**Assessing Fitness for Military Enlistment** Oct 16 2021 The U.S. Department of Defense (DoD) faces short-term and long-term challenges in selecting and recruiting an enlisted force to meet personnel requirements associated with diverse and changing missions. The DoD has established standards for aptitudes/abilities, medical conditions, and physical fitness to be used in selecting recruits who are most likely to succeed in their jobs and complete the first term of service (generally 36 months). In 1999, the Committee on the Youth Population and Military Recruitment was established by the National Research Council (NRC) in response to a request from the DoD. One focus of the committee's work was to examine trends in the youth population relative to the needs of the military and the standards used to screen applicants to meet these needs. When the committee began its work in 1999, the Army, the Navy, and the Air Force had recently experienced recruiting shortfalls. By the early 2000s, all the Services were meeting their goals; however, in the first half of calendar year 2005, both the Army and the Marine Corps experienced recruiting difficulties and, in some months, shortfalls. When recruiting goals are not being met, scientific guidance is needed to inform policy decisions regarding the advisability of lowering standards and the impact of any change on training time and cost, job performance, attrition, and the health of the force. Assessing Fitness for Military Enlistment examines the current physical, medical, and mental health standards for military enlistment in light of (1) trends in the physical condition of the youth population; (2) medical advances for treating certain conditions, as well as knowledge of the typical course of chronic conditions as young people reach adulthood; (3) the role of basic training in physical conditioning; (4) the physical demands and working conditions of various jobs in today's military services; and (5) the measures that are used by the Services to characterize an individual's physical condition. The focus is on the enlistment of 18- to 24-year-olds and their first term of service.

**Utilization of Military Manpower** Apr 10 2021 Committee Serial No. 55. Investigates allegations of improper and inefficient utilization of military personnel. Focuses on proposal for use of civilian personnel for many noncombat military jobs and improper use of military personnel to perform personal services for superiors.

**The Defence Industrial Base and the West** Nov 24 2019 This book, first published in 1989, analyses the effect that interdependence has had on the defence industrial base, concentrating upon those defence industries situated at the hi-tech end, and paying particular attention to the procurement decisions that affect the production of sophisticated military aircraft. Interdependence raises questions of importance to international relations, strategic studies and defence economics, and Western industrialised states have an ongoing dilemma over the degree to which they should subject their defence industrial bases to the forces of economic interdependence. Despite worries over strategic vulnerability, most Western states have been showing increased interest in arms collaboration, with the aim of maximizing the amount of weaponry available for defence. As this book shows, such a goal becomes increasingly important as the technological sophistication of weapons grows.

**Religious Requirements and Practices** Jun 12 2021 Prepared by the Office of the Chief of Chaplains, United States Army, this handbook provides a useful guide to the beliefs and practices of a number of religious groups. It provides a useful reference, both for professionals such as airport and hospital chaplains, and for lay readers interested in a basic guide to religious groups not readily covered in other references. A specific purpose of the handbook was also to limit the amount of information provided on each group. Thus, while the information is accurate (in most instances approved by authorities from the individual groups themselves), it is by no means comprehensive. The material presented in the handbook was derived through an extensive research effort. The handbook includes 37 different group descriptions, divided into seven categories. The categories are: Christian Heritage Groups Japanese Heritage Groups Jewish Groups Indian Heritage Groups Islamic Groups Sikh Groups Other Groups Among the uniform topics covered for each group are: historical roots, origins in the U.S., number of adherents in the U.S., organizational structure, leadership and role of priesthood, who may conduct worship services, is group worship required, dietary laws or restrictions, special religious holidays, funeral and burial requirements, autopsy, cremation, medical treatment, is a priest required at the time of death, basic teachings or beliefs, and ethical practices.

**Navy Basic Military Requirements** May 23 2022 The United States Navy Basic Military Requirements have long been the standard used as the pinnacle of training achievement.

This manual has been continuously tested and updated to successfully educate every member of the Navy since its inception. The needs of the instructor, the student, and the Navy are perfectly balanced. Whether you are planning to join the Navy, have served in the Navy, or plan to use the BMR as a template for training material development, this book is for you. This is the model all educators should follow when developing training programs and course materials.

*Navy Basic Military Requirements (Navedtra 14325) - Nonresident Training Course* Sep 27 2022 COURSE OVERVIEW: Basic Military Requirements, NAVEDTRA 14325, is a self-study training manual (TRAMAN)/nonresident training course (NRTC) that covers the basic knowledges required of the men and women of the U.S. Navy and Naval Reserve. This TRAMAN/NRTC provides subject matter that directly relates to the naval standards for the apprenticeship (E-2/E-3) rates. The naval standards are found in the Manual of Navy Enlisted Manpower and Personnel Classification and Occupational Standards (Volume 1), NAVPERS 18068F. THE COURSE: This self-study course is organized into subject matter areas, each containing learning objectives to help you determine what you should learn along with text and illustrations to help you understand the information. The subject matter reflects day-to-day requirements and experiences of personnel in the rating or skill area. It also reflects guidance provided by Enlisted Community Managers (ECMs) and other senior personnel, technical references, instructions, etc.
