Working Papers Oct 26 2019 Perhaps the most popular of all Institute products, selected Working Papers are now available for the first time in a print format. These papers contain the preliminary results of ongoing Institute research. The book is divided into four sections: Trade and the Global Economy, Outsourcing, Asia, and the Middle East. Included in the book are papers by Edwin M. Truman, Morris Goldstein, Gary Clyde Hufbauer, Nicholas R. Lardy, Catherine L. Mann, and Marcus Noland. Volume I contains papers from 2005. Future volumes will be published on a semi-regular schedule as material is available.

Students of Color and the Achievement Gap Oct 19 2021 *Students of Color and the Achievement Gap* is a comprehensive, landmark analysis of an incontrovertible racialized reality in U.S. K-12 public education--the relentless achievement gap between low-socioeconomic students of color and their economically advantaged White counterparts. Award winning author and scholar Richard Valencia provides an authoritative and systemic treatment of the achievement gap, focusing on Black and Latino/Latina students. He examines the societal and educational factors that help to create and maintain the achievement gap by drawing from critical race theory, an asset-based perspective and a systemic inequality approach. By showing how racialized opportunity structures in society and schools ultimately result in racialized patterns of academic achievement in schools, Valencia shows how the various indicators of the achievement gap are actually symptoms of the societal and school quality gaps. Following each of these concerns, Valencia provides a number of reform suggestions that can lead to systemic transformations of K-12 education. *Students of Color and the Achievement Gap* makes a persuasive and well documented case that school success for students of color, and the empowerment of their parents, can only be fully understood and realized when contextualized within broader political, economic, and cultural frameworks.

Materiality in Financial Reporting Apr 12 2021 This book offers an integrated perspective of materiality from the different angles of accounting, auditing, internal controls, management commentary, financial analysis, management control, forensic analysis, sustainability reporting, corporate responsibility, assurance standards, integrated reporting, and limited legal considerations.

Die Bilanzierung von Lebensversicherungsgeschäften nach IFRS Jul 28 2022 Die von den deutschen Lebensversicherern angebotenen Lebensversicherungsgeschäfte spiegeln sich in ihrem IFRS-Konzernabschluss zum einen in aktivischen Finanzinstrumenten und zum anderen in passivisch abgebildeten Lebensversicherungsverträgen. Im Rahmen des Asset-Liability-Managements (ALM) stimmen die Lebensversicherer die Zahlungsströme aus den Finanzinstrumenten mit den Zahlungsströmen aus den Lebensversicherungsverträgen ab. Bisher bilanzieren die deutschen Lebensversicherer Finanzinstrumente nach IAS 39 und Lebensversicherungsverträge nach IFRS 4 Phase I mit Rückgriff auf HGB oder US-GAAP. Jedoch entstehen hieraus bilanzielle Ansatz- und Bewertungsinkonsistenzen (Accounting Mismatches). Die Versicherer müssen ihre aktivischen Finanzinstrumente für ab dem 1.1.2021 beginnende Geschäftsjahre nach dem neu entwickelten IFRS 9 bilanzieren und ihre emittierten Lebensversicherungsverträge für ab dem 1.1.2021 beginnende Geschäftsjahre nach dem neu entwickelten IFRS 17. Diese Entwicklung nimmt der Autor zum Anlass, um zu konkretisieren, wie die deutschen Lebensversicherer ihre aktivischen Finanzinstrumente nach IFRS 9 und ihre passivischen Lebensversicherungsverträge nach IFRS 17 bilanzieren müssen. Hierauf aufbauend wird analysiert, ob den Abschlussadressaten nach IFRS 9 und IFRS 17 entscheidungsnützliche Informationen über das ALM der deutschen Lebensversicherer vermittelt werden. Dies ist der Fall, wenn das Periodenergebnis der Versicherer nach den beiden neuen Standards weniger durch Accounting Mismatches verzerrt wird als nach IAS 39 und IFRS 4 Phase I. Abschließend werden drei Möglichkeiten dafür diskutiert, IFRS 9 und IFRS 17 zu ändern, um zu verbessern, wie das ALM der deutschen Lebensversicherer künftig bilanziell dargestellt wird.

Pensions and Legal Policy Mar 24 2022 This monograph explores the historical position of pensions law in the UK and the recent influences which have led to the introduction of Auto-Enrolment and subsequent reforms. Alternative models, such as the US and Australia, are also considered as well as the function of law in bringing about political changes. The question of saving for retirement is of national and international importance and many governments are wrestling with the issue of how to deal with the pension funding crisis. Consequently political policy has, in many cases, combined with behavioural science to inform new laws which have acted to shift the burden from the state into the private sector. Around the world responsibility is being moved onto individuals and employers as the state retreats from provision of state support in retirement; this book offers a sophisticated analysis of the role of legal intervention to facilitate this shift. The book explores the work of behavioural economics, its global influence on understanding financial decision-making and its application to legislation which seeks to influence consumer outcomes. Drawing on qualitative empirical research to explore the experience of implementation of Auto-Enrolment, this timely work considers the interaction with the work of behavioural science to highlight the social costs of the new regulatory regime.

Monetary Policy, Financial Crises, and the Macroeconomy Jan 10 2021 This volume investigates different aspects of monetary policy and prevention of financial crises. It discusses some recently suggested measures for central banks' responses to liquidity shortages and to the liquidity trap, methods for assessing the potential of crisis contagion via the interbank network, and the interaction between micro- and macro-prudential regulation. It compares different approaches for solving the Eurozone sovereign-debt problem and provides a new and intriguing explanation for rising income inequality. The authors are experts on monetary policy, financial crises, and contract theory from different European universities and central banks.

Identity Theft: Breakthroughs in Research and Practice May 02 2020 The preservation of private data is a main concern of governments, organizations, and individuals alike. For individuals, a breach in personal information can mean dire consequences for an individual's finances, medical information, and personal property. *Identity Theft: Breakthroughs in Research and Practice* highlights emerging perspectives and critical insights into the preservation of personal data and the complications that can arise when one's identity is compromised. This critical volume features key research on methods and technologies for protection, the problems associated with identity theft, and outlooks for the future. This publication is an essential resource for information security professionals, researchers, and graduate-level students in the fields of criminal science, business, and computer science.

Shareholders' Duties Sep 17 2021 It is often assumed that shareholders have rights, not duties. In recent years, however, this assumption has come under intense scrutiny in all aspects of company law and capital market law - legislation, the courts, soft law, and scholarship - and, in Europe especially, major changes are under way across a diverse spectrum all the way from revised contractual arrangements to mandatory statutory provisions. Such a shift has important implications for the fundamentals of European company law, and there is a need to examine shareholders' duties and to consider where this trend is taking shareholders and their stance in law. This focused collection of essays by twenty notable scholars addresses this complex subject from a highly informative and useful variety of perspectives. Examining shareholders' duties along three axes - types of investee companies, types of shareholders, and types of business situations - the essays deal with such topics and issues as the following: - shareholders' duties as reflections of the interests they are intended to safeguard; - shareholders' duties to society; - shareholders' disclosure obligations; - duties of parent companies; - institutional investor's fiduciary duty; - how regulatory duties constrain value-reducing forms of opportunism; - the state's continuing duties in the transformation of state-owned companies; - significant shareholders' duties in transactions with the company; and - powerful shareholders' duty not to abuse right. Examining the implications of this shift in discourse - how shareholders' duties are coming to the fore under the impetus of legislation, legal doctrine, case law, and enforcement strategies - as well as its ideological underpinnings, this book offers a comprehensive and in-depth consideration of this rapidly developing field. It will prove of inestimable value not only to policymakers and academics, but also to investors and practitioners committed to creating conditions favourable to sustainable economic growth and responsible business behaviour.

School Memories Jun 02 2020 This book reveals how school memories offer not only a tool for accessing the school of the past, but also a key to understanding what people today know (or think they know) about the school of the past. It describes, in fact, how historians' work does not purely and simply consist in exploring school as it really was, but also in the complex process of defining the memory of school as one developed and revisited over time at both the individual and collective level. Further, it investigates the extent to which what people "know" reflects the reality or is in fact a product of stereotypes that are deeply rooted in common perceptions and thus exceedingly difficult

Terrorist Use of Cryptocurrencies Oct 07 2020 The success of counterterrorism finance strategies in reducing terrorist access to official currencies has raised concerns that terrorist organizations might increase their use of such digital cryptocurrencies as Bitcoin to support their activities. RAND researchers thus consider the needs of terrorist groups and the advantages and disadvantages of the cryptocurrency technologies available to them.

Constitution-Making under UN Auspices Aug 17 2021 In 1949, United Nations Constitutional Assistance (UNCA) was conceived to promote the Western liberal constitution. This was colonial trusteeship. However, in 1960, as a step towards decolonization, the United Nations General Assembly rejected internationalized constitution-making, and, by extension, UNCA. All colonies acquired the right to draft their own constitutions without any international assistance. Nonetheless, in the same year, UNCA was revived and since then it has helped over 40 developing sovereign states to adopt the Western liberal constitution, for the aims of building peace, preventing conflict, and promoting good governance in these independent states. This book scrutinizes UNCA and its offshoot, UN/International Territorial Administration (ITA), including their historical origins and revival from 1960 to 2019. Sripathi argues that although the United Nations (UN) uses UNCA to help developing sovereign states secure debt relief, it undertakes UNCA to 'modernize' them with a view to 'strengthen' their supposedly weakened sovereignty. By doing so, the UN is seeking these states' adoption of a Western liberal-style constitution, thus violating their right to self-determination. The book shows how UNCA sires and guides UN (legislative) assistance in all state-sectors: security, judicial, electoral, commercial, parliamentary, public administration, and criminal. Irrespective of UNCA's benevolent motivations, such intrusive interventions impose the old forms of domination and perpetuate global inequality.

Fundamentals of Connected and Automated Vehicles Sep 25 2019 The automotive industry is transforming to a greater degree that has occurred since Henry Ford introduced mass production of the automobile with the Model T in 1913. Advances in computing, data processing, and artificial intelligence (deep learning in particular) are driving the development of new levels of automation that will impact all aspects of our lives including our vehicles. What are Connected and Automated Vehicles (CAVs)? What are the underlying technologies that need to mature and converge for them to be widely deployed? *Fundamentals of Connected and Automated Vehicles* is written to answer these questions, educating the reader with the information required to make informed predictions of how and when CAVs will impact their lives. Topics covered include: History of Connected and Automated Vehicles, Localization, Connectivity, Sensor and Actuator Hardware, Computer Vision, Sensor Fusion, Path Planning and Motion Control, Verification and Validation, and Outlook for future of CAVs.

Die Verlässlichkeit von Anhangangaben im IFRS-Abschluss Sep 29 2022 Stefan R. Grabs zeigt, dass die Verlässlichkeit insbesondere von subjektiven Anhangangaben im IFRS-Abschluss begrenzt ist und insbesondere die Abschlussprüfung in diesem Fall nur eingeschränkt zu einer Erhöhung beitragen kann. Der Autor betrachtet zunächst die theoretischen, normativen und empirischen Perspektiven des Anhangs sowie der Abschlussprüfung mit dem Schwerpunkt auf dem Konzept der hinreichenden Prüfungssicherheit. Im Rahmen einer eigenen empirischen Untersuchung werden die Determinanten der maximalen Prüfungssicherheit von Anhangangaben aufgezeigt und dabei auch die Wirkung des Offenlegungsortes (Anhang oder Bilanz/Gesamtergebnisrechnung) analysiert.

Managing Microaggressions Aug 24 2019 Microaggressions have been identified as a common and troubling cause of low retention and poor psychotherapy outcomes for people of color. All therapists want and intend to be helpful to their clients, but many unknowingly committing microaggressions due to unconscious biases and misconceptions about people from ethnic and racial minority groups. *Managing Microaggressions* is intended for mental health clinicians who want to be more effective in their use of evidence-based practices with people of color. Many well-intentioned clinicians lack the necessary skills and knowledge to effectively engage those who are ethnoracially different. This book discusses the theoretical basis of the problem (microaggressions), the cognitive-behavioral mechanisms by which the problem is maintained, and how to remedy the problem using CBT principles, with a focus on the role of the therapist. Not only will readers learn how to avoid offending or harming their clients, they will also be better equipped to help clients navigate microaggressions they encounter in their daily lives. *Managing Microaggressions* will endow clinicians with a clear understanding of these behaviors and the errors that underpin them, leading to more successful therapy.

Cities and Power Mar 12 2021 What do cities tell us about power? How does power shape cities? These are the main questions answered by a multidisciplinary set of eminent urban scholar in crisp articles on capital cities from around the world, from Buenos Aires to Tokyo, from Jakarta to Moscow. The Economic and Fiscal Consequences of Immigration Feb 29 2020 The Economic and Fiscal Consequences of Immigration finds that the long-term impact of immigration on the wages and employment of native-born workers overall is very small, and that any negative impacts are most likely to be found for prior immigrants or native-born high school dropouts. First-generation immigrants are more costly to governments than are the native-born, but the second generation are among the strongest fiscal and economic contributors in the U.S. This report concludes that immigration has an overall positive impact on long-run economic growth in the U.S. More than 40 million people living in the United States were born in other countries, and almost an equal number have at least one foreign-born parent. Together, the first generation (foreign-born) and second generation (children of the foreign-born) comprise almost one in four Americans. It comes as little surprise, then, that many U.S. residents view immigration as a major policy issue facing the nation. Not only does immigration affect the environment in which everyone lives, learns, and works, but it also interacts with nearly every policy area of concern, from jobs and the economy, education, and health care, to federal, state, and local government budgets. The changing patterns of immigration and the evolving consequences for American society, institutions, and the economy continue to fuel public policy debate that plays out at the national, state, and local levels. The Economic and Fiscal Consequences of Immigration assesses the impact of dynamic immigration processes on economic and fiscal outcomes for the United States, a major destination of world population movements. This report will be a fundamental resource for policy makers and law makers at the federal, state, and local levels but extends to the general public, nongovernmental organizations, the business community, educational institutions, and the research community.

economic outlook for Latin America and the Caribbean remains very challenging. Regional growth is projected to decline for a fifth consecutive year in 2015, dipping below 1 percent. Weakness is concentrated among South America's commodity exporters, where falling global commodity prices have compounded country-specific challenges. Meanwhile, growth is projected to be steady or stronger for most of the Caribbean, Central America, and Mexico, supported by lower oil bills for importers and robust economic recovery in the United States. The analysis in this report examines core challenges facing the region: the impact of lower commodity prices on fiscal and external positions, the drivers of the slowdown in investment, and the role of economic diversification for longer-term growth prospects.

Sukzessive Anteilerwerbe im IFRS-Konzernabschluss Oct 31 2022 Die Bilanzierung von sukzessiven Unternehmenserwerben im IFRS-Konzernabschluss wurde im Rahmen des mehrere Jahre andauernden Projekts „Business Combinations“ grundlegend überarbeitet. Der spezifischen Herausforderung derartiger Geschäftsvorfälle, nämlich der (Neu-)Konsolidierung der bereits vor der Beherrschungserlangung gehaltenen Anteile, begegnete der IASB im Zuge der Neuherausgabe von IFRS 3 mit einer strengen Fair Value-Orientierung. Eine tranchenweise, auf historischen Wertansätzen basierende Anwendung der Erwerbsmethode, wie sie noch in den Vorgängerstandards vorgesehen war, ist demnach nicht mehr zulässig. Wie aktuelle Geschäftsberichte zeigen, können die derzeitigen Bilanzierungsvorgaben erhebliche Auswirkungen auf die im Konzernabschluss dargestellte Vermögens-, Finanz- und Ertragslage extern wachsender Konzerne haben. Vor diesem Hintergrund macht es sich der Verfasser zur Aufgabe, die derzeit geltenden Bilanzierungsvorschriften zu sukzessiven Unternehmenserwerben eingehend zu analysieren, hinsichtlich bestehender Auslegungsfragen zu konkretisieren sowie kritisch zu würdigen. Um eine möglichst ganzheitliche Analyse zu gewährleisten, wird die Untersuchung nicht auf die von IFRS 3 abgedeckten Sachverhalte beschränkt. Vielmehr werden sämtliche Fallkonstellationen sukzessiver Anteilerwerbe, in deren Rahmen es zu einem Statuswechsel einer Unternehmensbeteiligung kommt, in den Blick genommen. Den dabei z. T. bestehenden Regelungslücken begegnet der Verfasser mit der Ableitung einer möglichst entscheidungsnützlichen Bilanzierung. Aufbauend auf der Analyse und Würdigung des aktuellen IFRS-Regelungskanons, wird darüber hinaus ein de lege ferenda-Vorschlag herausgearbeitet, auf dessen Basis die Berichterstattung über sukzessive Anteilerwerbe im Vergleich zu den bisherigen Vorschriften verbessert sowie zugleich vereinheitlicht werden könnte.

Air Transportation Jul 16 2021 *Air Transportation: A Management Perspective* by John Wensveen is a proven textbook that offers a comprehensive introduction to the theory and practice of air transportation management. In addition to explaining the fundamentals, the book transports the reader to the leading edge of the discipline, using past and present trends to forecast future challenges and opportunities the industry may face, encouraging the reader to really think about the decisions a manager implements. Written in an easy-to-read, easy-to-understand style, the Eighth Edition modernizes the text focusing on newly emerging management trends, innovative technology, and an increased emphasis on global changes in the industry that will change the future of aviation. New and updated material has been added throughout the text including mini case examples and supplemental presentation materials for each chapter. *Air Transportation: A Management Perspective* is suitable for almost all aviation programs that feature business and management. Its student-friendly structure and style make it highly suitable for modular courses and distance-learning programs, or for self-directed study and continuing personal professional development.

Controlling Capital May 14 2021 *Controlling Capital* examines three pressing issues in financial market regulation: the contested status of public regulation, the emergence of 'culture' as a

proposed modality of market governance, and the renewed ascendancy of private regulation. In the years immediately following the outbreak of crisis in financial markets, public regulation seemed almost to be attaining a position of command – the robustness and durability of which is explored here in respect of market conduct, European Union capital markets union, and US and EU competition policies. Subsequently there has been a softening of command and a return to public-private co-regulation, positioned within a narrative on culture. The potential and limits of culture as a regulatory resource are unpacked here in respect of occupational and organisational aspects, stakeholder connivance and wider political embeddedness. Lastly the book looks from both appreciative and critical perspectives at private regulation, through financial market associations, arbitration of disputes and, most controversially, market ‘policing’ by hedge funds. Bringing together a distinguished group of international experts, this book will be a key text for all those concerned with issues arising at the intersection of financial markets, law, culture and governance.

TTIP Jan 28 2020 Wie keine anderen Verhandlungen in der jüngeren Geschichte haben die bilateralen Gespräche zur Transatlantischen Handels- und Investitionspartnerschaft (kurz TTIP) die öffentliche Meinung gespalten. Dieses Buch analysiert die Argumente von Befürwortern und Gegnern und nimmt jenseits der Schlagzeilen um Chlorhühner, Hormonfleisch und private Schiedsgerichte die grundlegenden politischen Motive und Folgen von TTIP kritisch in den Blick. Sichtbar wird eine neoliberale Agenda, die den längst eingeleiteten Prozess einer »deep liberalization« nicht nur der Handelspolitik radikalisiert und damit einer Depolitisierung und Ökonomisierung klassischer Politikfelder weiter Vorschub leistet. Der große zivilgesellschaftliche Protest gegen TTIP birgt dagegen die Chance, die Handelspolitik aus den Hinterzimmern der Technokraten herauszuholen und zu repolitisieren.
