Scientific Detectors for Astronomy Aug 29 2022 Dear Friends, It seems like it was only yesterday that we drove the last of you to the airport. The memories and the spirit of the Scientific Detectors for Astronomy Workshop (SDW2002) remain fresh and strong. For us, this was a very special event, a great gathering of what may be one of the friendliest and most cooperative technical communities on our little planet. We have tried to capture the spirit of the Workshop in these Proceedings and we hope you are able to relive your week in Hawaii. For those readers who did not attend, we invite you into this community. As you probably noticed, there is a new name on the cover: Jenna Beletic was the ace up our sleeve for these Proceedings. As a summer intern at Keck, she took up the task of organizing, proofreading, editing and formatting the papers. She also made the graphics (her artistic talents shine on pages xxxiii and xxxv), contacted authors and prepared the mountain of paperwork which goes with producing a book. Jenna's enthusiasm at learning, her passion for the job and creativity (e. g. find 100 ways to get Paola and Jim to do their jobs) have been a motivating addition to our team of bold workshop foxes!..... and a source for a good deal of paternal pride. We are honoured to have her as a fellow editor.

[Star Identification](#) Mar 24 2022 This book summarizes the research advances in star identification that the author's team has made over the past 10 years, systematically introducing the principles of star identification, general methods, key techniques and practicable algorithms. It also offers examples of hardware implementation and performance evaluation for the star identification algorithms. Star identification is the key step for celestial navigation and greatly improves the performance of star sensors, and as such the book includes the fundamentals of star sensors and celestial navigation, the processing of the star catalog and star images, star identification using modified triangle algorithms, star identification using star patterns and using neural networks, rapid star tracking using star matching between adjacent frames, as well as implementation hardware and using performance tests for star identification. It is not only valuable as a reference book for star sensor designers and researchers working in pattern recognition and other related research fields, but also as teaching resource for senior postgraduate and graduate students majoring in information processing, computer science, artificial intelligence, aeronautics and astronautics, automation and instrumentation. Dr. Guangjun Zhang is a professor at the School of Instrumentation Science and Opto-electronics Engineering, Beihang University, China and also the Vice President of Beihang University, China

Soldiers of Peace May 02 2020 Soldiers of Peace, by West Point graduate and Iraq War veteran Paul K. Chappell, is the sixth book in his seven-book Road to Peace series. The titles in this important series can be read in any order. All are about waging peace, ending war, the art of living, and what it means to be human. In a world where so many solutions deal with surface symptoms rather than the root causes of our problems, Chappell's books provide real guidance we can follow to change ourselves and change the world for the better. In Soldiers of Peace, Paul discusses how to wield the weapon of nonviolence with maximum force so that we can understand, confront, and heal our personal and societal wounds. To create realistic peace we must be as well trained in waging peace as soldiers are in waging war. Chappell discusses how our misunderstanding of peace and violence originate from our misunderstanding about reality and the human condition itself. This book offers a new paradigm in human understanding by dispelling popular myths and revealing timeless truths about the reality of struggle, rage, trauma, empathy, the limitations of violence, the power of nonviolence, and the skills needed to create lasting peace. Through the educational initiative of peace literacy and the metaphor of the constellation of peace, Soldiers of Peace offers a practical framework so that all of us can apply this new paradigm to our daily lives, and therefore create realistic peace within our friendships, families, workplaces, communities, nations, and the entire world. In a time of increased strife and violence in our society, this book is more critically needed than ever.
