Cracks in the Ivory Tower Oct 17 2021 Ideally, universities are centers of learning, in which great researchers dispassionately search for truth, no matter how unpopular those truths must be. The marketplace of ideas assures that truth wins out against bias and prejudice. Yet, many people worry that there's rot in the heart of the higher education business. In Cracks in the Ivory Tower, libertarian scholars Jason Brennan and Philip Magness reveal the problems are even worse than anyone suspects. Marshalling an array of data, they systematically show how contemporary American universities fall short of these ideals and how bad incentives make faculty, administrators, and students act unethically. While universities may at times excel at identifying and calling out injustice outside their gates, Brennan and Magness contend that individuals are primarily guided by self-interest at every level. They find that the problems are deep and pervasive: most academic marketing and advertising is semi-fraudulent; colleges and individual departments regularly make promises they do not and cannot keep; and most students cheat a little, while many cheat a lot. Trenchant and wide-ranging, they elucidate the many ways in which faculty and students alike have every incentive to make teaching and learning secondary. In this revealing expose, Brennan and Magness bring to light many of the ethical problems universities, faculties, and students currently face. In turn, they reshape our understanding of how such high-powered institutions run their business.

Well-qualified professionals of Physics, Chemistry, Zoology and Botany make contributions to this magazine and craft it with focus on providing complete and to-the-point study material for aspiring candidates. The magazine covers General Knowledge, Science and Technology news, Interviews of toppers of examinations, study material of Physics, Chemistry, Zoology and Botany with model papers, reasoning test questions, facts, quiz contest, general awareness and mental ability test in every monthly issue.

Assessment in Geographical Education Apr 23 2022 In recent years there has been increased attention paid to the importance of assessment in Geographical Education, the chosen subject for this book. Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students, teachers, parents and policymakers. To be effective, assessment needs to be valid, reliable and fair. Validity is about ensuring that we assess what we claim we are assessing. Reliability is about measuring performance and understanding in a consistent way. Without validity and reliability, assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do. As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master. We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning. While there is a substantial literature on evidence-based assessment in secondary school contexts, research exploring best-practice assessment in geography is rare. This is a concern given the distinctive nature of geography and the important role of assessment in the learning process. This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography. The chapters are written by leading researchers in Geographical Education from across the globe. These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia, USA, South Korea, Germany, Switzerland and Singapore. What unifies the work in this book, is that each chapter focuses on a key feature of the discipline of geography, providing scholarly examples of evidence-based practices for assessing student's knowledge and skills.

WAC and Second Language Writers Aug 15 2021 Editors and contributors pursue the ambitious goal of including within WAC theory, research, and practice the differing perspectives, educational experiences, and voices of second-language writers. The chapters within this collection not only report new research but also share a wealth of pedagogical, curricular, and programmatic practices relevant to second-language writers.

Representing a range of institutional perspectives—including those of students and faculty at public universities, community colleges, liberal arts colleges, and English-language schools—and a diverse set of geographical and cultural contexts, the editors and contributors report on work taking place in the United States, Asia, Europe, and the Middle East.
