International Perspectives on Maladministration in Education Dec 05 2020 ***This volume develops a theoretical and critical foundation for understanding "maladministration"—the phenomena of harmful administrative and organisational behaviours in educational systems. Chapter authors provide theoretical and practice-based perspectives across international contexts regarding common destructive practices that occur in educational organisations, such as negligence and mistreatment of people, professional dishonesty, fraud and embezzlement, abuse of power, and corrupt organisational cultures. International Perspectives on Maladministration in Education shines a light on this complex topic by examining various practices at individual, group, organisational, and system levels; the contexts and influences that give rise to them; and potential remedies to ensure more accountable, just, and safe institutions.***

Concept and Form Volume 1 Aug 01 2020 ***First systematic presentation and assessment of the groundbreaking journal Cahiers pour l'Analyse. Concept and Form is a two-volume monument to the work of the philosophy journal the Cahiers pour l'Analyse (1966–69), the most ambitious and radical collective project to emerge from French structuralism. Inspired by their teachers Louis Althusser and Jacques Lacan, the editors of the Cahiers sought to sever philosophy from the interpretation of given meanings or experiences, focusing instead on the mechanisms that structure specific configurations of discourse, from the psychological and ideological to the literary, scientific, and political. Adequate analysis of the operations at work in these configurations, they argue, helps prepare the way for their revolutionary transformation. This first volume comprises English translations of some of the most important theoretical texts published in the journal, written by thinkers who would soon be counted among the most inventive and influential of their generation: Alain Badiou, Yves Duroux, Alain Grosrichard, Serge Leclaire, Jacques-Alain Miller, Jean-Claude Milner, and François Regnault. The book is complemented by a second volume, consisting of essays and interviews that assess the significance and legacy of the journal, and by an online edition of the full set of original Cahiers texts, produced by the Centre for Research in Modern European Philosophy at Kingston University, London and accessible at cahiers.kingston.ac.uk.***

Teaching and Learning Methods in Medicine Oct 23 2019 ***This book considers the evolution of medical education over the centuries, presents various theories and principles of learning (pedagogical and andragogical) and discusses different forms of medical curriculum and the strategies employed to develop them, citing examples from medical schools in developed and developing nations. Instructional methodologies and tools for assessment and evaluation are discussed at length and additional elements of modern medical teaching, such as writing skills, communication skills, evidence-based medicine, medical ethics, skill labs and webinars, are fully considered. In discussing these topics, the authors draw upon the personal experience that they have gained in learning, teaching and disseminating knowledge in many parts of the world over the past four decades. Medical Education in Modern Times will be of interest for medical students, doctors, teachers, nurses, paramedics and health and education***
