After the Long Silence Feb 08 2021 After the Long Silence offers a ground-breaking, meticulously researched criticism of Brazilian contemporary performance created by its post-dictatorship generation, whose work expresses the consequences of decades of state-imposed censorship. By offering an in-depth examination of key artists and their works, Cláudia Tatting Nascimento highlights Brazil's political trajectory while never allowing the weight of historical events to offset key aesthetic trends. Brazilian theater artists born around the time of the nation's 1964 military coup experienced the oppressive rule of dictatorship throughout their formative years, but came of age as Brazil re-entered democracy some two decades later. This book showcases how the post-dictatorship generation developed performances that mapped the uncharted territories of Brazil's political trauma with new dramaturgies, site-specific and street productions, and aesthetic experimentation. The author's in-depth research into a wide array of archival materials and publications in both Portuguese and English demonstrates how the artistic practices of significant post-dictatorship artists such as Cia. dos Atores, Teatro da Vertigem, Grupo Galpão, Os Fotos Encenam, and Newton Moreno were driven by critical thinking and a postcolonial sentiment, proving symptomatic of the nation's shift from an ethos of half-truth telling into a transitional justice that fell short in affirming citizenship. Ideal for scholars of the intersection of theatre and politics, After the Long Silence: The Theater of Brazil's Post-Dictatorship Generation offers insight into the function of theater in times of political turmoil and artmaking practices that emerge in response to oppressive regimes.

Handbook of Research on Promoting Social Justice for Immigrants and Refugees Through Active Citizenship and Intercultural Education Dec 29 2019 Migration movements have been a constant in the societies of the past, as well as in postmodern society. However, in the past ten years, the increase in political, economic, and religious conflict amongst nations; the increase of the poverty index; and many and various natural disasters have duplicated the forced displacement of millions of people across the seven continents of the planet. This situation brings important challenges in terms of the vulnerability, inequity, and discrimination that certain peoples suffer. Professionals from the fields of the social sciences, education, psychology, and international law share the fact that education represents an opportunity for children and young migrants to become members with full rights in the societies they arrive in. Empirical studies show that the implementation of the right to education for migrants presents some challenges and dilemmas to the governments of host countries and more specifically to the education centers, NGOs, universities, and the professionals working in them, hence the need for more research on these issues of immigration, refugees, social justice, and intercultural education. The Handbook of Research on Promoting Social Justice for Immigrants and Refugees Through Active Citizenship and Intercultural Education provides visibility to issues such as the increase in migration and displacement and the difficulties in political agreements, educational contexts, and in cultural issues, stigmatization, vulnerability, social exclusion, racism, and hatred amongst host communities. This book gives possible solutions to this current complex situation and helps foster and promote sensitivity, perspective, and critical thinking for a respectful and tolerant coexistence and promotion of equity and social justice. The chapters promote cultural diversity and inclusion in classrooms by offering knowledge, strategies, and research on organizational development for educational institutions and multicultural environments. This book is essential for administrators, policymakers, leaders, teachers, practitioners, researchers, academicians, and students interested in the promotion of social justice in education for immigrants and refugees.

The Truth Is Always Grey Oct 26 2019 Changing how we look at and think about the color grey Why did many of the twentieth century's best-known abstract painters often choose grey, frequently considered a noncolor and devoid of meaning? Frances Guerin argues that painters (including Jasper Johns, Cy Twombly, Agnes Martin, Brice Marden, Mark Rothko, and Gerhard Richter) select grey to respond to a key question of modernist art: What is painting? By analyzing an array of modernist paintings, Guerin demonstrates that grey has a unique history and a legitimate identity as a color. She traces its use by painters as far back as medieval and Renaissance art, through Romanticism, to nineteenth- and twentieth-century modernism to show how grey is the perfect color to address the questions asked by painting within art history and to articulate the relationship between painting and the historical world of industrial modernity. A work of exceptional erudition, breadth, and clarity, presenting an impressive range of canonical paintings across centuries as examples, The Truth Is Always Grey is a treatise on color that allows us to see something entirely new in familiar paintings and encourages our appreciation for the innovation and dynamism of the color grey.

Beach Nourishment Jul 24 2019 Erosion is experienced by most coastlines worldwide, and it is usually attributed not only to sea level rise but also to the retention of sand in dams, the occupation of dry beaches by urbanized areas, the mining of sand as a building material for construction, and so on. Beach nourishment has evolved as the favored erosion-mitigation strategy in many areas of the world. The increasing number of people living on the coast, the safety of those people, and the high values of coastal properties are all factors that have made beach nourishment a cost-effective strategy for managing erosion in many locations. However, a new scenario of sand scarcity and environmental care has arisen in recent decades. There have been many different and interesting cases of various aspects of beach nourishment in recent years. The purpose of this invited Special Issue is to publish the most exciting experience and research with respect to this topic. Thus, novel techniques for designing, executing, and controlling these kinds of works as well as different case studies and their monitoring results and conclusions have been included, in order to present an updated state of the art for marine scientists, researchers, and engineers.
