Still Turning* Feb 17 2022 The Aermotor Windmill Company, which commenced operations in Chicago in 1888, is the nation’s sole remaining full-time manufacturer of water-pumping machines. The company’s imprint on rural America, particularly across the West, is still visible today in the tens of thousands of its windmills that bring water to the earth’s surface. *Still Turning* is the first book to explore the rise of the American windmill through the experience of this important company. Aermotor founder La Verne Noyes and engineer Thomas Perry developed and perfected the all-metal wind pump in the 1880s. Within a decade, the “mathematical windmill” began to dominate the market. Aermotor continued to expand and innovate. The ruggedness and simplicity of the

American mechanical windmill has allowed it to outlast many newer water-pumping technologies over the years with minimal maintenance and oversight. Christopher C. Gillis traces this story and more, from the early days of the company to Aermotor’s present-day relevance as it continues to produce its iconic windmills. *Still Turning* is a significant contribution not only to the history of wind power but also to the history of American enterprise.

**The Asian Turn in Foreign Investment** Jul 18 2019 This collection critically discusses the increasing significance of Asian States in the field of international investment law and policy. Consisting of contributions authored by a leading team of scholars and practitioners of international investment law, this volume contains analyses of both national and multilateral investment law rule-making in Asia, including a critical discussion of certain States' approaches to balancing the different tension between investment protection and the preservation of States' regulatory sovereignty. It also contains thematic chapters on cutting-edge developments which are of relevance to Asia as well as the global community, such as investors' obligations of due diligence, additional transparency in treaty-based investment arbitration responses by ASEAN member States to transboundary haze pollution, and the relevance of human rights obligations in international investment law. It also contemplates future possibilities for investor-State dispute settlement, including the use of investor-State mediation in view of the Singapore Convention on Mediation.

**Traffic Engineering Handbook** Sep 19 2019 Get a complete look into modern traffic engineering solutions *Traffic Engineering Handbook, Seventh Edition* is a newly revised text that builds upon the reputation as the go-to source of essential traffic engineering solutions that this book has maintained for the past 70 years. The updated content reflects changes in key industry standards, and shines a spotlight on the needs of all users, the design of context-sensitive roadways, and the development of more sustainable transportation solutions. Additionally, this resource features a new organizational structure that promotes a more

functionally-driven, multimodal approach to planning, designing, and implementing transportation solutions. A branch of civil engineering, traffic engineering concerns the safe and efficient movement of people and goods along roadways. Traffic flow, road geometry, sidewalks, crosswalks, cycle facilities, shared lane markings, traffic signs, traffic lights, and more—all of these elements must be considered when designing public and private sector transportation solutions. Explore the fundamental concepts of traffic engineering as they relate to operation, design, and management Access updated content that reflects changes in key industry-leading resources, such as the Highway Capacity Manual (HCM), Manual on Uniform Traffic Control Devices (MUTCD), AASHTO Policy on Geometric Design, Highway Safety Manual (HSM), and Americans with Disabilities Act Understand the current state of the traffic engineering field Leverage revised information that homes in on the key topics most relevant to traffic engineering in today's world, such as context-sensitive roadways and sustainable transportation solutions Traffic Engineering Handbook, Seventh Edition is an essential text for public and private sector transportation practitioners, transportation decision makers, public officials, and even upper-level undergraduate and graduate students who are studying transportation engineering.

**Smart Strategies for Turning an Idea into a Product or Service** Jul 22 2022 Turning an idea into a product or service takes dedication and perseverance, but the best part is anyone can do it. This savvy volume presents practical ways for becoming an entrepreneur and starting a business, including researching ideas, products, and services, as well as compiling a business plan and details to include in it, market research and testing, calculating start-up costs, finding funds for investment in the business, keeping costs under control, patent protection, insurance, manufacturing costs and building on service, licensing, hiring employees, advertising (including Internet marketing), keeping up with demand, and maintaining focus on a thriving business.

*Turning rural economy into vibrant economy* Dec 15 2021

**Capacity and Operational Effects of Midblock Left-turn Lanes** Feb 23 2020 The objective of this research project was to develop a

methodology for evaluating alternative midblock left-turn treatments on urban and suburban arterials. The methodology had to be applicable to three common midblock left-turn treatments: the raised-curb median, the flush median with two-way left-turn lane (TWLTL) delineation, and the undivided cross section. The methodology developed for this research focuses on the evaluation of midblock street segments on urban and suburban arterials. The basis for NCHRP Report 395.

Turning Troubles into Problems Nov 02 2020 Human service professionals deal with a wide range of problems, from child abuse, parenting issues, and elderly care, to addictions, mental illness, sexual assault, unemployment, and criminality. These must be constructed as problems for professionals to appropriately respond to them. Human service provision starts from there. But in the everyday experience of service providers and users alike, there is a parallel world of ordinary troubles that remains professionally undefined but real, even when troubles are turned into problems. This book brings into view the relationship between these worlds as it bears on the process of clientization—the transformation of people and troubles into clients and problems. Rather than taking the process for granted as many critics do, the book examines the instability of the process on several fronts and highlights its surprising local complexity. Foregrounding everyday life, the leading idea is that the transformation of troubles into problems is not straightforward and that problems are continually subject to alternative understandings. This poses new what, how, and where questions. What are ordinary troubles and how do they relate to the construction, maintenance, or undoing of serviceable problems? Where is social policy and how does that figure in the front-line work of service provision? The questions point to the challenges of clientization at the discretionary border of troubles and problems in everyday service relationships. With chapters written by an international group of human service researchers, this book is an important contribution to the literature dealing with the construction of personal problems and will be useful to students and academics in sociology, human services, social work and policy, criminal justice, and health care.

**The Complexity Turn** Jan 24 2020 This book takes the reader beyond net effects and main and interaction effects thinking and methods. Complexity theory includes the tenet that recipes are more important than ingredients—any one antecedent (X) condition is insufficient for a consistent outcome (Y) (e.g., success or failure) even though the presence of certain antecedents may be necessary. A second tenet: modeling contrarian cases is useful because a high or low score for any given antecedent condition (X) associates with a high Y, low Y, and is irrelevant for high/low Y in some recipes in the same data set. Third tenet: equifinality happens—several recipes indicate high/low outcomes.

**Turning Point 9.11** Nov 21 2019

*Agreements Between Railway Employes and Railway Officials* May 20 2022

**Turning Turnover Around** Nov 14 2021 The costs of employee turnover can be staggering. Not only do they include fully-loaded payroll costs of a vacant position, but they can also rack up overtime and consume managers' time to recruit and train new hires. Add in lost productivity, and you have a major problem. Reducing employee turnover will clearly improve how your business functions and performs financially. In *Turning Turnover Around*, Mark Vornrhein synthesizes years of experience working with hundreds of entry-level employees. Vornrhein has successfully used a five-point plan—the Performance Compensation Program—to increase productivity, keep employees happy, and increase profitability. The Plan is straightforward. Start entry-level employees below industry average salaries, then clearly define performance goals and post performance results daily. Then, give feedback on a regular basis, and reward your high-performers with incremental, and typically more frequent, pay raises. To supplement his program, Vornrhein provides wage models that help you match an employee's pay level to his or her performance. He also shares a wealth of information on the program's impact, which ranges from more engaged and productive workers, to a healthier bottom line. Combine Vornrhein's program with his "management tune-up" tips and you'll soon see turnover turning around.

**Turning Data into Insight with IBM Machine Learning for z/OS** Jun 21 2022 The exponential growth in data over the last decade coupled with a drastic drop in cost of storage has enabled organizations to amass a large amount of data. This vast data becomes the new natural resource that these organizations must tap in to innovate and stay ahead of the competition, and they must do so in a secure environment that protects the data throughout its lifecycle and data access in real time at any time. When it comes to security, nothing can rival IBM® Z, the multi-workload transactional platform that powers the core business processes of the majority of the Fortune 500 enterprises with unmatched security, availability, reliability, and scalability. With core transactions and data originating on IBM Z, it simply makes sense for analytics to exist and run on the same platform. For years, some businesses chose to move their sensitive data off IBM Z to platforms that include data lakes, Hadoop, and warehouses for analytics processing. However, the massive growth of digital data, the punishing cost of security exposures as well as the unprecedented demand for instant actionable intelligence from data in real time have convinced them to rethink that decision and, instead, embrace the strategy of data gravity for analytics. At the core of data gravity is the conviction that analytics must exist and run where the data resides. An IBM client eloquently compares this change in analytics strategy to a shift from "moving the ocean to the boat to moving the boat to the ocean," where the boat is the analytics and the ocean is the data. IBM respects and invests heavily on data gravity because it recognizes the tremendous benefits that data gravity can deliver to you, including reduced cost and minimized security risks. IBM Machine Learning for z/OS® is one of the offerings that decidedly move analytics to Z where

*Where To Download [dl3.pling.com](https://dl3.pling.com) on November 26, 2022 Read Pdf Free*

your mission-critical data resides. In the inherently secure Z environment, your machine learning scoring services can co-exist with your transactional applications and data, supporting high throughput and minimizing response time while delivering consistent service level agreements (SLAs). This book introduces Machine Learning for z/OS version 1.1.0 and describes its unique value proposition. It provides step-by-step guidance for you to get started with the program, including best practices for capacity planning, installation and configuration, administration and operation. Through a retail example, the book shows how you can use the versatile and intuitive web user interface to quickly train, build, evaluate, and deploy a model. Most importantly, it examines use cases across industries to illustrate how you can easily turn your massive data into valuable insights with Machine Learning for z/OS.

**The Turning Point** Apr 19 2022 The Turning Point is the first comprehensive chronicle of the contributions made by conscientious objectors who volunteered for service in America's mental hospitals and state institutions for the developmentally disabled during World War II. It brings together excerpts from Life, Reader's Digest, and The Cleveland Press, as well as letters and personal reminiscences that recall the shock and distress of conscientious objectors at the conditions in state mental hospitals.

*Crisis Investor: Turning Financial Calamities Into Profitable*

*Opportunities Successfully* Apr 07 2021 Have you ever wondered how investors, businesspersons, and entrepreneurs became billionaires out of the Financial Crisis of 2008? Have you ever pondered why there were more millionaires created out of the Great Depression than at any other time in U.S. history? How did these successful people do it? The majority of successful crisis investors are not the speculators on Wall Street; a crisis speculator has the same odds of winning as a gambler in Las Vegas. The majority of crisis investors are ordinary people, like you and me, who protected their family and capital from a crisis, bought distressed, undervalued assets during the crisis, and generated new innovative products, businesses, and industries that changed the world for the better. My purpose for this book is to educate, inform, and raise

awareness to help individuals protect themselves from a crisis, and to better their livelihood and community. Read my thoughts of a crisis in 2016, 2017, & 2018

**Turn To Me** Dec 03 2020 Most devotionals tend to be "happy," Hallmark card, feel good writings with little to no Scripture foundation. There is nothing wrong with these, but if you are hungering and thirsting for daily devotionals saturated in the Word, then Turn to Me is that kind of daily devotional book. These daily devotionals are almost like mini-sermons to fill in your day with the Word of God. Turn to Me is a turning to God's timeless Word and letting it shape your life today.

Winning at the Turning Point Aug 23 2022 This book by influential policymaker Chi Fulin lays out in issue-oriented and detailed chapters, at a time when China is at a crossroads, exactly how the government plans to deal with the social, political and economic issues the world's second-largest economy faces. From managing the decline of industry, to urbanization, to managing consumption, to social security and education, Chi offers a roadmap for the years ahead. This book will be particularly fascinating to Western scholars of China who speculate on the inner workings of the Chinese policymaking elite, with the ambition of China's central planners here laid out for the world to see.

Turning Prayers into Protests Jul 10 2021 Turning Prayers into Protests is a comparative study of religious-based oppositional activity in Slovakia and East Germany prior to 1989. Religion was a central arena for culture, thought, and social organization in the societies that became communist after the Second World War. It was thus a primary concern for communist regimes. The author examines the various and divergent grass-roots activism of the secret Catholic Church in Slovakia and the Lutheran Church in East Germany that confronted state socialist rule and contributed to its eventual dismantling. He compares the two cases in terms of the political power, influence and affect that these Churches had in regard to state repression or cooptation, vividly demonstrating that religion could provide a space for independence beyond state control as well as a foundation for resistance.

*Advances in Production Management Systems. Smart Manufacturing and Logistics Systems: Turning Ideas into Action* Sep 12 2021 This two-volume set, IFIP AICT 663 and 664, constitutes the thoroughly refereed proceedings of the International IFIP WG 5.7 Conference on Advances in Production Management Systems, APMS 2022, held in Gyeongju, South Korea in September 2022. The 139 full papers presented in these volumes were carefully reviewed and selected from a total of 153 submissions. The papers of APMS 2022 are organized into two parts. The topics of special interest in the first part included: AI & Data-driven Production Management; Smart Manufacturing & Industry 4.0; Simulation & Model-driven Production Management; Service Systems Design, Engineering & Management; Industrial Digital Transformation; Sustainable Production Management; and Digital Supply Networks. The second part included the following subjects: Development of Circular

Business Solutions and Product-Service Systems through Digital Twins; "Farm-to-Fork" Production Management in Food Supply Chains; Urban Mobility and City Logistics; Digital Transformation Approaches in Production Management; Smart Supply Chain and Production in Society 5.0 Era; Service and Operations Management in the Context of Digitally-enabled Product-Service Systems; Sustainable and Digital Servitization; Manufacturing Models and Practices for Eco-Efficient, Circular and Regenerative Industrial Systems; Cognitive and Autonomous AI in Manufacturing and Supply Chains; Operators 4.0 and Human-Technology Integration in Smart Manufacturing and Logistics Environments; Cyber-Physical Systems for Smart Assembly and Logistics in Automotive Industry; and Trends, Challenges and Applications of Digital Lean Paradigm.

Last One Out Turn Off the Lights Jun 28 2020 This collection of thought-provoking essays challenges librarians to consider the future of the profession, particularly as it relates to the Web, the library as place, delivering services to the desktop, certification, and the future of professional associations.

Turning Teaching Inside Out Jan 16 2022 Using the successful Inside-Out program, in which incarcerated and non-incarcerated college students are taught in the same classroom, this book explores the practice of community-based learning, including the voices of teachers and participants, and offers a model for courses, student life programs, and faculty training.
