New Business for Old Europe Feb 27 2020 Selling products used to be the standard way of doing business. Traditionally, it is left to the user to transform the purchase of a product into something that fulfils effectively a final-user need. Today, two streams of research - business management and sustainability - normally with very distinct perspectives on the world, have surprisingly converged to form a common conclusion: selling products is old-fashioned business. Companies should switch their focus to selling need fulfilment, satisfaction, or experiences. Or, in other words, selling integrated solutions or product-services. The business management literature argues that, by focusing on the integrated, final-client needs, and delivering integrated solutions fulfilling these needs, companies will be able to improve their position in the value chain, enhance added value of their offering, and improve their innovation potential. In a business world where many products are becoming equally well-performing commodities, this strategy is one of the ways to avoid a sheer competition on price - a type of competition that Europe never can win with emerging and low-cost economies such as China. In that sense, product-services can mean new business for old Europe. The sustainability knowledge stream argues that need-focused solutions could be inherently more sustainable than products. Product-services could offer the value of use instead of the product itself and decrease the environmental load in two ways. First, companies offering the service would have all the incentives to make the (product-)system efficient, as they get paid by the result. Second, consumers would be encouraged to alter their behaviour as they gain insight into all the costs involved with the use. Until today, the connections and interchange between the two research

streams have been quite limited. The question of whether product-services truly are the avenue to a sustainable world is still under discussion. This book aims to develop a systematic view on this issue. The potential of product-services to enhance competitiveness and contribute to sustainable development prompted the EU to invest heavily in the theme under the EU's 5th Framework Programme (FP5; 1997-2002). A variety of research and development projects in the field were supported under the umbrella of the Sustainable Product Development Network (SusProNet). These included MEPSS (Methodology Product Service Systems); Home Services; HiCS (Highly Customised Solutions); Prosecco (Product-Service Co-design); and Innopse (Innovation Studio and exemplary developments for Product-Service). The projects were undertaken by a mix of European research institutions and companies including Orange, Philips and Nokia. Some of these projects focused on developing methods that could help industries change their output from a product to a service. Others focused on the development of new product-services or solutions (HiCS, Prosecco, Innopse), and yet others tried to analyze under which circumstances product-services are likely to be implemented and accepted by consumers (Home Services). One project focused on dissemination of the concept to SMEs (Lean Services). Other projects focused purely on new product-service development, such as Brainfridge (an intelligent fridge managing its supply chain), ASP-NET (application service providers), Protex (intelligent enzymes) and IPSCON (receivers for wireless telephones). New Business for Old Europe brings together the key outputs from all of these groups to present a state-of-the-art collection on product-service development, prospects and implications for competitiveness and sustainability. The book has a number of aims. First, it attempts to bridge the gap between business and sustainability literature to lead to a better-founded understanding of the business drivers for embarking on product-service development, and its relation with sustainability and competitiveness. Second, the book reviews the large amount of studies that have developed toolkits, methods and approaches that can support marketers, product developers and strategists in business to develop product-services, selects the best-practice approaches and analyses any gaps. Third, the book examines what opportunities there are for product-service development in a variety of key areas including base materials, information and communication technologies, offices, food and households. Each chapter in this section discusses the area, developments that will stimulate or hinder the market opportunities for product-services, product-service examples, and typical implementation challenges for product-services in that area. These chapters serve as a quick introduction for companies interested in developing product-services in a specific area. Fourth, the book translates all the lessons into suggested approaches for product-service development by companies. Annexes include a lightweight "product-service development manual" and an alphabetical list of useful underlying tools.

Business services in support of farm enterprise development: a review of relevant experiences Oct 05 2020 This Occasional Paper presents the study findings of approaches to the design and delivery of business services to farmers and rural entrepreneurs. Interventions aimed at business service provision and designed and developed by donors have commonly been termed Business Development Services (BDS). BDS has largely focused on reducing poverty by raising the incomes of farmers and rural entrepreneurs. The term business services, refers to the range of non financial services provided to micro and small enterprises (MSEs) at various stages in their development. They embody a market development approach to the provision of support services¹. This Occasional Paper presents findings from a study conducted on approaches to the design and delivery of business services to farmers and rural entrepreneurs. The paper is based upon an extensive literature review of BDS and other business-related service interventions, supported by selected case studies in Asia and Africa. Business services are aimed at assisting farmers and rural entrepreneurs to overcome internal and external constraints to their farm business start-up, development and performance. Contained within the broad concept are such activities as group training, individual counselling, advice, the development of new commercial entities, technology development and transfer, information provision, business links and policy advocacy.

IT Solutions Series: Humanizing Information Technology: Advice from Experts Oct 17 2021 The role of information technology (IT) has becoming increasingly important in both private and public sectors over recent years. The advent of personal computers, information networks, and the Internet has engendered an information revolution, which has created new means of production, new communication patterns, and new work processes. The ability to buy and sell goods and services via the Internet has led to new private sector industries and new business and government models. Furthermore, there is an emerging realization that implementation of IT is more than just a shift in communication patterns or mediums. At least potentially, it involves a transformation of an organization's culture.

How We Test Software at Microsoft Jun 20 2019 It may surprise you to learn that Microsoft employs as many software testers as developers. Less surprising is the emphasis the company places on the testing discipline—and its role in managing quality across a diverse, 150+ product portfolio. This book—written by three of Microsoft's most prominent test professionals—shares the best practices,

tools, and systems used by the company's 9,000-strong corps of testers. Learn how your colleagues at Microsoft design and manage testing, their approach to training and career development, and what challenges they see ahead. Most important, you'll get practical insights you can apply for better results in your organization. Discover how to: Design effective tests and run them throughout the product lifecycle Minimize cost and risk with functional tests, and know when to apply structural techniques Measure code complexity to identify bugs and potential maintenance issues Use models to generate test cases, surface unexpected application behavior, and manage risk Know when to employ automated tests, design them for long-term use, and plug into an automation infrastructure Review the hallmarks of great testers—and the tools they use to run tests, probe systems, and track progress efficiently Explore the challenges of testing services vs. shrink-wrapped software

Markt der Standardanwendungssoftware für ERP mit dem Vergleich der konzeptionellen Struktur der Angebote Apr 23 2022 Studienarbeit aus dem Jahr 2003 im Fachbereich Informatik - Wirtschaftsinformatik, Note: 1,0, Bayerische Julius-Maximilians-Universität Würzburg (Lehrstuhl für BWL und Wirtschaftsinformatik), 37 Quellen im Literaturverzeichnis, Sprache: Deutsch, Abstract: Die Globalisierung der Märkte und die sich damit ständig ändernden Wettbewerbsbedingungen erhöhen den Druck auf Unternehmen, flexibel, schnell und vor allem effizient zu operieren. Durch moderne Informationstechnologie (IT) sind Unternehmen in der Lage Geschäftsprozesse zu automatisieren, um so den Herausforderungen einer vernetzten Geschäftswelt gerecht zu werden. Seit den neunziger Jahren werden integrierte Softwarelösungen zur einheitlichen Steuerung der Ressourcen in Unternehmen kommerziell angeboten. Enterprise Resource Planning (ERP) kam als Schlagwort für unternehmensweite Softwarelösungen auf. Bis heute hat sich ein großer, heterogener Markt entwickelt [KLOS03]. Das Ziel der vorliegenden Arbeit ist daher, führende Anbieter mit ihren Lösungen vorzustellen und die Leistungsfähigkeit der Systeme gegenüberzustellen. Dazu werden in Kapitel 2 einleitend einige grundlegende Kenntnisse über ERP-Systeme vermittelt. Die typische Vorgehensweise eines Softwareauswahlprozesses wird durch die Entwicklung eines Kriterienkataloges in Kapitel 3 beschrieben. Eine explizite Marktbetrachtung folgt schließlich in Kapitel 4. Durch Gegenüberstellung der ausgewählten ERP-Lösungen zeigt sich abschließend die Heterogenität des am Markt befindlichen Angebotes.

Transforming Public Services by Design Jun 25 2022 For policy makers and policy implementers, design challenges abound. Every design challenge presents an opportunity for change and transformation. To get from policy intent to policy outcome, however, is not a straightforward journey. It involves people and services as much as it involves policies and organizations. Of all organizations, perhaps government agencies are perceived to be the least likely to change. They are embedded in enormous bureaucratic structures that have grown over decades, if not centuries. In effect, many people have given up hope that such an institution can ever change its ways of doing business. And yet, from a human-centered design perspective, they present a fabulous challenge. Designed by people for people, they have a mandate to be citizen-centered, but they often fall short of this goal. If human-centered design can make a difference in this organizational context, it is likely to have an equal or greater impact on an organization that shows more flexibility; for example, one that is smaller in size and less entangled in legal or political frameworks. *Transforming Public Services by Design* offers a human-centered design perspective on policies, organizations and services. Three design projects by large-scale government agencies illustrate the implications for organizations and the people involved in designing public services: the Tax Forms Simplification Project by the Internal Revenue Service (1978-1983), the Domestic Mail Manual Transformation Project by the United States Postal Service (2001-2005) and the Integrated Tax Design Project by the Australian Tax Office. These case studies offer a unique demonstration of the role of human-centered design in policy context. This book aims to support designers and managers of all backgrounds who want to know more about reorienting policies, organizations and services around people.

Kundenbindung bei Professional Business Services May 24 2022 Kundenbindung und ihre Einflussfaktoren sind in der Marketingliteratur in den letzten Jahren eingehend erörtert worden. Dies gilt allerdings weniger im Hinblick auf Professional Business Services, d. h. unternehmensorientierte wissensintensive Dienstleistungen wie beispielsweise juristische Dienste,

Finanzdienstleistungen, Unternehmensberatungsleistungen, Marktforschungsleistungen und die Leistungen von Werbeagenturen. Im Rahmen einer konzeptionell und empirisch angelegten Untersuchung entwickelt Zelal Ates erstmals ein umfassendes Modell zur Erklärung von Kundenbindung bei Professional Business Services und leitet daraus Implikationen für die Unternehmenspraxis sowie die Forschung ab. Das Buch wendet sich an Wissenschaftler, Dozenten und Studierende der Betriebswirtschaftslehre mit den Schwerpunkten Marketing und Dienstleistungsmanagement sowie an Führungskräfte in Unternehmen und Unternehmensberater.
