Self-Direction in Long Term Services and Supports Jun 02 2020 Ten years after the results of the Cash and Counseling Demonstration and Evaluation were released, this book assesses the impact of this study, which developed individualized plans for helping people with disabilities to stay independent in the community. The study was the first wide-scale test of people with disabilities managing their own budgets and results from the random-controlled trial demonstrated significant positive outcomes, encouraging the US federal and state governments to provide this option as part of their community-based care programs. This volume looks at what people with disabilities and their caregivers are saying about this option ten years removed from the study, and what the latest research shows in terms of what it will take to improve this approach, making the option available for all people with disabilities. The contributions also discuss what needs remain unmet even when people can manage their own budgets, and present participants' and their family caregivers' views on what support broker activities really help (or hurt). Finally, the book summarizes the results of a project involving the Council of Social Work Education and nine schools of social work to develop modules to train future social workers on person-centred planning and participant direction. Of interest to those researchers studying social care with a focus on disabilities, this book would also be of use to those training social workers and support staff. The chapters in this book were originally published in the Journal of Gerontological Social Work and Home Health Care Services Quarterly.

Immaculate Consumption Nov 27 2019 Did you know that the \$600 billion-a-year global weight loss industry has a 95 percent failure rate for weight loss sustainability? Immaculate Consumption: The Path to Lifelong Weight Management offers a scientifically based weight loss program designed to empower dieters to achieve long-lasting results. After years of yo-yo dieting and spinning wheels trying various commercial diets, author Deena Solomon was unhealthy and emotionally disheartened. She realized the traditional weight loss methodology -- blind adherence to rules, forbidden foods, mandatory compliance -- failed to adequately prepare dieters to adapt to the ever-changing temptations, often leading to an unrecoverable relapse. The Immaculate Consumption method is refreshingly different. There are no forbidden foods or abstinence-only models. Using real-life, relatable interactions with former clients to illustrate her methods, Dr. Solomon asks dieters to become scientific researchers into their own food habits and psychology, enabling them to take personal responsibility for their eating habits in a positive way. And with a documented 84 percent success rate, the Immaculate Consumption model has proven successful in maintaining long-term weight loss. Learn how to:

- Be the competent and proactive captain at the helm of your own journey*
- Use scientifically valid empirical evidence and apply it to your own custom weight loss plan*
- Profoundly change your relationship with food*
- Effectively use tools such as scientific observation and food ledgers to guide you during both everyday and anomalous meal situations*
- Shed the persistent shame and guilt from having "failed" at other commercial diets*

This revolutionary new approach to weight loss may help you shed those extra pounds for good.
