[Level of Competence of Civil Engineers in the Philippines](#) Jul 26 2022 *Doctoral Thesis / Dissertation from the year 2007 in the subject Pedagogy - Job Education, Occupational Training, Further Education, grade: 1.00, University of the Philippines (Graduate School), course: Educational Management, language: English, abstract: The study focused on the assessment of the level of competence of Filipino civil engineers in Northern Samar, its prospects for employment and implications for curricular improvement. It employed the descriptive-correlational method of research. Two sets of questionnaire were utilized to gather information needed in this study. The first was on the profile of the civil-engineer respondents and level of competence and the second was the AACCUP instrument. The civil engineers rated themselves as moderately competent as to level of competence, ranking as first is managerial skills while keeping abreast with the latest technology was observed to be the lowest. The respondents' immediate supervisors or HRMO rated their employees as moderately competent, wherein technical expertise is the highest and communication skills was observed to be the lowest. As regards to the status of the civil engineering curriculum in the University of Eastern Philippines, Vision, Mission, Goals and Objectives, Faculty, Curriculum and Instruction, Support to Students, Library and Administration were rated very good, while Physical Plant and Facilities, Extension & Community Involvement and Laboratories were rated good and research was rated fair. In summary, the general findings of the study had a very good rating. The same findings revealed that there is no significant relationship between the respondents' level of competence and their age, eligibility, position and years of experience, while sex, category of employment, type of employment, training/seminars attended and highest educational attainment were found to be significant with the respondents' level of competence. There is no significant difference on the level of competence between the UEP and the non UEP graduates in terms of communication skills, managerial skills, environmental awareness, professional advancement and keeping abreast with the latest technology, while there is significant difference on the level of competence between the UEP and non UEP graduates in terms of skills and technical expertise. Likewise there is no significant difference on the ratings of the civil engineers and the observations of their immediate supervisors or HRMO.*

Civil Engineer's Handbook of Professional Practice Oct 29 2022 A well-written, hands-on, single-source guide to the professional practice of civil engineering There is a growing understanding that to be competitive at an international level, civil engineers not only must build on their traditional strengths in technology and science but also must acquire greater mastery of the business of civil engineering. Project management, teamwork, ethics, leadership, and communication have been defined as essential to the successful practice of civil engineering by the ASCE in the 2008 landmark publication, Civil Engineering Body of Knowledge for the 21st Century (BOK2). This single-source guide is the first to take the practical skills defined by the ASCE BOK2 and provide illuminating techniques, quotes, case examples, problems, and information to assist the reader in addressing the many challenges facing civil engineers in the real world. Civil Engineer's Handbook of Professional Practice: Focuses on the business and management aspects of a civil engineer's job, providing students and practitioners with sound business management principles Addresses contemporary issues such as permitting, globalization, sustainability, and emerging technologies Offers proven methods for balancing speed, quality, and price with contracting and legal issues in a client-oriented profession Includes guidance on juggling career goals, life outside work, compensation, and growth From the challenge of sustainability to the rigors of problem recognition and solving, this book is an essential tool for those practicing civil engineering.

Negotiating Your Career in Structural Engineering Sep 16 2021 The fact that a young engineer does not understand the significance of planning a career until around 10 years post graduation. This is true for nearly all of us engineers except maybe a selected few. When a youngster steps out of their college as a qualified engineer, full of accomplishment and dreams and hopes for the future, they are too occupied with the success and are also too happy and relieved to have attained a commendable triumph. Apparently, thinking about a career immediately after accomplishing this big feat is not the first priority at this young age. It is sometimes the sense of freedom and ecstasy which takes them to a new high and clouds their minds for some time. It is in the aftermath of this ecstasy that young graduates find that he has little knowledge of how to take the first step in his career. This guide aims to remove the deliberation of the unsure and unknown future and the lack of awareness of what to do next and of what needs to be done to kick start a career. Not knowing what to do is a dangerous situation in itself. I have seen young engineers struggle to decide what to do. Your teachers in your colleges are good academicians but unfortunately seldom know about the practicalities and challenges which you will face and should brace for, in your career in the industry. They are a different class, more focused on the research and academic aspect of engineering and have great capabilities and expertise in those areas. Unfortunately, this kind of expertise may not help you in getting a job in the industry. Through this book, I have attempted to guide you on how to take some tangible, concrete, and quantifiable physical actions which can help you start your career and move up in life. I have tried to make it as simple as possible and laid down the precise steps which you may need to take from the start till you become a renowned personality in your field. This guide is not meant to be an inspirational or spiritual guide for your inner self; on the contrary, it gives advice, on the real world and talks about the measurable actions you can take to promote your career. The Book also has a very elaborate chapter on how to prepare your CV and a separate chapter on how you can start your own enterprise. Some Reviews: 1- The book provides a smooth walkthrough for a career development of structural engineers. It gives insight on the basic requirement and knowledge required for navigating a successful career path as a structural engineer. The book is well structured and covers the details of various training needs, information about various design consultants & companies, structural engineering software, etc. The book also has a section for entrepreneurship, which is very enlightening, and also has a chapter on preparing and presenting a CV. I strongly recommend this book for all civil engineers, students of Civil Engineering and specifically those who want to pursue a career as a structural engineer. Dr. Anubhav, (Ph.D. IIT Kanpur) Add. General Manager NTPC Ltd., India 2- Choosing and pursuing a career can be quite difficult, as the decision taken from the options known & available in today's times will decide the rest of the life ahead. Therefore, one has not only to choose a field but the future. Having been a civil engineer for the last more than 50 years working with lot of structural engineers on different projects across the country & abroad, I have seen the changes in the field of structural engineering & adventures in this field. In line to define the role of a structural engineer and to turn someone's dream in to reality with a lot of space & opportunities for creativity, I am delighted to see a guide in the form of this book where in the author has done a 'manthan' to provide to aspirants in the field of Structural Engineering as a career. B. B. Kumar Executive Director in NBC Executive Vice President in NCC Ltd President Construction in Dhoot Group
