Learning from Empire May 14 2021 Internationalisation of medical knowledge, its circulation and implementation through colonial institutions have played a significant role in combating diseases of public health importance. With contributions from reputed faculty and researchers, this volume examines the dynamics of circulation of medical knowledge and the creation of webs of empire through medical curiosities, medical and architectural knowledge, medical manuscripts, African agency, medical ideas and management of diseases, surgical and anatomical knowledge and a collective scientific enterprise in translating 'local' to 'universal' paradigms of practice.

Herbal Cosmeto - Dermatology Jul 28 2022 Herbal cosmeto-dermatology is needed today because herbal remedies are safer for the skin than allopathic or synthetic drugs. This book is predicated on Unani Medicine, Eastern Medicine, Ayurveda, Integrative Medicine, CAM, Alternative Medicine, Uyghur Medicine, Botanicals & Herbal

Medicine. This book of Herbal Cosmeto-Dermatology having 30 chapters described the history of beautification through cosmetics in the first chapter. It is rightly mentioned about Leucoderma /Vitiligo that Ibn Sina was the first person who declared the skin disease as hereditary. Earlier, this Unani heritage was unheard of! Present medical science also accepts that Lecoderma/Vitiligo is hereditary. Besides the first chapter concerning history, 13 other chapters have been written by Prof. Abdul Latif, and in two of them, he is a contributory author. The remaining chapters in the book are the works of other experts' compilations.

UnaVerse 1.0 Apr 24 2022 UnaVerse 1.0 is a versed compilation and collection of AIAPGET (Unani) previous year questions- thoroughly explained and masterly cataloged. This book is well focused and quite strict to the objective of the author - that's the strength I must say. The best part is the explanation of correct answers- which will be captivating learning for readers as it ensures brain exercise while solving the assertion reason portion. Subject wise weightage, current pattern, and solved papers of various recent MO examinations are out-and-out anthological. With the turn of every page of this book, I found the methodology of compilation is widely followed in "UnaVerse 1.0" which will ease and provoke intense reading. There have never been adequately grouped or compiled such huge questions as per the current pattern with proper explanation in any previous Unani books. I believe that the content and style of this compilation constitute a powerful appeal for the revival of 'reading interest'. In one swoop I may conclude that this is the maiden effort of quality, discipline, thorough and need-based researched writing. By being bold at this moment; right now, there is no other moment to wait for "UnaVerse 1.0"- going to be a factual helpmate for AIAPGET aspirants. Proceedings of the National Seminar on Research Methodology in Unani Medicine Mar 24 2022 *Journal of the House of Representatives of the United States* Jun 02 2020 Some vols. include supplemental journals of "such proceedings of the sessions, as, during the time they were depending, were ordered to be kept secret, and respecting which the injunction of secrecy was afterwards taken off by the order of the House."

11. TEST YOUR KNOWLEDGE (MODEL 3) ADVIA AND KULIYAT (407-444) *Hot and Cold Theory: The Path Towards Personalized Medicine* Sep 29 2022 This book is about the theory of Hot and Cold, a mutual fundamental base of traditional medicines all around the world. The theory describes the dynamic balance state of the body on the axis of hot and cold for each individual and proposes the fact that deviation from this equilibrium is a predisposing factor for diseases. Such an approach helps practitioners to provide treatments tailored to the patients condition, not the disease. This book, for the first time, has gathered native descriptions of Hot and Cold theory in different traditional medicines, including traditional Chinese medicine, Persian (Humoral, Unani) medicine, Ayurvedic medicine and Latin American and Caribbean medicines. After defining the common ground, contemporary research - in nutrition, pharmacology, physiology and systems biology - has been explored using scientific methodology. This work is the result of an international collaboration of more than 30 scientists and scholars with high reputations in their fields. Hot and Cold theory, as a holistic individualized approach in prevention, diagnosis and treatment, can be merged into the novel fast-paced concepts in systems biology and precision medicine. Through this bridge, the authors propose that the Hot and Cold theory should be revisited more deeply by medical scientists, who are the main audience of this book, to pave the way towards integrated holistic personalized medicine. **The Medical Times and Gazette** Sep 05 2020
