**Samuel Beckett in Confinement** Mar 07 2021 Confinement appears repeatedly in Samuel Beckett's oeuvre - from the asylums central to Murphy and Watt to the images of confinement that shape plays such as Waiting for Godot and Endgame. Drawing on spatial theory and new archival research, Beckett in Confinement explores these recurring concepts of closed space to cast new light on the ethical and political dimensions of Beckett's work. Covering the full range of Beckett's writing career, including two plays he completed for prisoners, Catastrophe and the unpublished 'Mongrel Mime', the book shows how this engagement with the ethics of representing prisons and asylums stands at the heart of Beckett's poetics.

**Handbook of Research on Virtual Training and Mentoring of Online Instructors** May 29 2020 To meet the dynamic academic demands of twenty-first century digital learners, many institutions of higher learning are offering more online classes than ever before that are accessible to both traditional and non-traditional learners. As such, a growing demand for online courses implies that participating institutions provide faculty with appropriate professional development programs to ensure the design and delivery of quality online courses. The Handbook of Research on

Virtual Training and Mentoring of Online Instructors is a critical scholarly resource that highlights the issues, challenges, and online engagement experiences to enhance effective teaching and learning in this learning environment. Featuring coverage on a broad range of topics such as media literacy, professional development, and virtual learning environments, this book is geared towards educational administrators, educators, and instructional designers interested in quality online instruction.

Hands-On Microsoft Windows Server 2019 Sep 01 2020 The perfect resource for learning from the ground up, Eckert's HANDS-ON MICROSOFT WINDOWS SERVER 2019 is designed to build a foundation in basic server administration -- no prior server experience required. It covers all of the core Windows Server 2019 features using a logical topic flow and step-by-step exercises that can be performed within a home or college lab environment, making it an ideal choice for a Windows Server 2019 administration course. It teaches you how to deploy Windows Server 2019 in a variety of settings, including data center and cloud environments that rely on virtualization and containers. It also covers configuring and managing server storage, troubleshooting performance issues as well as working with common Windows Server technologies and network services, including Active Directory, DNS, DHCP, IPAM, file sharing, printing and remote access. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

*Making Spatial Decisions Using GIS Aug 24 2022* "Making Spatial Decisions Using GIS, level 4 of the Our World GIS Education series, allows students to experience the GIS decision-making process in real-world settings. Designed for an upper-level high school or college curriculum, the five modules in this book invite students to perform sophisticated analyses in a variety of content areas. The

projects in this book encourage students to make not only maps but also the type of spatial decisions that confront professionals in all walks of life. The five modules pose decisions that will have students examine location criteria, population patterns, chemical spills, storm-ravaged coastlines, and big-city crime." "Making Spatial Decisions Using GIS presumes prior GIS experience and offers step-by-step instruction along with guidelines for more independent study. This book contains all you need to complete GIS projects, including GIS software, data, and worksheets. Companion DVDs provide a wealth of instructional resources to supplement each book. Teachers new to GIS will benefit from detailed notes and suggestions for presenting the material." "The projects in this book are connected to a variety of subject areas, such as business, government, and public administration. By completing the projects, students improve their skills in critical thinking, communication, technology, and problem-solving as delineated by the Partnership for 21st Century Skills."--BOOK JACKET.

**Handbook for Developing Joint Crediting Mechanism Projects** Jan 05 2021 The Joint Crediting Mechanism (JCM) is an emerging project-based bilateral offset crediting mechanism initiated by the Government of Japan to facilitate implementation of advanced low-carbon technologies for mitigating greenhouse gas (GHG) emissions in host countries. The Government of Japan has signed bilateral agreements with 16 countries for implementing JCM projects, including 10 developing member countries of the Asian Development Bank. As of September 2016, four of 15 projects registered as JCM projects have been issued JCM credits. JCM credits may be used to meet respective GHG emission reduction targets of relevant governments and project participants. This handbook provides project participants and stakeholders the procedural steps of JCM project

development cycle leading up to the issuance of JCM credits.

*The Impact of the 4th Industrial Revolution on Engineering Education* Jun 10 2021 This book gathers papers presented at the 22nd International Conference on Interactive Collaborative Learning (ICL2019), which was held in Bangkok, Thailand, from 25 to 27 September 2019. Covering various fields of e-learning and distance learning, course and curriculum development, knowledge management and learning, real-world learning experiences, evaluation and outcomes assessment, computer-aided language learning, vocational education development and technical teacher training, the contributions focus on innovative ways in which higher education can respond to the real-world challenges related to the current transformation in the development of education. Since it was established, in 1998, the ICL conference has been devoted to new approaches in learning with a focus on collaborative learning. Today, it is a forum for sharing trends and research findings as well as presenting practical experiences in learning and engineering pedagogy. The book appeals to policymakers, academics, educators, researchers in pedagogy and learning theory, school teachers, and other professionals in the learning industry, and further and continuing education.

*Building APIs with Node.js* Nov 03 2020 Learn how to build scalable APIs using the Node.js platform and ES6 (EcmaScript 2015) with this quick, informative guide. Developing systems for the wide range of devices available in the modern world requires the construction of APIs designed to work only with data in a centralized manner, allowing client-side applications to be developed separately and have a unique interface for the final user. Node.js has proven itself to be an excellent platform for building REST APIs because of its single-thread architecture. It has a low learning curve and can be understood by anyone who has a basic understanding of the JavaScript language. Use Building APIs with Node.js today to understand how Node.js APIs work, and how you can build your own.

What You Will Learn Build scalable APIs using the Node.js platform Use ES6, Express, Passport, ApiDoc, Mocha, Helmet and more Integrate an SQL database through Sequelize.js and build a single page application using Vanilla.js Who This Book Is For Ideal for developers who have a basic understanding of JavaScript and Node.js.

*Now and Forever* Feb 06 2021 Appropriate for high school classroom use, this curriculum addresses the issue of teen sexuality with lesson plans and activities to promote responsibility. Containing activities in a workbook format, this will equip teachers, parents, and other community members with basic, usable skills to effectively teach the responsibilities of sex. It provides modules for adoption/relinquishment, single parenthood, abstinence, abortion, teen marriage, birth/death, STDs/AIDS, sexual abuse/incest, rape/date rape, and verbatim interviews. Teacher Manual: modules contain an introduction, objectives, means to develop students' interest, activities, portfolio projects, and evaluation suggestions.

**Teacher Training and Professional Development: Concepts, Methodologies, Tools, and Applications** Aug 20 2019 Regardless of the field or discipline, technology is rapidly advancing, and individuals are faced with the challenge of adapting to these new innovations. To remain up-to-date on the current practices, teachers and administrators alike must constantly stay informed of the latest advances in their fields. *Teacher Training and Professional Development: Concepts, Methodologies, Tools, and Applications* contains a compendium of the latest academic material on the methods, skills, and techniques that are essential to lifelong learning and professional advancement. Including innovative studies on teaching quality, pre-service teacher preparation, and faculty enrichment, this multi-volume book is an ideal source for academics, professionals, students, practitioners, and researchers.

Genetic Criticism Oct 14 2021 In Genetic Criticism, Dirk Van Hulle introduces the study of creative processes to an Anglophone audience. As a method in the study of literary writing processes, genetic criticism is also a reading strategy. The idea behind this book is to introduce this strategy to a broader audience, from interested readers and graduate students to early career researchers and literary critics. In literary studies, it is often obvious that a particular work somehow seems to hit a nerve, but more challenging to pinpoint exactly why it 'works'. This book therefore starts from a clear, basic assumption: knowing how something was made can help us understand how and why it works. This strategy is at the basis of many disciplines, including art history. By means of X-ray technology or hyperspectral imaging, it is possible to look at a painting as a multilayered object with not only spatial dimensions, but also a temporal one. This temporal dimension is the core of the reading strategy introduced in this book. Note books, marginalia, manuscripts, and typescripts (even

if one works with scans) give a concrete dimension to literature, which is a helpful reading strategy for many students. On the one hand, this involves concrete, transferrable skills such as aspects of transcription and digital scholarly editing. On the other hand, it also involves more abstract theoretical issues relating to matters of authorship, collaboration, authority, agency, intention and intertextuality.

**Research Anthology on Developing Effective Online Learning Courses** Apr 27 2020 In the current educational environment, there has been a shift towards online learning as a replacement for the traditional in-person classroom experience. With this new environment comes new technologies, benefits, and challenges for providing courses to students through an entirely digital environment. With this shift comes the necessary research on how to utilize these online courses and how to develop effective online educational materials that fit student needs and encourage student learning, motivation, and success. The optimization of these online tools requires a deeper look into curriculum, instructional design, teaching techniques, and new models for student assessment and evaluation. Information on how to create valuable online course content, engaging lesson plans for the digital space, and meaningful student activities online are only a few of many current topics of interest for promoting student achievement through online learning. The Research Anthology on

**Dynamics of the Norwegian Margin** Jul 23 2022 The papers and research results presented here have been prepared as part of the Integrated Basin Studies project. This project had the objective of studying the lithospheric and upper crustal processes governing the formation and evolution of extensional and foreland basins and to decipher the role of tectonics, sea level and sedimentary processes in the filling of such basins. The Dynamics of the Norwegian Margin module focused on the rifted sedimentary basins of the northern North Sea and off Mid-Norway. This prolific hydrocarbon province has an extensive industry and scientific database and offers a unique opportunity to study fundamental earth processes, from failed rifting to crustal breakup and accretion of oceanic crust. A set of new models for basin formation and filling has been derived, including linking of sedimentary basin faulting to lower crustal deformation, signature and variability of syn-rift infill, correlation of mineralogy to seismic signature, nature and characteristics of volcanic margin formation and distribution of present-day stress field.

University teaching and learning has never been more innovative than it is now. This has been enabled by a better contemporary understanding of teaching and learning. Instructors now present situated projects and practices to their students, not just foundational principles. Lectures and structured practice are now often replaced by engaging and constructivist learning activities that leverage what students know about, think about and care about. Teaching innovation has also been enabled by online learning in the classroom, beyond the classroom and beyond the campus. Learning online is perhaps not the panacea sometimes asserted but it is a disruptively rich and expanding set of tools and techniques that can facilitate engaging and constructivist learning activities. It is becoming the new normal in university teaching and learning. The opportunity and the need for innovation in teaching and learning are together keenest in information technology itself: Computer and Information Science faculty and students are immersed in innovation. The subject matter of these disciplines changes from one year to the next; courses and curricula are in constant flux. And indeed each wave of disciplinary innovation is assimilated into technology tools and infrastructures for teaching new and emerging concepts and techniques. Innovative Practices in Teaching Information Sciences and Technology: Experience Reports and Reflections describes a set of innovative teaching practices from the faculty of Information Sciences and Technology at Pennsylvania State University. Each chapter is a personal essay describing practices, implemented by one or two faculty that challenge assumptions and push beyond standard practice at the individual faculty and classroom level. These are innovations that instructors elsewhere may find directly accessible and adaptable. Taken as a set, this book is a case study of teaching innovation as a part of faculty culture. Innovation is not optional in information technology; it inheres in both the disciplinary subject matter and in teaching. But it is an option for instructors to collectively embrace

innovation as a faculty. The chapters in this book taken together, embody this option and provide a partial model to faculties for reflecting on and refining their own collective culture of teaching innovation.

[Handbook of Research on Collaborative Learning Using Concept Mapping](#) May 21 2022 This new encyclopedia discusses the extraordinary importance of internet technologies, with a particular focus on the Web.

**Microcontroller Engineering with MSP432** Jan 17 2022 This book aims to develop professional and practical microcontroller applications in the ARM-MDK environment with Texas Instruments MSP432P401R LaunchPad kits. It introduces ARM Cortex-M4 MCU by highlighting the most important elements, including: registers, pipelines, memory, and I/O ports. With the updated MSP432P401R Evaluation Board (EVB), MSP-EXP432P401R, this MCU provides various control functions with multiple peripherals to enable users to develop and build various modern control projects with rich control strategies. Micro-controller programming is approached with basic and straightforward programming codes to reduce learning curves, and furthermore to enable students to build embedded applications in more efficient and interesting ways. For authentic examples, 37 Class programming projects are built into the book that use MSP432P401R MCU. Additionally, approximately 40 Lab programming projects with MSP432P401R MCU are included to be assigned as homework.

Comprised of a printed manual and with accompanying online downloadable material, it is designed to be delivered over 30 sessions across 4 modules, but can be adapted to suit the needs of individual adolescents. The four modules address a range of clinical tasks, including: establishing rapport and a therapeutic alliance with the young person; developing the relationship skills of the young person and addressing their harmful sexual behaviour; the young person's feelings, thoughts and beliefs and developing their capacity to regulate emotions and sexual arousal; and issues of sexuality, dating, endings and relapse prevention. The printed manual outlines the background that any clinician delivering treatment needs to consider, including a description of key therapeutic techniques, practical advice on how to prepare for and deliver an intervention, overviews of the modules and sessions, and sample session plans. Each session plan is clearly written in a step-by-step format and is stored electronically online so they can be easily printed as often as required. The accompanying online downloadable material also contains 'Home Project' sheets (homework tasks to consolidate the in-session therapeutic work) as well as a specially commissioned 'Character Library' with cut-out figures and background scenes that can be used as tools for the young person to explore real and fictional scenarios. This professional resource aims to provide the clinician with the tools to address adolescent harmful sexual behaviour within a broader social and emotional developmental context, and will aid those working with young people to motivate them to engage in a positive process of change.

Handbook of Research on Transforming Mathematics Teacher Education in the Digital Age Dec 24 2019 The digital age provides ample opportunities for enhanced learning experiences for students; however, it can also present challenges for educators who must adapt to and implement new technologies in the classroom. Education in the Digital Age is a critical reference source featuring the latest research on the development of educators' knowledge for the integration of technologies to improve classroom instruction. Investigating emerging pedagogies for preservice and in-service teachers, this publication is ideal for professionals, researchers, and educational designers interested in the implementation of technology in the mathematics classroom.

*Civil Society and Social Responsibility in Higher Education* Oct 02 2020 This volume explores different angles of sustainability, university corporate social responsibility, and the role of civil society in the context of education, with a focus on curriculum development and teaching.

**The Micro Logic of Tactical Protest Voting** Apr 08 2021 This book identifies the different forms that protest voting can take in times when populism flourishes. Contrary to the popular view of protest voting as merely venting frustration, this book argues that protest voting can also be conceived of as a strategic signal of discontent, originating from sources, such as party policy positions. The empirical analyses rest on election survey data collected in democratic countries around the world between 2005 and 2017 to understand protest voting as a strategic signal, and the conditions under which it occurs. The main results show that protest voting can indeed be a strategic signal. This finding challenges the predominant view in the literature and the public discourse of protest voters as aimless, frustrated voters.

**NetBeans 6 in Simple Steps** Feb 24 2020 This book contains the step by step information about the NetBeans 6.0 IDE. This book is for you if you are familiar with java programming and are looking for a book that effectively explains the concepts of the NetBeans IDE. This book gives the core information about features of the NetBeans IDE and developing applications using the same. This book contains lots of examples and helps you to learn about the NetBeans IDE in an easier way. It is a precise yet complete book that helps you understand different concepts and methodologies involved in developing scalable and distributed applications using NetBeans IDE 6. The book covers all advanced concepts of NetBeans IDE 6 and each concept is explained through simple steps and supported by numerous examples. This makes the book unique in itself. Covers: Features of NetBeans 6.0 IDE Installation of NetBeans 6.0 Exploring NetBeans 6.0 IDE Creating a Java Application Developing Web Applications in NetBeans Developing Enterprise Projects in NetBeans Developing Web Services in NetBeans Developing NetBeans Plug In Modules Refactoring Source Code Debugging the Applications Performing Junit Testing Generating and Accessing Javadocs Implementing Ant Script

**Next Generation Management Development** Sep 20 2019 This innovative, comprehensive, and fully integrated management development program provides a vehicle for enabling managers and leaders to participate more effectively in their organization's OD processes. The concepts, models, tools, and other materials have been used successfully to train managers, leaders, and MD/OD personnel in organizations such as IBM, AT&T, Kraft, Baxter Labs, Sears, Caterpillar, and the U.S. Navy, Army, and Air Force. The accompanying CD-ROM contains customizable tools for OD consultants and facilitators as well as additional chapter material.

**Asian Research on English for Specific Purposes** Nov 15 2021 English for Specific Purposes (ESP), addressing the communicative needs and practices of particular professional or occupational groups, has developed rapidly in the past fifty years and is now a major force in English language teaching and research. This critical volume helps innovate the theory, practice, and methodology for ESP teaching and research in Asian countries and areas. Promoting communication and enhancing cooperation on ESP research and pedagogy across cultures, it provides ESP scholars, educators and practitioners with an opportunity to benefit from each other's research and expertise in an age of globalization and digitalization. The volume provides an in-depth analysis of the latest scholarship on English teaching and research for general and specific academic and occupational purposes; the intercultural communication in ESP contexts; corpus linguistics and data-driven instruction for ESP; computer-assisted language learning and mobile-assisted language learning; evaluation of English writing courses; and ESP translation strategies.
