Annual Review of South Asian Languages and Linguistics Sep 23 2019 South Asia is home to a large number of languages and dialects. Although linguists working on this region have made significant contributions to our understanding of language, society, and language in society on a global scale, there is as yet no recognized international forum for the exchange of ideas amongst linguists working on South Asia. The Annual Review of South Asian Languages and Linguistics is designed to be just that forum. It brings together empirical and theoretical research and serves as a testing ground for the articulation of new ideas and approaches which may be grounded in a study of South Asian languages but which have universal applicability. Each volume will have three major sections: I. Invited contributions consisting of state-of-the-art essays on research in South Asian languages. II. Refereed open submissions focusing on relevant issues and providing various viewpoints. III. Reports from around the world, book reviews and abstracts of doctoral theses.

The Syntax of Relative Clauses Oct 25 2019 This book presents a cross-section of recent generative research into the syntax of relative clauses constructions. Most of the papers collected here react in some way to Kayne's (1994) proposal to handle relative clauses in terms of determiner complementation and raising of the relativized nominal. The editors provide a thorough introduction of these proposals, their background and motivations, arguments for and against. There are detailed studies in the syntax and the semantics of relative clauses constructions in Latin, Ancient Greek, Romanian, Hindi, (Old) English, Old High German, (dialects of) Dutch, Turkish, Swedish, and Japanese. The book should be of interest to any linguist working within generative syntax.
