[Management Education and Humanities](#) Apr 24 2022 Academics and managers who strive for a humanistic management education usually care for people, but they are challenged by sophisticated intellectual subjects and practical problems. The authors' experience, competence and commitment enables them to present an extensive coverage of important views and an in-depth study of these issues. Eduard Bonet, ESADE, Spain This volume is a timely initiative. It resonates with important questions on globalization and its consequences, on the unrelenting quest for efficiency and productivity, on recent corporate scandals and on the responsibilities of managers and management education. This book is a manifesto for an intellectual revolution. In a complex and open world, managers often bump into the limits of the decontextualized tools associated with mainstream management knowledge and practice. Managers have to navigate in a world that is not only economic but also political, cultural, shaped by history and ethical traditions and preoccupations not only as a mark of social capital but really as a way to enhance their managerial skills and efficiency. The role of management education should be to prepare them for that odyssey and this volume tells us that humanities could be a powerful tool in that sense. This project is served by a highly legitimate international panel of contributors who collectively point towards an alternative for management thinking and management education. Marie-Laure Djelic, ESSEC Business School, France Management Education and Humanities argues that management teachers and researchers seem to be increasingly dissatisfied with the way managers are usually educated in western countries. It claims that educational practices and methods would greatly benefit from reflection on the implicit assumptions and paradigms behind those practices, and debates the role that humanism and humanities might play in the formation of new managerial é lites. The book examines three themes that have emerged as central to the contemporary debate on management education: the profession of management; humanism as a philosophy and worldview; and the humanities as an academic field where management schools could find new inspirations for curricula. All three themes are scrutinized in a frame of reference extended between two different points of view: the traditional view, with its tendency to idealize (and even sometimes romanticize) humanism, the humanities and management as a social function; and the past-modern view, which is inclined to skepticism and to the deconstruction of social and cultural phenomena. Providing a lively account of this ongoing debate and exploring new trends and experiences in management education, this book will be invaluable reading for teachers, students and researchers of management, management strategy, and organizational behaviour.

Handbook of Qualitative Research Methods in Entrepreneurship Jul 04 2020 . . . the Handbook of Qualitative Research Methods in Entrepreneurship is an important contribution to the field, and should be referenced in any paper using qualitative methodologies to investigate the entrepreneurial phenomenon. Craig S. Galbraith, Journal of Enterprising Communities There is

no hiding behind the ramparts of dry scholarship here. The credibility of the theory being spoken of is not the stuff of constructed proofs, but alignments of critical insight and utility. This is where qualitative work can make a difference to the field, and where this book makes its mark. Robin Holt, International Journal of Entrepreneurial Behaviour and Research The Handbook of Qualitative Research Methods in Entrepreneurship is an unusually solid and multifaceted book on what qualitative methods have done, are doing and will do in entrepreneurship research. Every serious entrepreneurship scholar should read it. It points at the future! Björn Bjerke, University of Kalmar, Sweden I would warmly recommend this unique collection of qualitative methods of entrepreneurship research to both mature and beginning researchers as a menu to choose from for their planned empirical studies. For those who try to get away from only quantitative studies in both business practice and academic research, this book is their chance to find a rich inspiration in reflecting on entrepreneurship as a lived experience using grounded theory and ethnographic, discourse and narrative approaches. It might convince editors of top journals of entrepreneurship research to welcome qualitative research submissions as an indispensable complement to quantitative only submissions. This domain is not physics. In bringing together such a variety of experts from so many nationalities in this Handbook, our Danish colleagues are making entrepreneurship research a realistic global venture. Jan Ulijn, Eindhoven University of Technology, The Netherlands Helle Neergaard and John Parm Uthøi have compiled a remarkable collection of work that both represents the range of methods and demonstrates the depth of insight that can be achieved through qualitative approaches. This book is not simply a handbook of qualitative research methods, though it well achieves this aim, it is also an important contribution towards the field of entrepreneurship research. From the Foreword by Sara Carter This expansive and practical Handbook introduces the methods currently used to increase the understanding of the usefulness and versatility of a systematic approach to qualitative research in entrepreneurship. It fills a crucial gap in the literature on entrepreneurship theory, and, just as importantly, illustrates how these principles and techniques can be appropriately and fruitfully employed. The Handbook is underpinned by the belief that qualitative research has the potential to charter hitherto unexplored waters in the field of entrepreneurship and thus contribute significantly to its further advancement. The contributors seek to assist entrepreneurship researchers in making more informed choices and designing more rigorous and sophisticated studies. They achieve this by providing concrete examples of research experiences and tangible how to advice. By clarifying what these research methods entail, how they are currently being used and how they can be evaluated, this Handbook constitutes a comprehensive and highly accessible methodological toolbox. Dealing with both well-accepted qualitative approaches and lesser-known, rarer and more novel approaches to the study of entrepreneurship, this Handbook will be invaluable to those studying, researching and teaching entrepreneurship.

Robert Louis Stevenson Jan 10 2021 Robert Louis Stevenson: Writer of Boundaries reinstates Stevenson at the center of critical debate and demonstrates the sophistication of his writings and the present relevance of his kaleidoscopic achievements. While most young readers know Robert Louis Stevenson (1850 – 1894) as the author of Treasure Island, few people outside of academia are aware of the breadth of his literary output. The contributors to Robert Louis Stevenson: Writer of Boundaries look, with varied critical approaches, at the whole range of his literary production and unite to confer scholarly legitimacy on this enormously influential writer who has been neglected by critics. As the editors point out in their Introduction, Stevenson reinvented the “ personal essay ” and the “ walking tour essay, ” in texts of ironic stylistic brilliance that broke completely with Victorian moralism. His first full-length work of fiction, Treasure Island, provocatively combined a popular genre (subverting its imperialist ideology) with a self-conscious literary approach. Stevenson, one of Scotland ’ s most prolific writers, was very effectively excluded from the canon by his twentieth-century successors and rejected by Anglo-American Modernist writers and critics for his play with popular genres and for his non-serious metaliterary brilliance. While Stevenson ’ s critical recognition has been slowly increasing, there have been far fewer published single-volume studies of his works than those of his contemporaries, Henry James and Joseph Conrad.
