Exploring Microeconomics Oct 16 2021 The excitement of learning economics for the first time. The experience of a lifetime of teaching it. The Eighth Edition of Exploring Microeconomics captures the excitement of learning microeconomics for the first time through a lively and encouraging narrative that connects microeconomics to the world in a way that is familiar to readers. Author Robert L. Sexton draws on over 25 years of teaching experience to capture readers' attention, focusing on core concepts and expertly weaving in examples from current events and popular culture to make even classic economic principles modern and relatable. The text sticks to the basics and applies a thoughtful learning design, segmenting its presentation into brief, visually appealing, self-contained sections that are easier for

the rifts that have appeared among leading Western nations about the right way to govern innovation in genetics and biotechnology. These significant differences in law and policy, and in ethical analysis, may in a globalizing world act as obstacles to free trade, scientific inquiry, and shared understandings of human dignity. In this magisterial look at some twenty-five years of scientific and social development, Sheila Jasanoff compares the politics and policy of the life sciences in Britain, Germany, the United States, and in the European Union as a whole. She shows how public and private actors in each setting evaluated new manifestations of biotechnology and tried to reassure themselves about their safety. Three main themes emerge. First, core concepts of democratic theory, such as citizenship, deliberation, and accountability, cannot be understood satisfactorily without taking on board the politics of science and technology. Second, in all three countries, policies for the life sciences have been

incorporated into "nation-building" projects that seek to reimagine what the nation stands for. Third, political culture influences democratic politics, and it works through the institutionalized ways in which citizens understand and evaluate public knowledge. These three aspects of contemporary politics, Jasanoff argues, help account not only for policy divergences but also for the perceived legitimacy of state actions.

very heart of the social project, and all countries, to varying degrees, participate in it: raising scientific literacy, improving the image of the sciences, involving the public in debates and encouraging the young to pursue careers in the sciences. Thus, the very destiny of any society is now entwined with its ability to develop a genuine science and technology culture, accessible for participation not only to the few who, by virtue of their training or trade, work in the science and technology fields, but to all, thereby creating occasions for society to debate and to foster a positive dialogue about the directions of change and future choices. This book organized on the theme of 'knowing, sharing, caring: new insights for a diverse world', which was derived from the observation that globalization rests upon diversity—diversity of contexts, publics, research, strategies and new innovating practices—and aims to stimulate exchanges, discussions and debates, to initiate a reflection conducive to decentring and to be an

opportunity for enrichment by providing the reader with means to achieve the potentialities of that diversity through a comparison of the visions that underpin the attitudes of social actors, the challenges they perceive and the potential solutions they consider. Thus, this book aims first and foremost to raise questions in such a manner that readers so stimulated will feel compelled to contribute and will do so. In this spirit, however significant, the results presented and shared are less important than the questions they seek to answer: How are we to rethink the diffusion, the propagation and the sharing of scientific thought and knowledge in an ever more complex and diverse world? What to know? What to share? How do we do it when science is broken down across the whole spectrum of the world's diversity? The book is recommended for those who are interested in science communication and science cultures in the new media era, in contemporary social dynamics, and in the evolution of the role of the

Building a European Public Sphere / Un Espace Public Européen en Construction Sep 27 2022

The book edited by four known specialists of European history presents for the first time a discussion among European historians on the European public sphere since the 1950s. It treats the general perspective and deals also in special articles with the role played by the European Union, by the Council of Europe, and by national media such as television and film. The volume shows that the role of the European public sphere is often underestimated and that it is gradually becoming more influential and forceful not only in politics, but also in culture. européen et son évolution depuis les années 1950. La question est abordée dans son ensemble, mais certaines contributions traitent aussi plus spécifiquement du rôle joué par l'Union européenne, par le Conseil de l'Europe, et par les médias nationaux, comme la télévision et le cinéma. Ce volume montre que l'on a souvent sous-estimé l'espace public européen, alors que son influence est de plus en plus importante, tant au niveau politique que culturel.

Perceptions of Europe Jun 12 2021 This book presents the main findings of a comparative qualitative survey conducted in France, Germany, Italy, and Poland. Ordinary citizens from very different social backgrounds and professions were asked a range of open-ended questions, allowing them to express themselves freely. There have been few qualitative surveys on ordinary citizens views of European integration, and none on this scale. The resulting picture is very different from the self-evident

assumptions of many current studies on European opinions. The book stresses the great diversity, ambiguity, and complexity of European attitudes. It emphasises the causal impact of formal education, political interest and involvement, individual everyday exposures to 'European' realities, and the role of collective national experiences of European integration and national history. This book: is the first qualitative survey among ordinary from all social strata across Europe that explores perceptions and judgments on 'Europe' and the EU; explains the underlying logic of why Europe and European integration are such a far reality to most citizens; explores how most citizens are poorly - but unequally - informed about and interested in European subjects; investigates how citizens are able to express perceptions of 'Europe' by using a series of analogies and comparisons often linked to their daily experiences; identifies the complex range of issues that influence our perceptions, and the

irresolute, fragmentary, mixed, and sometimes contradictory nature of these opinions.

History of Vikings Apr 29 2020 History of Vikings Thank you for purchasing "History of Vikings: An Epic Guide to the Viking Age and Feared Norse Seafarers. Such as Egil Skallagrimsson, Ragnar Lothbrok, Ivar the Boneless, and More" History is always filled with information, which describes different events that took place at different periods. As we read history books, we learn and discover about certain events. We learn what preceded those events or what caused them. We want to know why things were as they were (or how we learned). However, the main thing with history is that information we have can often be misleading or incomplete. The similar thing happened with Vikings. For many of us, the first picture that comes to our minds when we mention the word "Viking" is a savage, colossal man, wearing a beard, and carrying a huge axe in one hand. Many of us have at least heard of the Vikings. We think we know something about

Reconsidering Europeanization Jul 13 2021 This pertinent and highly original volume explores how ideas of Europe and processes of continental political, socio-economic, and cultural integration have been intertwined since the nineteenth century. Applying a wider definition of Europeanization in the sense of "becoming European", it will pay equal attention to counter-processes of disentanglement and

disintegration that have accompanied, slowed down, or displaced such trends and developments. By focusing on the practices, agents, and experience of Europeanization, the volume strives to bring together the history of ideas and the history of human actions and conduct, two approaches that are usually treated separately in the field of European studies.
